*Handbook of Research on Engineering Education in a Global Context* Smirnova, Elena V., Clark, Robin P., 2018-08-31 Engineering education methods and standards are important features of engineering programs that should be carefully designed both to provide students and stakeholders with valuable active integrated learning experiences and to provide a vehicle for assessing program outcomes With the driving force of the globalization of the engineering profession standards should be developed for mutual recognition of engineering education across the world but it is proving difficult to achieve The Handbook of Research on Engineering Education in a Global Context provides innovative insights into the importance of quality training and preparation for engineering students It explores the common and current problems encountered in areas such as quality and standards management information systems innovation and enhanced learning technologies in education as well as the challenges of employability entrepreneurship and diversity This publication is vital reference source for science and engineering educators engineering professionals and educational administrators interested in topics centered on the education of students in the field of engineering *Research Analytics* Francisco J. Cantu-Ortiz, 2017-10-25 The growth of machines and users of the Internet has led to the proliferation of all sorts of data concerning individuals institutions companies governments universities and all kinds of known objects and events happening everywhere in daily life Scientific knowledge is not an exception to the data boom The phenomenon of data growth in science pushes forth as the number of

scientific papers published doubles every 9.15 years and the need for methods and tools to understand what is reported in scientific literature becomes evident. As the number of academicians and innovators swells so do the number of publications of all types yielding outlets of documents and depots of authors and institutions that need to be found in Bibliometric databases. These databases are dug into and treated to hand over metrics of research performance by means of Scientometrics that analyze the toil of individuals, institutions, journals, countries and even regions of the world. The objective of this book is to assist students, professors, university managers, government, industry and stakeholders in general understand which are the main Bibliometric databases, what are the key research indicators and who are the main players in university rankings and the methodologies and approaches that they employ in producing ranking tables. The book is divided into two sections. The first looks at Scientometric databases including Scopus and Google Scholar as well as institutional repositories. The second section examines the application of Scientometrics to world class universities and the role that Scientometrics can play in competition among them. It looks at university rankings and the methodologies used to create these rankings. Individual chapters examine specific rankings that include QS World University, Scimago Institutions Webometrics, U Multirank, U.S. News World Report. The book concludes with a discussion of university performance in the age of research analytics.

**Science**, 2009     Wissenschaft im Wettbewerb Richard Münch, 2025-05-15. Die Universitäten stehen seit gut zwei Jahrzehnten in einem verschärften Wettbewerb um Exzellenz. Sie konkurrieren um Forschungsmittel, erfolgreiche Forschende, begabte Studierende und Machtpositionen, mit denen sie sich Vorteile in diesem Wettbewerb verschaffen können. Dieser institutionelle Wettbewerb verlagert den individuellen Wettbewerb zwischen den Forschenden um Erkenntnisfortschritt und Anerkennung durch die wissenschaftliche Gemeinschaft. Die Universität wird so zur treibenden Kraft eines akademischen Kapitalismus, der auf die zirkuläre Akkumulation von ökonomischem und symbolischem Kapital zielt. Richard Münch untersucht in diesem Buch drei Wesenszüge der Universität im akademischen Kapitalismus und ihre Wirkung auf die wissenschaftliche Praxis sowie die Offenheit der Wissensrevolution, die nach Wettbewerbsvorteilen strebende unternehmerische Universität, die auf Drittmitteleinwerbung im großen Stil ausgerichtete strategisch planende Universität und die auf betriebswirtschaftliches Qualitätsmanagement fokussierte Audit-Universität.
