Weight Loss vs. Nutrition Loss - Losing Weight in a Healthy Manner Dueep Jyot Singh, John Davidson, 2017-10-01
Table of Contents Introduction Yo Yo Dieting Effects of Starvation Basics of Your Diet What to Eat When to Eat How to Eat
Something about home cooked food Sugars Why Do Starvation Diets Not Work Low Calorie Diets Conclusion Author Bio
Publisher Introduction Believe it or not more and more people are becoming obsessed with a body image in which they are
slim trim and thus supposedly attractive A few years ago I was shocked to see a skeletal photo of Victoria Beckham in which
she looked like a drought victim She was at death s bed and she looked like a death s head According to her she was lean thin
a walking skeleton and so attractive According to me she looked like nothing on earth but would fit in very well with the
skeletons on Halloween Oh now just look at this just what is mentally wrong with this girl She is already skeletal but she is
still obsessed with her weight Looks like she is suffering from an eating disorder possibly anorexia or bulimia as well as
psychological problems like low self esteem This book is going to tell you all about how you can lose weight through proper
eating and a healthy diet not healthy dieting There is a difference I am not going to talk to you about any sort of dieting
Because that leads to malnutrition That leads to nutritional loss The term dieting actually does not refer to losing weight
even though it has become synonymous with it now Dieting actually began as a term for the nutrition you consumed in a day
That means the food you ate every day and not something that you did for a short period of time or as a temporary measure
to detoxify your body Dieting absolutely does not mean that your body should be deprived of any sort of nourishment and
nutrition which it needs to keep itself functioning properly and normally Dieting does not mean that you starve yourself
voluntarily because you want to be as thin as that supermodel who is a drug addict and an alcoholic and is surviving on
weight loss pills recommended to her by her dietitian instead of eating oriole honest to goodness healthy meal three times a
day Like any sensible normal natural really healthy person not obsessed with his or her weight would do You can see by the
way the clothes fall around her the model on the next page that this particular supermodel has already begun to go in for a
zero fat diet Her main aim is to look like a walking skeleton Her job entails this sort of body image She may consider it very
glamorous and people may envy her this sort of lifestyle But because she is not eating a balanced diet throughout her life
within the next five years she will not have enough of energy to work physically concentrate mentally or do any sort of
normal activity later on in life **Sport Nutrition** Asker Jeukendrup, Michael Gleeson, 2024-06-05 Sport Nutrition Fourth
Edition uses a physiological basis to provide an in depth look at the science supporting nutrition recommendations Students
