Online Nationalism Globalisation Stephen Tierney:

Nationalism and Globalisation Stephen Tierney, 2015-10-08 This book addresses a seemingly paradoxical situation On the one hand nationalism from Scotland to the Ukraine remains a resilient political dynamic fostering secessionist movements below the level of the state On the other the competence and capacity of states and indeed the coherence of nationalism as an ideology are increasingly challenged by patterns of globalisation in commerce cultural communication and constitutional authority beyond the state It is the aim of this book to shed light on the relationship between these two processes addressing why the political currency of nationalism remains strong even when the salience of its objective independent and autonomous statehood becomes ever more attenuated The book takes an interdisciplinary approach both within law and beyond with contributions from international law constitutional law constitutional theory history political science and sociology The challenge for our time is considerable Global networks grow ever more sophisticated while territorial borders such as those in Eastern and Central Europe become seemingly more unstable It is hoped that this book by bringing together areas of scholarship which have not communicated with one another as much as they might will help develop an ongoing dialogue across disciplines with which better to understand these challenging and potentially destabilising developments

New Constitutional Horizons Cormac Mac Amhlaigh, 2022 This book examines the conceptual puzzles that multilevel pluralism poses for our constitutional theories It offers fresh perspectives by addressing the pluralism of norms and authorities from the viewpoint of legality and legitimacy proposing novel solutions for pluralizing constitutional theory in the light of multilevel governance

Changing Borders in Europe Jacint Jordana, Michael Keating, Axel Marx, Jan Wouters, 2018-12-21 Changing Borders in Europe focuses on the territorial dimension of the European Union It examines the transformation of state sovereignty within the EU the emergence of varied self determination claims and the existence of a tailor made architecture of functional borders established by multiple agreements This book helps to understand how self determination pressures within the EU are creating growing concerns about member states identity redefining multi level government in the European space It addresses several questions regarding two transformative processes blurring of EU borders and state sovereignty shifts and their interrelations from different disciplinary perspectives such as political science law political economy and sociology In addition it explores how the variable geographies of European borders may affect the issue of national self determination in Europe opening spaces for potential accommodations that could be compatible with existing states and legal frameworks This book will be of key interest for scholars students and practitioners of EU politics public administration political theory federalism and more broadly of European studies international law ethnic studies political economy and the wider social sciences

Peacebuilding, Constitutionalism and the Global South Kajit Bagu (John Paul), 2019-07-05 This book presents the case that liberal constitutionalism in the global South is a legacy of colonialism and is inappropriate as a means of securing effective peace in regions that have been subject to recurrent conflict The work

demonstrates the failure of liberal constitutionalism in guaranteeing peace in the postcolonial global South. It develops an alternative more compelling constitutionalism for peacebuilding in conflicted regions. This is based on constitutionalism that recognises plurality as a major feature in the global South. Drawing on events in Nigeria it develops a constitutional model based on Cognitive Justice which could deliver peace by addressing historic conceptual, legal, institutional and structural issues that have created social inequality and injustice. The study also incorporates insights from the development of plurinational constitutions in South America. The book will be an invaluable resource for researchers, academics and policy makers with an interest in constitutional, legal theory, peacebuilding and postcolonial studies.

The Oxford Handbook of Citizenship Ayelet Shachar, Rainer Bauboeck, Irene Bloemraad, Maarten Vink, 2017-08-03. Contrary to predictions that it would become increasingly redundant in a globalizing world, citizenship is back with a vengeance. *The Oxford Handbook of Citizenship* brings together leading experts in law, philosophy, political science, economics, sociology and geography to provide a multidisciplinary comparative discussion of different dimensions of citizenship: as legal status and political membership; as rights and obligations; as identity and belonging; as civic virtues and practices of engagement; and as a discourse of political and social equality or responsibility for a common good. The contributors engage with some of the oldest normative and substantive quandaries in the literature, dilemmas that have renewed salience in today's political climate. As well as setting an agenda for future theoretical and empirical explorations, this Handbook explores the state of citizenship today in an accessible and engaging manner that will appeal to a wide academic and non-academic audience. Chapters highlight variations in citizenship regimes practiced in different countries, from immigrant states to non-western contexts, from settler societies to newly independent states, attentive to both migrants and those who never cross an international border. Topics include the selling of citizenship, multilevel citizenship, in-between statuses, citizenship laws, post-colonial citizenship, the impact of technological change on citizenship and other cutting edge issues. This Handbook is the major reference work for those engaged with citizenship from a legal, political and cultural perspective. Written by the most knowledgeable senior and emerging scholars in their fields, this comprehensive volume offers state-of-the-art analyses of the main challenges and prospects of citizenship in today's world of increased migration and globalization. Special emphasis is put on the question of whether inclusive and egalitarian citizenship can provide political legitimacy in a turbulent world of exploding social inequality and resurgent populism.

