Algorithms for the People Josh Simons, 2025-07-08 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In Algorithms for the People Josh Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance Drawing on his experience as a research fellow at Harvard University a visiting research scientist on Facebook s Responsible AI team and a policy advisor to the UK s Labour Party Simons gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the institutions that build and use them He argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy

We Have Never Been Woke Musa al-Gharbi, 2025-10-07 How a new woke elite uses the language of social justice to gain more power and status without helping the marginalized and disadvantaged Society has never been more egalitarian in theory Prejudice is taboo and diversity is strongly valued At the same time social and

economic inequality have exploded In *We Have Never Been Woke* Musa al Gharbi argues that these trends are closely related each tied to the rise of a new elite the symbolic capitalists In education media nonprofits and beyond members of this elite work primarily with words ideas images and data and are very likely to identify as allies of antiracist feminist LGBTQ and other progressive causes Their dominant ideology is wokeness and while their commitment to equality is sincere they actively benefit from and perpetuate the inequalities they decry Indeed their egalitarian credentials help them gain more power and status often at the expense of the marginalized and disadvantaged *We Have Never Been Woke* details how the language of social justice is increasingly used to justify this elite and to portray the losers in the knowledge economy as deserving their lot because they think or say the wrong things about race gender and sexuality Al Gharbi's point is not to accuse symbolic capitalists of hypocrisy or cynicism Rather he examines how their genuine beliefs prevent them from recognizing how they contribute to social problems or how their actions regularly provoke backlash against the social justice causes they champion A powerful critique *We Have Never Been Woke* reveals that only by challenging this elite's self-serving narratives can we hope to address social and economic inequality effectively
