Interactive Collaborative Learning Michael E. Auer, David Guralnick, James Uhomoibhi, 2016-12-31 This book presents the proceedings of

the 19th International Conference on Interactive Collaborative Learning held 21-23 September 2016 at Clayton Hotel in Belfast UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning with a focus on collaborative learning. Today, the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

High Performance Computing and Grids in Action Lucio Grandinetti, 2008. Science Communication on the Internet María-José Luzón, Carmen Pérez-Llantada, 2019-12-04. This book examines the expanding world of genres on the Internet to understand issues of science communication today. The book explores how some traditional print genres have become digital, how some genres have evolved into new digital hybrids, and how and why new genres have emerged and are emerging in response to new rhetorical exigences and communicative demands. Because social actions are in constant change and ensuing from this, genres evolve faster than ever; it is important to gain insight into the interrelations between old genres and new genres and the processes underpinning the construction of new genre sets, chains, and assemblages for communicating scientific research to both expert and diversified audiences. In examining scientific genres on the Internet, this book seeks to illustrate the increasing diversification of genre ecologies and their underlying social disciplinary and individual agendas.
