Hankel,2018-02-05 Smart strategies for pragmatic science based growth and sustainable achievement The Science of Intelligent Achievement teaches you the scientific process of finding success through your most valuable assets Selective focus how selective are you with who and what you let into your life Creative ownership how dependent are you on others for your happiness and success Pragmatic growth how consistently and practically are you growing daily First this book will show you how to develop your focus by being very selective with where you spend your mental energy If you ve failed to reach an important goal because you were distracted misinformed or overcommitted then you know the role focus and selectivity play in achievement Second you will learn how to stop allowing your happiness and success to be dependent on other people and instead start taking ownership over your life through creative work Finally you will learn the art of changing your life through pragmatic decisions and actions Self improvement is not the result of dramatic changes Instead science has shown that personal and professional change is initiated and sustained by consistent practical changes To grow you must leverage the power of micro decisions personality responsibility and mini habits Your own biology will not let you improve your life in any other way What do you currently value What are working to attain Have you been taught to value your job title or your relationship with some other person above all else Have you been convinced that the most valuable things in life are your paycheck the number of people who say hello to you at the office and the number of people who say I need you at home Or have you become so passive in what you value that you let anyone and anything into your life as long as whatever you let in allows you to stay disconnected from the cold hard truth that when things really go wrong in your life the only person who will be able to fix it and the only person will be responsible for it is you If so welcome to fake success Passivity dependence and the sacrifice of practical thinking and personal responsibility to fuzzy grandiose ideals and temporary feelings these are markers of fake success Intelligent Achievement on the other hand is not a moving target It s not empty either Instead it s sturdy full and immovable It s not something that s just handed to you It s not something you re nudged to chase or coerced into wanting Intelligent Achievement comes from within you It s a collection of values that are aligned with who you are values you have to protect and nurture These values do not increase your dependence on other people and things Instead they relieve you of dependence This kind of achievement is something that you have a part in building from the ground up you know what s in it you chose it someone else didn t choose it for you Achieving real success means you must focus create and grow daily The Science of Intelligent Achievement will show you how Bakery Products

Y. H. Hui,Harold Corke,Ingrid De Leyn,Wai-Kit Nip,Nanna A. Cross,2008-02-28 While thousands of books on baking are in print aimed at food service operators culinary art instruction and consumers relatively few professional publications exist that cover the science and technology of baking In Bakery Products Science and Technology nearly 50 professionals from industry government and academia contribute their perspectives on the state of baking today The latest scientific developments technological processes and engineering principles are described as they relate to the essentials of baking

Coverage is extensive and includes raw materials and ingredients from wheat flours to sweeteners yeast and functional additives the principles of baking such as mixing processes doughmaking fermentation and sensory evaluation manufacturing considerations for bread and other bakery products including quality control and enzymes special bakery products ranging from manufacture of cakes cookies muffins bagels and pretzels to dietetic bakery products gluten free cereal based products and specialty bakery items from around the world including Italian bakery foods Blending the technical aspects of baking with the freshest scientific research Bakery Products Science and Technology has all the finest ingredients to serve the most demanding appetites of food science professionals researchers and students