The Law & Politics of Brexit Federico Fabbrini, 2017. The decision by the people of the United Kingdom to vote in a referendum in June 2016 to leave the European Union has produced shock waves across Europe and the world. Brexit calls into question consolidated assumptions on the finality of the EU and simultaneously sparks new challenges. These new challenges are not only in regard of the constitutional settlements reached in the UK, notably in Scotland and Northern Ireland, but also on the future of European integration. Now that Article 50 of the Treaty on the European Union has been invoked and the path towards full withdrawal by the UK from the EU remains clouded in

uncertainties a comprehensive legal and political analysis of how Brexit impacts on UK and the EU appears of the utmost importance This book brings together leading lawyers economists and political scientists to discuss the constitutional implications of Brexit and propose possible solutions for the way forward The book is structured around four main themes First it considers how Brexit will be implemented legally and politically in terms of the withdrawal and the possible new relations between the UK and the EU Second it examines the implications of Brexit on the constitutional structure of the UK as well as on the status of Northern Ireland and the relations with the Republic of Ireland Third it examines the implications of Brexit on the constitutional structure of the EU focusing on a number of key areas of EU policy making notably the Area of Freedom Security and Justice the Single Market and Economic and Monetary Union Fourth and finally the book looks into the mid to long term future and discusses the prospects for relaunching the EU after and beyond Brexit

The Federal Contract Stephen Tierney, 2022-05-26 Federalism is a very familiar form of government It characterises the first modern constitution that of the United States and has been deployed by constitution makers to manage large and internally diverse polities at various key stages in the history of the modern state Despite its pervasiveness in practice this book argues that federalism has been strangely neglected by constitutional theory It has tended either to be subsumed within one default account of modern constitutionalism or it has been treated as an exotic outlier a sui generis model of the state rather than a form of constitutional ordering for the state This neglect is both unsatisfactory in conceptual terms and problematic for constitutional practitioners obscuring as it does the core meaning purpose and applicability of federalism as a specific model of constitutionalism with which to organise territorially pluralised and demotically complex states In fact the federal contract represents a highly distinctive order of rule which in turn requires a particular territorialised approach to many of the

fundamental concepts with which constitutionalists and political actors operate constituent power the nature of sovereignty subjecthood and citizenship the relationship between institutions and constitutional authority patterns of constitutional change and ultimately the legitimacy link between constitutionalism and democracy In rethinking the idea and practice of federalism this book adopts a root and branch recalibration of the federal contract It does so by analysing federalism through the conceptual categories that characterise the nature of modern constitutionalism foundations authority subjecthood purpose design and dynamics This approach seeks to explain and in so doing revitalise federalism as a discrete capacious and adaptable concept of rule that can be deployed imaginatively to facilitate the deep territorial variety that characterises so many states in the 21st century Weltunordnung Carlo Masala, 2016-10-27 Afghanistan Irak Libyen Ukraine Syrien wir scheinen in einer neuen Weltunordnung zu leben Carlo Masala fragt wie es so weit kommen konnte und sucht nach neuen Antworten auf die globalen Krisen Im Westen werden f r das neue Chaos zumeist die Handlungen von mehr oder minder b sen Gegnern verantwortlich gemacht sei es der IS Russland oder China Tats chlich jedoch tr gt der Westen ein ger ttelt Ma an Verantwortung daf r dass die Welt seit dem Ende des Kalten Krieges aus den Fugen geraten ist Seine Versuche der Ordnungsstiftung durch humanit re Interventionen Regime Change und aktive Demokratisierungspolitik haben weltweit zu Widerstand gegen den neuen liberalen Imperialismus gef hrt Der Westen ist nicht stark genug dem Rest der Welt seinen Willen und seine Institutionen aufzuzwingen hat daraus aber noch nicht die n tigen Konsequenzen gezogen Carlo Masala analysiert die aktuelle Lage und pl diert f r einem realistischen Blick auf die Au enpolitik der nicht bei den Kategorien Gut und B se stehen bleibt Revolutionary Constitutionalism Richard Albert, 2020-04-02 This book the result of a major international conference held at Yale Law School contains contributions from leading scholars in public law who engage critically with Bruce Ackerman s path breaking book *Revolutionary Constitutions* Charismatic Leadership and the Rule of Law The book also features a rebuttal chapter by Ackerman in which he responds directly to the contributors essays Some advance Ackerman s theory others attack it and still others refine it but all agree that the ideas in his book reset the terms of debate on the most important subjects in constitutionalism today from the promise and perils of populism to the causes and consequences of democratic backsliding from the optimal models of constitutional design to the forms and limits of constitutional amendment and from the role of courts in politics to how we identify when the mythical people have spoken A must read for all interested in the current state of constitutionalism Constitutional Referendums Stephen Tierney, 2012-04-05 The constitutional referendum has become a vital feature of modern constitution making and reform This book provides the first full length analysis of the theoretical foundations of constitutional referendums assessing their democratic credentials and the design decisions that affect the value and legitimacy of the referendum process *Global Activism in Food Politics* A. Mann, 2014-05-01 Who should provide food and through what relationships Whose livelihoods should be protected For over 20 years the peasant farmers of La Via Campesina have been engaged in the fight against

injustice hunger and poverty under the banner of food sovereignty the right of peoples to healthy and culturally appropriate food produced through ecologically sound and sustainable methods and their right to define their own food and agriculture systems They campaign for healthy sustainable alternatives to an industrial food system controlled by agribusiness companies and the architects of unfair trade agreements This book draws on grounded case studies of agrarian movements in the Americas and Europe as exemplars of a power shift as local opposition scales up to global action in an effort to wrest control of our food away from transnational corporations and back to communities
