Near Dark Stacey Abbott, 2020-10-29 First released in 1987 *Near Dark* is a vampire film set in the contemporary American Midwest that tells the story of Caleb a half vampire trying to decide whether to embrace his vampire nature or return to his human family The film an early work of the now established director Kathryn Bigelow skilfully mixes genre conventions combining gothic tropes with those of the Western road movie and film noir while also introducing elements of the outlaw romance genre Stacey Abbott s study of the film addresses it as a genre hybrid that also challenges conventions of the vampire film The vampires are morally ambiguous and undermine the class structures that have historically defined stories of the undead These are not aristocrats but instead they capture the allure and horror of the disenfranchised and the underclass As Abbott describes *Near Dark* was crucial in consolidating Bigelow s standing as a director of significance at an early point in her career not simply because of her visual art background but because of the way in which she would from *Near Dark* onward re envision other traditionally mainstream genres of filmmaking

Genome Editing and Biological Weapons Katherine Paris, 2022-12-15 This monograph introduces current genome editing technologies clustered regularly interspaced short palindromic repeat CRISPR CRISPR associated Cas systems transcription activator like effector nucleases TALENs and zinc finger nucleases ZFNs and provides an assessment of the risk of misuse of these technologies based on the following parameters accessibility ease of misuse magnitude of potential harm and imminence of potential misuse The findings from this assessment are applied to analyze and evaluate the threat posed by the intentional misuse of genome editing technologies to develop biological weapons Furthermore the book discusses the implications of misuse for different applications of genome editing such as making existing pathogens more dangerous modifying the human microbiome weaponizing gene drives engineering super soldiers and augmenting the general population to confer economic advantages Technologies that enable genome editing with programmable nucleases including CRISPR TALEN and ZFN allow for the precise genetic modification of organisms and cultured cells While these technologies are used for a variety of beneficial applications intelligence and defense experts have raised concerns that genome editing technologies especially CRISPR could be misused to develop new and improved biological weapons Furthermore experts worry that the number and type of actors who could potentially misuse genome editing is dramatically increasing given the democratization of biology which is allowing biology to become more accessible to everyone including nonexperts The book provides a comprehensive assessment of how feasible it is for users with different levels of knowledge and skill to acquire and then to apply the technologies to develop a biological weapon It also provides an assessment of governability and a tailored set of recommendations that address security concerns These recommendations are sensitive to the cost benefit trade off of

regulating genome editing technologies The book targets researchers as well as intelligence analysts defense and security personnel and policymakers

Tragedy in Aurora Tom Diaz, 2019-10-31 Tragedy in Aurora is about the 2012 murder of budding sports journalist Jessica Jessi Redfield Ghawi in a public mass shooting and the widening circle of pain it inflicted on her family friends police medical first responders and others The book is at the same time a deep examination of the causes and potential cures of the quintessential 21st century American sickness public mass shootings At the heart of that examination is an unpacking of America's deep polarization and political gridlock It addresses head on the question of why Why is American gun violence so different from other countries Why does nothing seem to change The Parkland kids inspired hope of change But the ultimate questions stubbornly remain what should what can and what will Americans do to reduce gun violence Tragedy in Aurora argues that the answer lies in a conscious cultural redefinition of American civic order Over recent decades America has defined a cultural new normal about guns and gun violence Americans express formalistic dismay after every public mass shooting But many accept gun violence as an inevitable even necessary and to some laudable part of what it means to be American Although Americans claim to be shocked with each new outrage so far they have failed to coalesce around an effective way to reduce gun death and injury The debate is bogged down in polarized and profoundly ideological political and cultural argument Meanwhile America continues to lead the globe in its pandemic levels of gun deaths and injuries Combined with the cynical learned helplessness of its politicians the result is gridlock and a growing roll of victims of carnage Is there a path out of this cultural and political gridlock Tragedy in Aurora argues that if America is to reduce gun violence it must expand the debate and confront the fundamental question of who are we Tom Diaz gives a new understanding of American culture and the potential for change offered by the growing number and ongoing organization of victims and survivors of gun violence Without conscious cultural change the book argues there is little prospect of effective laws or public policy to reduce gun violence in general and public mass shootings in particular

Cold War Photographic Diplomacy Darren Newbury, 2024-02-06 The emergence of newly independent African nations onto the world stage in the mid twentieth century precipitated a contest for influence among Cold War superpowers leading the United States to mount an international campaign of photographic diplomacy underpinned by a faith in the medium's capacity to cross cultural boundaries However the increasing global visibility of racial injustice undermined US claims that the nation had transcended colonial racism Drawing on extensive research in the archives of the United States Information Agency USIA and concentrating on the period from the mid 1950s through to the late 1960s Darren Newbury traces the role of photography in the United States appeal to Africa Newbury shows how photographing the political cultural and educational visits of Africans to the United States provided a space for the imagination of international cooperation and friendship how the United States presented the civil rights struggle as an example of democracy in action and how it pictured a world of integration and racial coexistence Cold War Photographic Diplomacy chronicles this careful scripting of images and picture stories and details the

cultural and pedagogical work that photography was expected to perform as it was inserted into the visual culture of African cities through magazines posters pamphlets and window displays Locating photography at the intersection of African decolonization racial conflict in the United States and the cultural Cold War this study will especially appeal to students and scholars of the history of photography American studies and Africana studies **Dark Pursuit** Brandilyn Collins,2009-02-10
