**Power Politics in Asia's Contested Waters** Enrico Fels, Truong-Minh Vu, 2016-02-19 This volume offers a comprehensive and empirically rich analysis of regional maritime disputes in the South China Sea SCS By discussing important aspects of the rise of China's maritime power such as territorial disputes altered perceptions of geo politics and challenges to the US led regional order the authors demonstrate that a regional power shift is taking place in Asia Pacific The volume also provides in depth discussions of the responses to Chinese actions by SCS claimants as well as by important non claimant actors

*War and Compromise Between Nations and States* Egbert Jahn, 2019-11-30 This volume investigates both violent conflicts and non violent conflict behavior It addresses a variety of topics including responsibility and guilt in connection with war violent conflicts and terrorist attacks conflict escalation in disputed areas such as the South China Sea Syria and Ukraine war as an instrument of the United States and Russia's global peace policy and the experiences with non violent conflict strategies in the Indian independence movement Furthermore it presents country studies on Switzerland and Catalonia Peaceful interethnic relations in multilingual states in Switzerland are examined and juxtaposed against independence movements such as in Catalonia Current political challenges faced by the European Union e.g. divergent refugee policies and the Brexit are also discussed

Contested Waters Amit Ranjan, 2020-09-02 This book examines India's transboundary river water disputes with its South Asian riparian neighbours Pakistan Bangladesh Nepal and Bhutan It explores the history of disputes and cooperation over the transboundary river water in this region as well as discusses current disputes and future concerns It analyses how and why existing transboundary river water sharing treaties between India and its South Asian riparian neighbours are confronted with challenges The book indicates that India's transboundary river water disputes with its South Asian riparian neighbours are likely to escalate in coming years due to the widening of the demand supply gap in the respective countries It further shows the impact of bilateral relations on the resolution of transboundary river water disputes even as cordial relationships do not always guarantee the absence of river water disputes between riparian states The book looks at some key questions How political are India's transboundary rivers water disputes in South Asia Why do the roots of India's river water disputes with Bangladesh and Pakistan lie in the partition of the British India in 1947 Why are there reservations against India's hydroelectricity projects or allegations of water theft Is it possible to resolve transboundary river water disputes among these South Asian countries This book will greatly interest scholars and researchers working in the areas of river management environmental politics transnationalism water resources politics and international relations security studies peace and conflict studies geopolitics development studies governance and public administration and South Asian studies in addition to policymakers and journalists

*China's Foreign Policy Contradictions* Tim Nicholas Rühlig, 2021-06-17 China's rise to great power status is indisputable but can it shape the future international order This question remains widely debated because China's foreign policy is contradictory Contrary to conventional wisdom

this book shows that China does not act from a position of strength but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making it shows that China will not provide a model for a new international system but could undermine the existing order *Geopolitical Rivalries and Strategic Competition Across Eurasia* Pietrzak, Piotr, 2025-07-29 Geopolitical rivalries and strategic competition across Eurasia have intensified in recent years reshaping the continent's political economic and security dynamics As major powers pursue competing interests Eurasia has become a critical area for influence infrastructure development and military impressions From various global initiatives to regional policies complex alliances rivalries and strategic calculations emerge These developments redefine state relationships while impacting global power balances and regional stability *Geopolitical Rivalries and Strategic Competition Across Eurasia* explores the influence of geopolitics on government strategy and international relations It examines various political rivalries and competitions across the Eurasia region presenting areas of influence that define current regional relationships This book covers topics such as foreign policy global business and democracy and is a useful resource for government officials business owners policymakers academicians researchers and scientists Science and Judicial Reasoning Katalin Sulyok, 2020-10-29 This pioneering study on environmental case law examines how courts engage with science and reviews legitimate styles of judicial reasoning *From Disputed Waters to Seas of Opportunity* Clive H. Schofield, 2011 **Southeast Asian Energy Transitions** Mattijs Smits, 2016-03-03 Addressing the apparent tensions between modernity and sustainability in Southeast Asia this book offers novel insights into the global challenge of moving towards a low carbon energy system With an original and accessible take on social theory related to energy transitions modernity and sustainability Mattijs Smits argues for a reinvigorated geography of energy He also challenges universalistic and linear assumptions about energy transitions and makes the case for energy trajectories stressing embeddedness contingency and connections between scales Contemporary and historical empirical examples from Southeast Asia primarily Thailand and Laos are drawn upon to show the importance of scale at regional national local and household levels The transitions in the national power sectors here have been intimately related to discourses of modernity and state formation since the colonial era More recently plans for international cooperation and discourses of regional power trade have taken centre stage Local energy trajectories are understood to be part of these transitions but also as embedded in local social political and spatial relations Examining how energy practices go hand in hand with the dissemination of different technologies this work shows the complexities of achieving sustainability in the context of rapidly changing energy modernities in Southeast Asia *Empowering Organizations through Corporate Social Responsibility* Wolf, Ruth, 2014-11-30 The impact of businesses on a country's economy extends beyond just the monetary effects of the company The ethical standard to which a business upholds itself can have a crucial impact on the development of a country's economy

