wissenschaftshistorischer Perspektive befasst sich Elsbeth Bösl mit der Historie des epistemischen Objektes alte DNA und dem kollektiven Produktionsprozess von Wissen in der aDNA Forschung *Our Bodies Are Selves* Philip Hefner, Ann Pederson, Susan Barreto, 2015-08-11 Our Bodies Are Selves is a look at what it means to be human in a world where medical technology and emerging ethical insight force us to rethink the boundaries of humanity spirit and man machine This book gives us a fresh look at how our expanding biological views of ourselves and our shared evolutionary history shows us a picture that may not always illumine who and where we are as Christians Offering up Christian theological views of embodiment the authors give everyday examples of lives of love faith and bodily realities that offer the potential to create new definitions of what it means to be a faith community in an increasingly technological age of medicine **The Secret**

World of Denisovans Silvana Condemi, François Savatier, 2025-08-19 For everyone interested in prehistory an unprecedented meticulously reported account of our prehistoric ancestors the recently discovered Third Man cousins to Sapiens and Neanderthals In December 2010 scientists discovered a fragment of a finger bone in the remote isolated Denisova Cave in Siberia To their surprise the bone contained neither Homo sapiens nor Neanderthal DNA Rather the fast advancing science of paleogenetics revealed that the DNA came from a previously unknown species of hominids the Denisovans as they almost immediately came to be called who shared a common ancestor with both Neanderthals and Homo sapiens This first and subsequent Denisovan fossil discoveries required paleoanthropologists including world leading researcher and author Silvana Condemi to reconsider their understanding of our ancestors and their successive prehistoric migrations out of Africa and into and throughout Eurasia tens of thousands of years ago Leading us through the excavation of Denisova Cave the sequencing of the Denisovan genome and recent fossil research Condemi and her coauthor science journalist François Savatier explore how the Denisovans migrated throughout Asia and with whom they interacted along the way as well as the comparisons and divergences between the evolutionary processes of Denisovans and our other ancestor cousins Neanderthals They help us to understand and appreciate how today s inhabitants of East Asia from Siberia to the Philippines carry up to 5 percent of Denisovan DNA and they revise the epic story of our ancient human ancestors immense journeys as they peopled our planet Colonizing Ourselves José Ángel Hernández, 2024-10-15 In the late nineteenth

century the Mexican government seeking to fortify its northern borders and curb migration to the United States set out to relocate Mexico Texano families or Tejanos on Mexican land In *Colonizing Ourselves* Jose Angel Hernandez explores these movements back to Mexico also known as autocolonization as distinct in the history of settler colonization Unlike other settler colonial states that relied heavily on overseas settlers especially from Europe and Asia Mexico received less than 1 percent of these nineteenth century immigrants This reality coupled with the growing migration of farmers and laborers northward toward the United States led ultimately to passage of the 1883 Land and Colonization Law This legislation offered incentives to any Mexican in the United States willing to resettle in the republic Tejanos as well as other Mexican expatriates abroad were to be granted twice the amount of land for settlement that other immigrants received The campaign worked ethnic Mexicans from Texas and the Mexican interior as well as Indigenous peoples from Mexico established numerous colonies on the northern frontier Leading one of the most notable back to Mexico movements was Luis Siliceo a Texan who with a subsidized newspaper *El Colono* and the backing of Porfirio Diaz's administration secured a contract to resettle Tejano families across several Mexican states The story of this partnership which Hernandez traces from the 1890s through the turn of the century provides insight into debates about settler colonization in Mexico Viewed from various global national and regional perspectives it helps to make sense of Mexico's autocolonization policy and its redefinition of Indigenous and settler populations during the nineteenth century

The Columbian Covenant: Race and the Writing of American History James Carson, 2014-12-18 This provocative analysis of American historiography argues that when scholars use modern racial language to articulate past histories of race and society they collapse different historical signs of skin color into a transhistorical and essentialist notion of race that implicates their work in the very racial categories they seek to transcend

The Emergence of Religion in Human Evolution Margaret Boone Rappaport, Christopher J. Corbally, 2019-12-09 Religious capacity is a highly elaborate neurocognitive human trait that has a solid evolutionary foundation This book uses a multidisciplinary approach to describe millions of years of biological innovations that eventually give rise to the modern trait and its varied expression in humanity's many religions The authors present a scientific model and a central thesis that the brain organs networks and capacities that allowed humans to survive physically also gave our species the ability to create theologies find sustenance in religious practice and use religion to support the social group Yet the trait of religious capacity remains non obligatory like reading and mathematics The individual can choose not to use it The approach relies on research findings in nine disciplines including the work of countless neuroscientists paleoneurologists archaeologists cognitive scientists and psychologists This is a cutting edge examination of the evolutionary origins of humanity's interaction with the supernatural It will be of keen interest to academics working in Religious Studies Neuroscience Cognitive Science Anthropology Evolutionary Biology and Psychology

