One World The Ethics Of Globalization The Terry Lectures:

One World Now Peter Singer, 2016-01-01 Seamlessly integrates major development of the past decade into Peter Singer's classic text on the ethics of globalization. One World. One of the world's most influential philosophers here confronts both the perils and potentials inherent in globalization. Every issue is considered from an ethical perspective including climate change, foreign aid, human rights, immigration, and the responsibility to protect people from genocide and crimes against humanity. Singer argues powerfully that solving global problems requires transcending national differences. One World Peter Singer, 2002-01-01 Written by a religious historian, this is an introduction to early Christian thought. Focusing on major figures such as St. Augustine and Gregory of Nyssa, as well as a host of less well-known thinkers, Robert Wilken chronicles the emergence of a specifically Christian intellectual tradition. In chapters on topics including early Christian worship, Christian poetry, and the spiritual life, the Trinity, Christ, the Bible, and icons, Wilken shows that the energy and vitality of early Christianity arose from within the life of the Church. While early Christian thinkers drew on the philosophical and rhetorical traditions of the ancient world, it was the versatile vocabulary of the Bible that loosened their tongues and minds and allowed them to construct the world anew intellectually and spiritually. These thinkers were not seeking to invent a world of ideas, Wilken shows, but rather to win the hearts of men and women and to change their lives. Early Christian thinkers set in place a foundation that has endured. Their writings are an irreplaceable inheritance, and Wilken shows that they can still be heard as living voices within contemporary culture. **Du sollst nicht töten (lassen)?** Julian Zeyher-Quattlander, 2021-09-01 Du sollst nicht töten. Du sollst aber auch deinen Nächsten lieben wie dich selbst. Was also sollen Christenmenschen tun, wenn andere Menschen zum Ziel tödlicher Gewalt werden? Wie kann hier christliche Verantwortung für den Frieden angemessen wahrgenommen werden? Und sollte eine solche christliche Friedensethik auch in gesellschaftlichen Debatten etwa um strukturelle Gewalt oder die Gewaltförmigkeit der Lebensweise des globalen Nordens ethische Orientierung bieten? Das Dilemma der Gewaltanwendung föhrt so auch hinein in die gegenwärtige Debatte um die Berechtigung einer öffentlichen Theologie. Die Studie beantwortet diese Fragen im Rückgriff auf die protestantische Tradition. In fundamēntalethischer Absicht legt sie dabei im Zugriff auf Martin Luthers Zwei Reiche Lehre eine protestantische Aneignung öffentlicher Theologie in Deutschland vor und in materialethischer Absicht erschließt sie Impulse der Friedensethik Dietrich Bonhoeffers für das 21. Jahrhundert. Thou Shalt Not Kill. Reconstructing Dietrich Bonhoeffer's Ethics of Peace for Contemporary Discourse. A Contribution of Public Theology. Thou shalt not kill. But thou shalt also love thy neighbour as thyself. So what should Christians do when other people are targeted by lethal violence? How can Christian responsibility for peace be properly exercised here? And should such a Christian peace ethic also offer ethical orientation in public social debates, for example about structural violence or the violence of the cultural way of life in the global North? The dilemma of peace ethics also leads into the current debate about the legitimacy of a public theology. The study answers these questions with recourse to the

Protestant tradition From a fundamental ethical perspective it presents a Protestant appropriation of public theology in Germany by reconstructing Martin Luther's Two Kingdoms Doctrine and from a material ethical perspective it updates impulses from Dietrich Bonhoeffer's peace ethics for the 21st century

Constructing Ethical Patterns in Times of Globalization Aleksi Kuokkanen, 2012-01-20 In the third millennium people are increasingly being forced to decide how to lead an ethically acceptable life both nationally and internationally amidst the radical pluralism of world views Surprisingly while the West was a pioneer in the recognition of human rights its stance towards both exclusivism and difference is distorted Spurred on the Global Ethic Project of the Catholic theologian Hans K ng this book searches for a plausible solution to the dilemma of global societal coexistence by carefully analysing the contemporary philosophical discussion It uncovers the multifaceted ways in which the standard Western interpretation promotes neutrality towards particular world views shows why this interpretation is flawed and presents an alternative with practical implications and an eye towards the global dialogue of cultures

