Peter Gonzales, 2002      Rethinking Free Trade, Economic Integration and Human Rights in the Americas María Belén Olmos  
Giupponi, 2017-01-26 This monograph offers the first systematic overview of the protection of human rights in trade  
agreements in the Americas Traditionally trade agreements in the Americas were concerned with economic questions and  
paid little attention to human rights However in the wake of the new regionalism which emerged at the end of the last  
century more clauses addressing social issues such as labour rights and environmental standards were inserted in trade  
agreements As economic integration increased a framework for the protection of human rights evolved This book argues that  
this framework allows for human rights protection on a transnational level while constructing regional identities Looking at  
the four key regional integration processes namely the Caribbean Community the Central American Integration System the  
Andean Community of Nations and the Southern Common Market and also at the North American Free Trade Agreement it  
shows how the integration process has reached a considerable degree of consolidation Writing on key sources in English for  
the first time this book will be essential reading for all free trade and human rights scholars      *Handbuch der Dritten Welt:*

**CARICOM report number 2 (Subregional Integration Report Series CARICOM = Informes Subregionales de Integración CARICOM; n. 2)**, 2005      **International Court Authority** Mikael Rask Madsen, 2018-06-21 An innovative

interdisciplinary and far reaching examination of the actual reality of international courts International Court Authority challenges fundamental preconceptions about when why and how international courts become important and authoritative actors in national regional and international politics A stellar group of scholars investigate the challenges that international courts face in transforming the formal legal authority conferred by states into an actual authority in fact that is respected by potential litigants national actors legal communities and publics Alter Helfer and Madsen provide a novel framework for conceptualizing international court authority that focuses on the reactions and practices of these key audiences Eighteen scholars from the disciplines of law political science and sociology apply this framework to study thirteen international courts operating in Africa Latin America and Europe as well as on a global level Together the contributors document and explore important and interesting variations in whether the audiences that interact with international courts around the world embrace or reject the rulings of these judicial institutions Alter Helfer and Madsen's authority framework recognizes that

international judges can and often do everything they should do to ensure that their rulings possess the gravitas and stature that national courts enjoy Yet even when imbued with these characteristics the parties to the dispute potential future litigants and the broader set of actors that monitor and respond to the court s activities may fail to acknowledge the rulings as binding or take meaningful steps to modify their behaviour in response to them For both specific judicial institutions and more generally the book documents and explains why most international courts possess de facto authority that is partial variable and highly dependent on a range of different audiences and contexts and thus is highly fragile An introduction situates the book s unique approach to conceptualizing international court authority within theoretical debates about the authority of global institutions International Court Authority also includes critical reflections on the authority framework from legal theorists international relations scholars a philosopher and an anthropologist The book s conclusion questions a number of widely shared assumptions about how social and political contexts facilitate or undermine international courts in developing de facto authority and political power