Liberation Philosophy: From the Buddha to Omar Khayyam Mostafa

Vaziri,2019-09-30 The critical narrative of this interdisciplinary book offers a first time look at the interrelationship between biology mythology and philosophy in human development Its daring premise follows the trajectory of human thought starting with the biological roots of fear and the original need for religion truth seeking and myth making The narrative then innovatively links a number of maverick philosophical teachings over the centuries from pre Buddhist times to the Buddha from Epicurus and Pyrrho to Lucretius and eventually to the seminal poetry of Omar Khayyam These emergent philosophies exemplified liberation from the grasp of mythical and religious thinking and instead espoused an empirical and joyful mind The narrative concludes with a look at the emancipating philosophical movement that resulted in the European Enlightenment and it suggests that the philosophical teachings explored in the book may offer the potential for a second broader Enlightenment

An Essay on Science and Narcissism Bruno Lemaitre,2020-05-11 Scientists are often seen as meticulous and impartial individuals solely devoted to their study and the search for scientific truth But a deeper analysis reveals that many of them are highly egocentric and sensitive to their public image and its associated privileges Egocentrism elitism strategic media occupation and self enhancement strategies are some of the first particularities that strike a newcomer to the academic world An Essay on Science and Narcissism analyses the influence of narcissism an important human personality dimension on science The central idea is that narcissism is an advantageous trait for succeeding in an academic environment Scientists with a high ego are better at convincing others of the importance of their research and as excellent networkers they are well placed to exploit the different facets of the research system In his essay Bruno Lemaitre also discusses the psychological and sociobiological origins of narcissism and investigates the possible connection between narcissism on one hand and dominance and short term mating strategy on the other The recent increase in narcissism in Western society and how this destabilises not only our society but also scientific practice is also discussed This essay offers an alternative view of science by analysing the narcissistic personality prevalent among leading scientists but rarely placed in the spotlight

Scott Solomon,2016-10-25 An evolutionary biologist provides surprising insights into the changing nature of Homo sapiens in this important and an entertaining read Choice In Future Humans evolutionary biologist Scott Solomon draws on recent discoveries to examine the future evolution of our species Combining knowledge of our past with current trends Solomon offers convincing evidence that evolutionary forces are still affecting us today But how will modernization including longer lifespans changing diets global travel and widespread use of medicine and contraceptives affect our evolutionary future Solomon presents an entertaining and accessible review of the latest research on human evolution in modern times drawing on fields from genomics to medicine and the study of our microbiome Drawing together topics ranging from the rise of online dating and Cesarean sections to the spread of diseases such as HIV and Ebola Solomon suggests that we are entering a new phase in human evolutionary history one that makes the future less predictable and more interesting than ever before

Questions About Language Laurie Bauer,Andreea S. Calude,2020-05-19 Questions About Language sets out to answer in a readable yet insightful format a series of vital questions about language some of which language specialists are regularly asked and some of which are so surprising that only the specialists think about them In this handy guide sixteen language experts answer challenging questions about language from What makes a language a language to Do people swear because they don t know enough words Illustrating the complexity of human language and the way in which we use it the twelve chapters each end with a section on further reading for anyone interested in following up on the topic Covering core questions about language this is essential reading for both students new to language and linguistics and the interested general reader To Light the Flame of Reason Christer Sturmark,2022-05-01 To Light the Flame of Reason is all about the art of clear thinking an art that is needed now more than ever in the world we now live in Written for anyone who wants to navigate better in this world filled with populist dogmas anti science attitudes and pseudo philosophy authors Christer Sturmark and Douglas Hofstadter provide a set of simple tools for clear thinking as well as a deeper understanding of science truth naturalism and morality It also offers insights into the rampant problems of extremism and fundamentalism and suggestions for how the world can move towards a new enlightenment The book argues that we need to reawaken the basic