The Citizen in the 21st Century James Arvanitakis, Ingrid Mattherws, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 In the nineteen essays of this collection the 21st century citizen is introduced deconstructed probed and admired among the messy realities of the contemporary world As an inter disciplinary project the collection draws on expertise from across Europe North America and Australasia to offer new insights into such diverse existences as the environmental citizen the young citizen the multiple citizen the non citizen and the global citizen It unflinchingly spotlights the failures of our contemporary societies to resolve the endless universal problems of conflict poverty and oppression It also opens windows of hope onto a range of new understandings and innovative approaches to the challenges we face from the mass movements of refugees to the digitalisation of social contact This material can be read as a whole as a conceptual collection or it can be dipped in to and out of between work and leisure Whether it is read as research or pastime this volume will challenge and confront comfort and renew the many ways of thinking about citizenship in the 21st century

Moral Responsibility, Statecraft and Humanitarian Intervention Cathinka Vik, 2015-06-12 This book explores the moral complexity of statecraft in the context of decision making on armed intervention in the post Cold War era This book adds to the debate on humanitarian intervention by analyzing the moral complexity of statecraft when confronted with situations of severe human rights violations Through a comparative case study of President Bill Clinton administration's failure to intervene in the Rwanda genocide 1994 the George W Bush administration's tepid response to the Darfur atrocities 2003-07 and the Barack Obama administration's leadership behind the limited U N intervention in Libya 2011 it explores the factors domestic and international that influence decision making about humanitarian intervention These cases show not only how international moral concerns often compete with interest based and domestic concerns but how decision makers are often confronted by competing moral imperatives In such situations it is often not clear which imperatives should be followed In an increasingly interconnected world this book examines how we expect state leaders to balance different moral

responsibilities This book will be of much interest to students of humanitarian intervention the Responsibility to Protect human rights US foreign policy African politics and IR in general *Climate Justice and Collective Action* Angela Kallhoff, 2021-05-20 This book develops a theory of climate cooperation designed for concerted action which emphasises the role and function of collectives in achieving shared climate goals In debates on climate change action research focuses on three major goals on mitigation on adaptation and on transformation Even though these goals are accepted concerted action is still difficult to realize Climate Justice and Collective Action provides an analysis of why this is the case and develops a theory of climate cooperation designed to overcome the existing roadblocks Angela Kallhoff starts with a thorough analysis of failures of collective action in the context of climate change action Taking inspiration from theories of water cooperation she then establishes a theory of joint action that reframes climate goals as shared goals and highlights the importance of adhering to principles of fairness This also includes an exploration of the normative claims working in the background of climate cooperation Finally Kallhoff puts forward proposals for a fair allocation of duties to cooperate with respect to climate goals This book will be of great interest to students and scholars of climate action climate justice environmental sociology and environmental philosophy and ethics more broadly **Leading Organizations** Gill Robinson Hickman, 2010 The Second Edition of Leading Organizations offers an expanded focus on the fluid roles of leaders and participants followers and their mutual responsibility for organizational leadership Like the first edition this text contains chapters on implementing the organization's mission structure culture and strategy written by leading scholars in the field New features include Strategic leadership Virtual leadership Leadership organizational change and conflict Building a culture of leadership **Peter Singer and Christian Ethics** Charles C. Camosy, 2012-04-12 Interaction between Peter Singer and Christian ethics to the extent that it has happened at all has been unproductive and often antagonistic Singer sees himself as leading a Copernican Revolution against a sanctity of life ethic while many Christians associate his work with a culture of death Charles Camosy shows that this polarized understanding of the two positions is a mistake While their conclusions about abortion and euthanasia may differ there is surprising overlap in Christian and Singerite arguments and disagreements are interesting and fruitful Furthermore it turns out that Christians and Singerites can even make common cause for instance in matters such as global poverty and the dignity of non human animals Peter Singer and Christian ethics are far closer than almost anyone has imagined and this book is valuable to those who are interested in fresh thinking about the relationship between religious and secular ethics **The Ordinary Virtues** Michael Ignatieff, 2017-09-18 During a 3 year 8 nation journey Michael Ignatieff found that while human rights is the language of states and liberal elites the moral language that resonates with most people is that of everyday virtues tolerance forgiveness trust and resilience These ordinary virtues are the moral system of global cities and obscure shantytowns alike **The Routledge Handbook of Environmental Justice** Ryan Holifield, Jayajit Chakraborty, Gordon Walker, 2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting

edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice. With wide ranging discussion of current debates, controversies and questions in the history, theory and methods of environmental justice research contributed by over 90 leading social scientists, natural scientists, humanists and scholars from professional disciplines from six continents, it is an essential resource both for newcomers to this research and for experienced scholars and practitioners. The chapters of this volume examine the roots of environmental justice activism, lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism, empirical research and policy development throughout the world. The Handbook features critical reviews of quantitative, qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity, transdisciplinarity and engaged research. Instead of adopting a narrow regional focus, it tackles substantive issues and presents perspectives from political and cultural systems across the world, as well as addressing activism for environmental justice at the global scale. Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research, policy and practice. Providing detailed but accessible overviews of the complex, varied dimensions of environmental justice and injustice, the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists.

