One Giant Leap The Story Of Neil Armstrong:

One Giant Leap Don Brown,2001-09-24 As a young boy Neil Armstrong had a recurring dream in which he held his breath and floated high in the sky He spent his free time reading stacks of flying magazines building model airplanes and staring through a homemade telescope As a teenager Neil worked odd jobs to pay for flying lessons at a nearby airport He earned his student pilot s license on his sixteenth birthday But who was to know that this shy boy who also loved books and music would become the first person to set foot on the moon on July 20 1969 *Neil Armstrong* Tara Dixon-Engel, Mike Jackson,2008 A biography of former American astronaut Neil Armstrong who in 1969 became the first man to walk on the moon

One Giant Leap Leon Wagener,2024-06-04 Reveals a man of incredible bravery and extraordinary drive who overcame all obstacles in his path New York Times bestselling author Nelson DeMille On July 20 1969 the whole world stopped It was a day in which a man who grew up on a farm without electricity would announce One small step for man one giant leap for mankind In this the first ever biography of Neil Armstrong journalist Leon Wagener explores the man whose walk on the moon is still compared to humankind s progenitor s crawl out of the primordial ooze And whose retreat back to a farm in his native Ohio soon after the last ticker tape confetti fell has left him looked upon as a reclusive hermit ever since This is the true story of a national hero whose lifelong quest to walk on the moon truly mirrors our best selves an American who braved incredible danger daily over a long career finally achieving what seemed impossible and broke free of the Earth s surly bonds proving forever that man can reach for the stars and succeed Relying on hundreds of interviews with family and friends of the astronaut plus generous access to the NASA files Leon Wagener explores the life of one of America s true heroes in a book filled with extraordinary adventure and even greater achievement Neil Armstrong is a genuine American hero right up there in the pantheon with George Washington Daniel Boone and Charles Lindbergh a man whose character courage and brains helped shape his age Leon Wagener has captured the man inside the myth in this excellent biography New York Times bestselling author Stephen Coonts *One Giant Leap* Charles Fishman,2019-06-11 The remarkable story of the trailblazers and the ordinary Americans on the front lines of the epic mission to reach the moon President John F Kennedy astonished the world on May 25 1961 when he announced to Congress that the United States should land a man on the Moon by 1970 No group was more surprised than the scientists and engineers at NASA who suddenly had less than a decade to invent space travel When Kennedy announced that goal no one knew how to navigate to the Moon No one knew how to build a rocket big enough to reach the Moon or how to build a computer small enough and powerful enough to fly a spaceship there No one knew what the surface of the Moon was like or what astronauts could eat as they flew there On the day of Kennedy s historic speech America had a total of fifteen minutes of spaceflight experience with just five of those minutes outside the atmosphere Russian dogs had more time in space than U S astronauts Over the next decade more than 400 000 scientists engineers and factory workers would send 24 astronauts to the Moon Each hour of space flight would

require one million hours of work back on Earth to get America to the Moon on July 20 1969 More than fifty years later One Giant Leap is the sweeping definitive behind the scenes account of the furious race to complete one of mankind's greatest achievements It's a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today Charles Fishman introduces readers to the men and women who had to solve 10 000 problems before astronauts could reach the Moon From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the factories where dozens of women sewed spacesuits parachutes and even computer hardware by hand Fishman captures the exceptional feats of these ordinary Americans One Giant Leap is the captivating story of men and women charged with changing the world as we knew it their leaders their triumphs their near disasters all of which led to arguably the greatest success story and the greatest adventure story of the twentieth century

Neil Armstrong Kalyani Mookherji, 2020-01-01

Neil Armstrong Tara Dixon-Engel, Mike Jackson, 2008-08-01 Neil Armstrong was America's rocket man the first person to set foot on the moon and turn science fiction into amazing reality Award winning authors Tara Dixon Engel and Mike Jackson tell the fascinating story of how Armstrong went where no one had gone before leaving his mark on the powdery surface of another world Even at an age when other boys were just learning to drive Neil was training to reach the skies He went on to study aeronautical engineering win medals as a fighter pilot try out the X-15 experimental rocket plane and become one of the elite few chosen to be a NASA astronaut where he took the test pilot's credo of higher faster and farther to thrilling heights

One Giant Leap Robert Burleigh, 2009 On July 20 1969 as Americans sat glued to their televisions and radios Neil Armstrong and Buzz Aldrin did the seemingly impossible something humans had dreamed of doing for centuries They travelled 240 000 miles through space and set foot on the moon One small step for man one giant leap for mankind This achievement not only brought the moon within reach but now everything seemed possible If it could be imagined it could be done To commemorate the fortieth anniversary of this extraordinary moment in human history Robert Burleigh and Mike Wimmer who first paired up to create Flight have reunited to produce One Giant Leap a beautifully rendered tribute that will transport readers across space and onto the surface of the moon to experience every sensation just as Armstrong and Aldrin did
