Strategic and Innovative Pricing Mathias Cöster, Einar Iveroth, Nils-Göran Olve, Carl-Johan Petri, Alf Westelius, 2020-04-22 This book provides a concrete guide on how to execute strategic pricing to excel in an increasingly dynamic and digitised business environment while developing and deepening relations with contract partners. The secret lies in crafting innovative price models that reward joint value creation in accordance with the business model rather than engaging in confrontative zero-sum pricing reasoning. *Strategic and Innovative Pricing: Price Models for a Digital Economy* provides hands-on tools that are applied on three interconnected levels of analysis. It illustrates how to explore the business ecology to understand its dynamics and how digitisation enables it to prosper and demonstrates how to construct a viable business model that enables an organisation to navigate in its vibrant ecology. Finally, and most importantly, it shows how to use innovative price models to realize and monetise the business model and its value offering, making the organisation and its partnerships sustainable. Models pertaining to the three levels of analyses are applied in rich case studies and examples from different countries, and the book includes guidelines on how to use them. Special attention is paid to digitisation as an underlying theme, making this book of interest to researchers, academics, and students in the fields of strategic management and technology innovation management.

Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments
