Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design

and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector **Artificial Intelligence for Logistics 5.0** Bernardo Nicoletti,2025-08-03

There is no shortage of hype about artificial intelligence especially in recent years We have only begun to touch the surface of what this powerful technology can do As technology and logistics services have become increasingly intertwined it has become more difficult to cut through the noise and figure out what really matters While there are already several books on AI for business in general this title provides a tailored overview of what AI means specifically for logistics services a highly regulated but also disruptive industry It cuts through the hype and examines the current state of AI applications in the logistics industry as well as the state of funding and partnerships between technology and industry companies AI is essential to drive innovation create efficiencies and increase productivity to capitalize on opportunities both for established logistics companies and enterprises However it also carries risks and the potential for biases that will deepen systemic inequalities if responsible AI is not operationalized Therefore it is imperative for academics executives managers and logistics service provider organizations to approach AI mindfully reflectively and responsibly so that they can make informed decisions about and with AI in their work This book takes a detailed look at the use cases in the logistics services industry as well as the risks and opportunities It answers pressing questions such as How can you effectively balance innovation customer centricity and trust with AI in the logistics industry Can smaller companies take advantage of this solution How can institutions use AI responsibly while mitigating potential challenges related to data bias It will be of great interest to academics in the fields of logistics and innovation strategy as well as practitioners and policy makers **Handbook of Media Psychology** Grant J.
