Data Streams S. Muthukrishnan, 2005 In the data stream scenario input arrives very rapidly and there is limited memory to store the input Algorithms have to work with one or few passes over the data space less than linear in the input size or time significantly less than the input size In the past few years a new theory has emerged for reasoning about algorithms that work within these constraints on space time and number of passes Some of the methods rely on metric embeddings pseudo random computations sparse approximation theory and communication complexity The applications for this scenario include IP network traffic analysis mining text message streams and processing massive data sets in general Researchers in Theoretical Computer Science Databases IP Networking and Computer Systems are working on the data stream challenges

Television by Stream Christina Adamou, Sotiris Petridis, 2023-05-22 Online television streaming has radically changed the ways in which programs are produced disseminated and watched While the market is largely globalized with some platforms streaming in multiple countries audiences are fragmented due to a large number of choices and often solitary viewing However streaming gives new life to old series and innovates conventions in genre narrative and characterization This edited collection is dedicated to the study

of the streaming platforms and the future of television It includes a plethora of carefully organized and similarly structured chapters in order to provide in depth yet easily accessible readings of major changes in television Enriching a growing body of literature on the future of television essays thoroughly assess the effects new television media have on institutions audiences and content

Specifications and Drawings of Patents Issued from the United States Patent Office United States. Patent Office,1981-12

TV Content Analysis Yiannis Kompatsiaris,Bernard Merialdo,Shiguo Lian,2012-03-19 The rapid advancement of digital multimedia technologies has not only revolutionized the production and distribution of audiovisual content but also created the need to efficiently analyze TV programs to enable applications for content managers and consumers Leaving no stone unturned TV Content Analysis Techniques and Applications provides a detailed exploration of TV program analysis techniques Leading researchers and academics from around the world supply scientifically sound treatment of recent developments across the related subject areas including systems architectures algorithms applications research results emerging approaches and open issues The book is organized into six parts Content Extraction deals with automatic analysis and annotation of TV content addressing generic semantics and concepts as well as TV content Content Structuring examines techniques for identifying interesting parts of TV programs and supplying direct access to it Content Recommendation explores the problem of providing users with the most relevant content addressing the problem of an ever

increasing amount of available content Content Quality considers visual perception and quality approaches in the multi display TV context and the specific mobile TV scenario Web and Social TV presents studies on Web and TV convergence and on how user generated content in Web 2 0 applications can be used to enhance services Content Production covers postproduction visual effects and presentation standards Most parts start with a chapter that provides an overview of that area followed by state of the art approaches focusing on specific issues covered in that section Reporting on recent advances in the field the book provides you with the global view and up to date understanding of emerging trends needed to participate in the development of the digital TV domain

Digital Interactive TV and Metadata Arthur Lugmayr, Samuli Niiranen, Seppo Kalli, 2013-03-09 Recent years have brought many changes to the world of mass media The Internet and mobile communications technology have provided consumers with interactive digital services Television is catching up with this trend through the digitalization process Digital television is a hybrid platform combining elements from classical analog television and the Internet providing modern multimedia services on a familiar platform In short digital TV is a gateway to the world of interactive digital media Digital TV brings consumers into the television service arena and offers them new degrees of freedom However as the service and multimedia content types diversify and the services and their content increase television is facing many of the same challenges of complexity and information overflow faced by other digital media Metadata can handle the diverse services and content of digital TV efficiently and in a consumer friendly way Metadata means that the data are accompanied by other data which describe them As data about data meta data can provide an insight into syntactically and semantically complex data by distilling their essence to a set of simple descriptors Metadata also helps to structure and manage information in diverse settings The use of metadata in broadcast multimedia should not be restricted to being merely a tool for coping with the challenges of a complex networked multimedia environment Instead metadata offers new opportunities for the development of innovative services

Netflix, Dark Fantastic Genres and Intergenerational Viewing Djoymi Baker, Jessica Balanzategui, Diana Sandars, 2023-07-04 Focusing on Netflix's child and family orientated platform exclusive content this book offers the first exploration of a controversial genre cycle of dark science fiction horror and fantasy television under Netflix's Family Watch Together TV tag Using a ground breaking mix of methods including audience research interface and textual analysis the book demonstrates how Netflix is producing dark family telefantasy content that is both reshaping child and family friendly TV genres and challenging earlier broadcast TV models around child appropriate family viewing It illuminates how Netflix encourages family audiences to watch together through intergenerational dynamics that work on and offscreen The chapters in this book explore how this Netflixication of family television developed across landmark examples including Stranger Things A Series of Unfortunate Events The Dark Crystal Age of Resistance and even Squid Game The book outlines how Netflix is consolidating a new dark family terrain in the streaming sector which is unsettling older concepts of family viewing leading to considerable audience and critical

confusion around target audiences and viewer expectations This book will be of particular interest to upper level undergraduates graduates and scholars in the fields of television studies screen genre studies childhood studies and cultural studies
