Ambassadors to Create More Inclusive Universities Ruxandra Floștină, Clare Gartland, Albina Khasanzyanova, Ümit Çelen, 2025-05-12 Designed to promote the social and educational inclusion of disadvantaged groups and nontraditional learners this book provides all the information needed to train networks of student ambassadors to improve student diversity and inclusion in higher education Recognising that student ambassadors can play a significant role in addressing inequalities by supporting younger students in developing social and cultural capital the book uses evidence based information and best practices for training student ambassadors to enable them to promote social inclusion and educational progression Packed full of activities covering the topics of STEM the Arts the Social Sciences Humanities and Health each activity is presented in

line with the United Nations Sustainable Development Goals and can be used in the training of student ambassadors themselves or in schools with students aged 11-14 to empower them to become active engaged and involved in their local communities. By participating in these activities student ambassadors will be able to effectively engage with more students from disadvantaged or marginalised communities and students from these communities will be better equipped to navigate progression routes into higher education. This is a must-read book for all those interested in the theory and practicalities of making their universities more inclusive with the help of student ambassadors. It is a hands-on resource that will be particularly useful for those higher education institutions that are interested in implementing student ambassadors as well as anyone interested in promoting social justice and challenging traditional patterns of progression to higher education.

The SAGE Encyclopedia of Action Research David Coghlan, Mary Brydon-Miller, 2014-08-11 Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational community and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design enactment and evaluation of liberating actions through combining action and research reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s there has been a dramatic increase in research output and adoption in university curricula over the past decade. This is now an area of high popularity among academics and researchers from various fields especially business and organization studies education health care nursing development studies and social and community work. The SAGE Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state of the art overview and comprehensive breakdown of the key tenets and methods of action research as well as detailing the work of key theorists and contributors to action research.

Transformative Action for Sustainable Outcomes Maria Sandberg, Janne Tienari, 2022-04-10 This book critically examines sustainability challenges that humankind faces and offers responsible organising as a solution in responding to these challenges. The text explores how different actors can responsibly organise for transformative action towards sustainable outcomes as expressed in the United Nations Sustainable Development Goals (SDGs). Responsible refers to a reflexive understanding of how to organise in times of sustainability challenges. Organising refers to activities and practices where different actors take transformative action together. This comprehensive edited collection of short clear concise and compelling chapters brings together scholars in a range of disciplines and blends theoretical perspectives to study humans and social interactions organisations nonhumans and living environments. It offers topical examples from across the world and from organising of companies and other organisations supply chains networks ecosystems and markets. The book is written for scholars and students across the social sciences and humanities as well as for practitioners working with the SDGs. It discusses complex issues in an informative and engaging way. It is critical and collaborative. The book serves as an introduction to key themes and perspectives of responsible

organising and offers new insights on connections between themes and perspectives

Promotion of Physical Activity and Health in the School Setting Antonio García-Hermoso, 2024-08-24 This book is the first known contributed volume focused exclusively on physical activity in the school setting. It describes the importance of regular physical activity for all preschoolers, children and adolescents, which contributes to preventing concerning public health problems such as childhood obesity and physical inactivity. Children and adolescents spend more time in school than anywhere else other than the home, making schools an excellent setting in which to offer quality physical activity education and possibilities for an active school day. Physical activity is associated with physiological, physical and mental health benefits. School-based physical activity initiatives can also positively impact learning and classroom behavior. This book comprehensively reviews the latest research on physical activity and health in the school setting, presenting different perspectives from prestigious international authors representing 12 countries and involving 40 different researchers. It provides an in-depth description on how the school environment can be used to develop, implement and evaluate strategies that promote physical activity and reduce sedentary behavior among these populations according to the educational stage, i.e. pre-primary, primary and secondary school. It also details how to implement each individual initiative based on successful investigations and how to plan, implement and evaluate a school policy. By implementing these strategies, schools can help create a culture of physical activity that promotes healthy habits and reduces the risk of chronic diseases. The volume's 16 chapters are organized in three parts, providing an overview of current knowledge. The authors discuss advances in theory and research and demonstrate how they are using that evidence to improve professional practice and collaborate with families. Part I: Movement Guidelines and Recommendations; Part II: Monitoring and Evaluation in School Settings; Part III: Physical Activity During School Hours. **Promotion of Physical Activity and Health in the School Setting** makes an important contribution to the youth physical activity field for scholars and practitioners. The book is essential reading for advanced students, researchers, practitioners and policy makers with an interest in physical activity, youth sport, public health, physical education or child and adolescent development and education.

Screen Acting Peter Kramer, Alan Lovell, 2014-04-08 While not everyone would agree with Alfred Hitchcock's notorious remark that actors are cattle, there is little understanding of the work film actors do. Yet audience enthusiasm for or dislike of actors and their style of performance is a crucial part of the film-going experience. **Screen Acting** discusses the development of film acting from the stylisation of the silent era through the naturalism of Lee Strasberg's Method to Mike Leigh's use of improvisation. The contributors to this innovative volume explore the philosophies which have influenced acting in the movies and analyse the styles and techniques of individual filmmakers and performers, including Bette Davis, James Mason, Susan Sarandon and Morgan Freeman. There are also interviews with working actors. Ian Richardson discusses the relationship between theatre, film and television acting. Claire Rushbrook and Ron Cook discuss their work with Mike Leigh and Helen Shaver discusses her work with the critic Susan Knobloch.