Empowering Organizations through Corporate Social Responsibility addresses the implementation of businesses ethical standards in both emerging and advanced economies interpreting the social impact of this issue in a global context Highlighting case studies interdisciplinary perspectives and strategies in business management this book is a pivotal reference source for academics researchers post graduate students and professionals concerned with the development of the business sector

*The Third Option for the South China Sea* David Jay Green,2016-09-16 This Palgrave Pivot uses a simple model from game theory to explain the behavior of countries disputing ownership of resources and of small islands in the South China Sea It argues that the rapid transformation of the region s economy the rise of Factory Asia is not being acknowledged leading countries to take chances beyond what a rational picture of costs and benefits would suggest Regional economic cooperation may be a viable alternative to the present conflicts However the varied experience of regional initiatives in Southeast Asia provides a cautionary note that while there is the potential for peaceful development of the South China Sea there are significant challenges to structuring successful programs

*Game Theory and Water Diplomacy* Anamika Barua,Tanushree Baruah,2025-11-11 Transboundary water negotiations are complex as they are driven by diverse national interests multiple legal and policy frameworks historical and asymmetric power relations To induce the states to move from a national unilateral agenda to a shared cooperative agenda requires several rounds of dialogues and negotiations This book shows that the strategic interaction between the parties in these negotiations can be fruitfully analysed using the tools and techniques of game theory After an introduction to game theory and the relevant models the book explores three key cases from South Asian river basins Indus Brahmaputra and Ganges Every river basin is unique options and choices available for negotiations are context specific Therefore there is no single path or one size fits all transboundary interaction The choice and the strategies a nation state adopts to gain the most preferred outcome depend on the choices and the strategies the other state is making Thus the book examines the specifics of each case including the role of geographical position power relation policies internal and external access to information rationality as well as third party intervention in a negotiating state s position during transboundary interaction and explores what the application of game theory can reveal about each of the parties their positions and the strategies for achieving their goals This book is essential reading for researchers in water economics water diplomacy and conflict water security and South Asian studies

**The Right to Be Counted** Sanjeev Routray,2022-07-12 In the last 30 years Delhi the capital of India has displaced over 1 5 million poor people Resettlement and welfare services are available but exclusively so as the city deems much of the population ineligible for civic benefits The Right to Be Counted examines how Delhi s urban poor in an effort to gain visibility from the local state incrementally stake their claims to a house and life in the city Contributing to debates about the contradictions of state governmentality and the citizenship projects of the poor in Delhi this book explores social suffering logistics and the logic of political mobilizations that emanate from processes of displacement and resettlement Sanjeev Routray draws upon fieldwork

conducted in various low income neighborhoods throughout the 2010s to describe the process of claims making as an attempt by the political community of the poor to assert its existence and numerical strength and demonstrates how this struggle to be counted constitutes the systematic protracted and incremental political process by which the poor claim their substantive entitlements and become entrenched in the city Analyzing various social political and economic relationships as well as kinship networks and solidarity linkages across the political and social spectrum this book traces the ways the poor work to gain a foothold in Delhi and establish agency for themselves