values and ideals that defined the original age of enlightenment We need to accept the idea that the world we inhabit is part of nature and that it has no trace of supernatural or magical forces Ethical questions should be detached from religion This doesn't mean that the questions become any easier just that ideas are tested and judged without being profoundly tainted and constrained by religious dogmas Such a form of secular humanism builds on the power of free thought the power to investigate and understand the natural world Although not everything can be investigated or understood the sincere quest for knowledge and understanding establishes a flexible nondogmatic attitude toward the world Curiosity and openness lie at the core of such an attitude The scientific method of careful and open minded testing as well as science's creative and reflective ways of thinking provides key tools What clear science inspired thinking helps us to understand among many other things is that a person can be good and can be motivated to carry out morally good actions without ever bowing to or being limited by supposedly divine forces To Light the Flame of Reason will appeal to adults who are trying to figure out how to deal with the ever increasing daily bombardment of conflicting messages about what is right true sensible or good and it should appeal even more to teenagers and university students who are struggling to find a believable and reliable philosophy of life that can help guide them in their choices of what and whom to trust and how to act both on the personal and the social level Today more people have greater access to information and knowledge than ever was dreamt of before and more people are concerned about the world situation More people have the chance through their own actions to make a difference Each one of us as an individual matters It is thus vitally important that each of us should choose in a conscious and reflective manner our own views of reality of the world and of humanity And this means that it is crucial for us all to train ourselves in the art of thinking clearly Christer Sturmark along with Pulitzer Prize winning author Douglas Hofstadter argue that we must refocus our efforts on cultivating a secular society and in doing so we will rediscover the values and ethics that are so foreign in today's society

Migrantes Alejandro Reig, Roger Norum, 2020-08-15 La historia nos demuestra que sin inmigración no existiríamos de no haber sido migrantes los humanos no seríamos quienes somos hoy Para muchos la migración es uno de los problemas más importantes de la sociedad contemporánea Pero cuáles son los problemas inherentes a esta por qué genera tanto debate el tema de la migración y los migrantes Un detallado recuento de uno de los fenómenos sociales y políticos más antiguos y decisivos de la humanidad Este libro es una invitación a la apertura a recordar la complejidad del tema y proponer una visión abarcadora para intentar entenderlo

Neanderthal Man Svante Pääbo, 2014-02-11 A preeminent geneticist winner of the 2022 Nobel Prize in medicine hunts the Neanderthal and Denisovan genomes to answer the biggest question of them all how did our ancestors become human Neanderthal Man tells the riveting personal and scientific story of the quest to use ancient DNA to unlock the secrets of human evolution Beginning with the study of DNA in Egyptian mummies in the early 1980s and culminating in the sequencing of the Neanderthal genome in 2010 Neanderthal

Man describes the events intrigues failures and triumphs of these scientifically rich years through the lens of the pioneer and inventor of the field of ancient DNA Svante P bo We learn that Neanderthal genes offer a unique window into the lives of our ancient relatives and may hold the key to unlocking the mysteries of where language came from as well as why humans survived while Neanderthals went extinct P bo redrew our family tree and permanently changed the way we think about who we are and how we got here For readers of Richard Dawkins David Reich and Hope Jahren Neanderthal Man is the must read account of how he did it

The Mysterious Origins of Hybrid Man Susan B. Martinez, 2013-11-02 A provocative challenge to Darwin s theory of evolution Shows there is no missing link because the human race since day one is the result of outright interbreeding among highly diverse types Reveals multiple Gardens of Eden and how each continent has its own independent hominid lineages Explains Homo sapiens mental powers the Great Leap Forward and how we acquired the blood of the gods which endowed us with a soul Did we evolve from apes or are we all descendants of Adam and Eve Why is the missing link still missing Is the dumb luck of natural selection valid Piecing together the protohistory of humanity through anthropology genetics paleolinguistics and indigenous traditions Susan B Martinez offers an entirely original alternative to Darwin s evolution Modern humanity did not evolve but is a mosaic of mixed ancestry the result of eons of cross breeding and retro breeding among different groups including Cro Magnon Neanderthal hobbits giants and Africa s Lucy and Zinj Martinez shows that there were multiple Gardens of Eden and how each continent had its own blend of races prior to the Great Flood which caused the diaspora that brought a renaissance of culture to every division of the Earth Martinez explains Homo sapiens mental powers the Great Leap Forward in cosmological terms how we are the product of both heaven and earth She identifies the Sons of Heaven and the angel engendered races explaining how Homo sapiens acquired the blood of the gods which endowed us with a soul Providing the ultimate resolution to the Evolution versus Creationism debate this landmark study of hybrid man justifies his unexpectedly sudden appearance in the fossil record the curious parallels between oral histories of the world s people and why anatomically modern features are found in the earliest paleontological evidence