The Great Tradeoff Steven R. Weisman, 2016-01-07. The global financial and economic crisis that began in 2008 has blasted livelihoods, inspired protests and toppled governments. It has also highlighted the profound moral concerns long surrounding globalization. Did materialist excess, doctrinaire embrace of free trade and capital flows and indifference to economic injustice contribute to the disaster of the last decade? Was it ethical to bail out banks and governments while innocent people suffered? In this blend of economics, moral philosophy, history and politics, Steven R. Weisman argues that the concepts of liberty, justice, virtue and loyalty help to explain the passionate disagreements spawned by a globally integrated economy.

Human Extinction Émile P. Torres, 2023-06-15. This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks. Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300,000 year history as a species. This book provides insight on the key questions that inform this discussion, including when humans began to worry about their own extinction and how the debate has changed over time. It establishes a new theoretical foundation for thinking about the ethics of our extinction, arguing that extinction would be very bad under most circumstances, although the outcome might be on balance good. Throughout the book, graphs, tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history. In its thorough examination of humanity's past, this book also provides a starting point for understanding our future. Although accessible enough to be read by undergraduates, *Human Extinction* contains new and thought provoking research that will benefit even established academic philosophers and historians.

Reluctant Bedfellows Meredith L. Ralston, Edna

Keeble, 2009 Academic feminist theorizing and identity politics the two argue has reached the level of analysis paralysis where women and women's groups do not act for fear of being pejoratively labeled This has many negative consequences for rights seeking groups as Ralston and Keeble experience firsthand in working to bring Angeles City and Canadian women's organizations together Both an eye opening picture of the workings of a community seeped in sex tourism and a sharp review of current feminist theorizing Reluctant Bedfellows offers much needed perspective on ways to bring disputing parties together and actually promote change **BOOK JACKET**

A Common Faith John Dewey, 2013-08-27 In A Common Faith eminent American philosopher John Dewey calls for the emancipation of the true religious quality from the heritage of dogmatism and supernaturalism that he believes characterizes historical religions He describes how the depth of religious experience and the creative role of faith in the resources of experience to generate meaning and value can be cultivated without making cognitive claims that compete with or contend with scientific ones In a new introduction Dewey scholar Thomas M Alexander contextualizes the text for students and scholars by providing an overview of Dewey and his philosophy key concepts in A Common Faith and reactions to the text

Life After Faith Philip Kitcher, 2014-10-28 Although there is no shortage of recent books arguing against religion few offer a positive alternative how anyone might live a fulfilling life without the support of religious beliefs This enlightening book fills the gap Philip Kitcher constructs an original and persuasive secular perspective one that answers human needs recognizes the objectivity of values and provides for the universal desire for meaningfulness Kitcher thoughtfully and sensitively considers how secularism can respond to the worries and challenges that all people confront including the issue of mortality He investigates how secular lives compare with those of people who adopt religious doctrines as literal truth as well as those who embrace less literalistic versions of religion Whereas religious belief has been important in past times Kitcher concludes that evolution away from religion is now essential He envisions the successors to religious life when the senses of identity and community traditionally fostered by religion will instead draw on a broader range of cultural items those provided by poets filmmakers musicians artists scientists and others With clarity and deep insight Kitcher reveals the power of secular humanism to encourage fulfilling human lives built on ethical truth

Private Doubt, Public Dilemma Keith Stewart Thomson, 2015-01-01 A distinguished scholar urges scientists and religious thinkers to become colleagues rather than adversaries in areas where their fields overlap Each age has its own crisis our modern experience of science religion conflict is not so very different from that experienced by our forebears Keith Thomson proposes in this thoughtful book He considers the ideas and writings of Thomas Jefferson and Charles Darwin two men who struggled mightily to reconcile their religion and their science then looks to more

recent times when scientific challenges to religion evolutionary theory for example have given rise to powerful political responses from religious believers Today as in the eighteenth century there are pressing reasons for members on each side of the religion science debates to find common ground Thomson contends No precedent exists for shaping a response to issues like cloning or stem cell research unheard of fifty years ago and thus the opportunity arises for all sides to cooperate in creating a new ethics for the common good **Encyclopedia of Leadership** George R.