**Ethnographies of Power** Tristan Loloum, Simone Abram, Nathalie Ortar, 2021-04-01 Energy related infrastructures are crucial to political organization They shape the contours of states and international bodies as well as corporations and communities framing their material existence and their fears and idealisations of the future Ethnographies of Power brings together ethnographic studies of contemporary entanglements of energy and political power Revisiting classic anthropological notions of power it asks how changing energy related infrastructures are implicated in the consolidation extension or subversion of contemporary political regimes and discovers what they tell us about politics today

**Assessing Maritime Disputes in East Asia** Barthelemy Courmont, Frederic Lasserre, Eric Mottet, 2017-04-28 Combining practical and theoretical approaches this book addresses the political legal and economic implications of maritime disputes in East Asia The maritime disputes in East Asia have multiplied over the past few years in parallel with the economic growth of the countries in the region the rise of nationalist movements fears and sometimes fantasies regarding the emergence of the People s Republic of China PRC as a global power increasing military expenses as well as speculations regarding the potential resources in various disputed islands These disputes however are not new and some have been the subject of contention and the cause of friction for decades if not centuries in a few cases Offering a robust analysis this volume explores disputes through the different lenses of political science international law history and geography and introduces new approaches in particular to the four important disputes concerning Dokdo Takeshima Senkaku Diaoyu Paracels and Spratlys Utilising a comparative approach this book identifies transnational trends that occur in the different cases and therefore at the regional level and aims to understand whether the resurgence of maritime disputes in East Asia may be studied on a case by case basis or should be analysed as a regional phenomenon with common characteristics This book will be of interest to students of Asian Politics Maritime Security International Security Geopolitics and International Relations in general

Eurasia on the Edge Richard Sakwa, 2018-10-15 Eurasia wherever one draws the boundaries is very much at the centre of discussions about today s world Security across Eurasia is a global concern and has been subject to a range of discussions and debate However the current tensions over security and world order with the growing challenges from Eurasia and Asia require more intense scrutiny The goals of the book are to explore the challenges facing the region and to assess how to achieve economic social and political stability in the Eurasian core The book s chapters are written by prominent experts in the field and together contribute to the continuing debate by providing

policy advice for managing crises in the region Conflicts inevitably arise in the Eurasian space as global powers regional powers and individual states jockey for positions and influence These conflicts need not reach a crisis state provided the foundations of conflict and the surrounding frameworks can be better understood To do this it is necessary to examine the issue of security in Eurasia from a multi dimensional perspective that challenges any and all assumptions about Eurasia and global order This volume has two overarching goals The first is to come to a better understanding of key security threats in the Eurasian region from a multi dimensional social political economic and institutional perspective The second is to discuss policies directed to increase mutual security in and around the Eurasian core Although the crisis of security affects the whole continent the area covered by the former Soviet Union and its neighborhood is at the epicenter of the current crisis On the one side the Atlantic community is consolidating and extending On the other various greater Asia ideas are in the making All of Eurasia is in danger of becoming an extended shatter zone a vast new shaky borderland trapped between two great systems of power and world order

*Political Power and Crisis* Giulio M. Gallarotti, 2025-08-18 This book examines how power dynamics unfold during crises focusing on how transformations in competing socio political arenas both domestic and international shape power structures As old certainties and institutions collapse actors must navigate new turbulent conditions The chapters in this book address key questions What power dynamics reveal themselves when people are faced with especially threatening situations How is control allocated in times of threat How does the democratic process evolve during crises What power structures emerge after a crisis What power dynamics establish themselves after the crises are abated Do crises lead to better or worse political systems What dimensions of power are most influential in driving political change during crises This book explores how crises lead to the redistribution of power with new actors emerging as key providers of resources Taking a cross disciplinary approach it examines power dynamics in both short and long term contexts Aimed at students and scholars of political science international relations sociology and crisis management it covers governance power shifts and institutional change during crises The chapters in this book were originally published as a special issue of the Journal of Political Power

**Beyond Territorial Disputes in the South China Sea** Robert C. Beckman, Ian Townsend-Gault, Clive Schofield, Tara Davenport, Leonardo Bernard, 2013-01-01 The book has been written by many highly qualified observers and academicians that have spent a lot of time observing and analyzing the recent developments in the South China Sea particularly those relating to the dispute and way of overcoming them I do hope that this publication will throw some light on such important matters and indicate possible roads to follow in solving the territorial disputes through joint development concept Hasjim Djalal Director of Southeast Asian Studies Jakarta Indonesia This highly informative and up to date book brings together expert scholars in law of the sea to explore the legal and geopolitical aspects of the South China Sea disputes and provide an in depth examination on the prospects of joint development in the South China Sea The South China Sea has long been regarded as a source of conflict and tension in Asia Underlying this conflict is

the dispute between China Vietnam the Philippines Malaysia and Brunei over the features in the South China Sea as well as the resources in the surrounding waters One viable solution is for the claimants to set aside their claims and jointly develop the hydrocarbon resources in the South China Sea Unlike previous works this book takes a unique approach by examining existing joint development arrangements in Asia to see if there are any lessons learnt that may be applicable to the South China Sea This approach has enabled the editors to move beyond a mere theoretical discussion on joint development and focus on the law policy and practical issues related to joint development Beyond Territorial Disputes in the South China Sea will strongly appeal to Government officials policy makers from ASEAN Countries China and the United States as well as academics particularly those who are involved in legal scholarship on the South China Sea disputes Practitioners of oil and gas law will also find much to benefit them in this book

**The Water-Food-Energy Nexus** Jeremy Allouche, Carl Middleton, Dipak Gyawali, 2019-04-09 The world of development thinkers and practitioners is abuzz with a new lexicon the idea of the nexus between water food and energy which is intuitively compelling It promises better integration of multiple sectoral elements a better transition to greener economies and sustainable development However there appears to be little agreement on its precise meaning whether it only complements existing environmental governance approaches or how it can be enhanced in national contexts One current approach to the nexus treats it as a risk and security matter while another treats it within economic rationality addressing externalities across sector A third perspective acknowledges it as a fundamentally political process requiring negotiation amongst different actors with distinct perceptions interests and practices This perspective highlights the fact that technical solutions for improving coherence within the nexus may have unintended and negative impacts in other policy areas such as poverty alleviation and education The Water Food Energy Nexus Power Politics and Justice lays out the managerial technical definitions of the nexus and challenges these conceptions by bringing to the forefront the politics of the nexus around two key dimensions a dynamic understanding of water food energy systems and a normative positioning around nexus debates in particular around social justice The authors argue that a shift in nexus governance is required towards approaches where limits to control are acknowledged and more reflexive plural strategies adopted This book will be of interest to academic researchers policy makers and practitioners in the fields of international development studies environmental politics and science and technology studies as well as international relations

Water and Power Mart A. Stewart, Peter A. Coclanis, 2018-12-12 This book brings together a talented international group of scholars policy practitioners and NGO professionals that explores a range of issues relating to environmental developmental and governing challenges on the Mekong one of the world's greatest rivers and alas one of the most endangered The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin Issues relate to livelihood strategies environmental threats and adaptation strategies and various aspects of river governance with individual authors treating questions of governance at different levels of refraction and in different registers

The result is a fresh and innovative collection of essays which taken together provide much needed new perspectives on some of the most important and seemingly intractable environmental and development issues in contemporary Asia

*Return to Winter* Douglas E. Schoen, Melik Kaylan, 2015-12-01 The United States is a nation in crisis While Washington's ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare we face an array of foreign policy crises for which we seem increasingly unprepared Among these none is more formidable than the unprecedented partnership developing between Russia and China suspicious neighbors for centuries and fellow Communist antagonists during the Cold War The two longtime foes have drawn increasingly close together because of a confluence of geostrategic political and economic interests all of which have a common theme of diminishing subverting or displacing American power While America's influence around the world recedes in its military and diplomatic power in its political leverage in its economic might and perhaps most dangerously in the power and appeal of its ideas Russia and China have seen their influence increase From their support for rogue regimes such as those in Iran North Korea and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft Moscow and Beijing are playing the game for keeps Meanwhile America pledged to leading from behind no longer does much leading at all In *Return to Winter* Douglas E Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian Chinese Axis and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance which may soon threaten the peace and security of the world
