Biro, David · □□, □□

One Hundred Days My Unexpected Journey From Doctor To Patient:

One Hundred Days David Biro, 2007-12-18 It is a situation we all fear and none of us can imagine a life threatening diagnosis But what if the person receiving the diagnosis young physically fit poised for a bright future is himself a doctor At thirty one David Biro has just completed his residency and joined his father's successful dermatology practice Struck with a rare blood disease that eventually necessitates a bone marrow transplant Biro relates with honesty and courage the story of his most transforming journey He is forthright about the advantages that his status as a physician may have afforded him and yet no such advantage can protect him from the anxiety and doubt brought on by his debilitating therapies The pressures that Biro's wild one hundred days brings to bear on his heretofore well established identity as a caregiver are enormous as is the power of this riveting story of survival *Handbook of Medical Sociology, Sixth Edition* Chloe E. Bird, Peter Conrad, Allen M. Fremont, Stefan Timmermans, 2010-11-29

The latest version of an important academic resource published about once a decade since 1963 **Centers for Ending** Seymour B. Sarason, 2011-08-04 As people live longer and health care costs continue to rise and fewer doctors choose to specialize in geriatrics how prepared is the United States to care for its sick and elderly According to veteran psychologist Seymour Sarason's eloquent and compelling new book the answer is inadequately at best And rarely discussed among the grim statistics is the psychosocial price paid by nursing home patients from loneliness and isolation to depression and dependency In *Centers for Ending* Dr Sarason uses his firsthand experience as both practitioner and patient in senior facilities to reveal wide ranging professional and moral issues affecting this seemingly familiar terrain Insensitive medical personnel poorly trained nurses and aides indifferent administrators and a prevailing culture content with treating bodies instead of human beings are identified as contributing factors Drawing on America's rich history of large scale solutions to social problems Dr Sarason offers penetrating insights and bold suggestions in such areas as The widening care gap between haves and have nots Why professional caregivers fail to understand patients The nursing home resident as immigrant Why previous reform efforts have not worked The need for a Presidential commission for the elderly The scenario if conditions are allowed to remain as they are or worsen This concise volume is essential reading for researchers graduate students professionals practitioners and policy makers across such fields as geriatric medicine health psychology social work public health and public policy *Centers for Ending* is a clarion call to be ignored at great cost to our elders and ourselves *Relationship Competence for Healthcare Management* J. Landau, E. Borgonovi, 2007-12-03

Healthcare organizations depend on managers to build effective peer relationships to manage complex patient needs Today top management is fighting the many headed monster Hydra from Greek Mythology The organization is steeped in conflict between peers But as soon as one problem is resolved two more have grown in its place These appear to be personal conflicts but instead follow patterns of dysfunction This book provides the conceptual frameworks for identifying these and for developing peer to peer relationship competence in the healthcare organization **The Woman Who Decided to Die**

Ronald Munson, 2009 *Advances in medical technology force us to struggle with new and often gut wrenching decisions How do we know when someone is dead and not just in a coma Should a convicted felon qualify for a new heart* In *The Woman Who Decided to Die* novelist and medical ethicist Ronald Munson takes readers to the very edges of medicine where treatments fail and where people must cope with helplessness mortality and doubt Using personal narratives that place us right next to doctors patients and care givers as they make decisions Munson explores ten riveting case based stories told with a writer's eye for illuminating detail These include a young woman with terminal leukemia more worried about her family than herself a stepfather asked to donate a liver segment to his stepson a student who believes she is being controlled by invisible Agents and a psychiatrist patient who prizes his autonomy until the end Raising fundamental questions about human relationships this is an essential book about the very nature of life and death

American Men and Women in Medicine, Applied Sciences and Engineering with Roots in Czechoslovakia Miloslav Rechcigl Jr., 2021-02-17 No comprehensive study has been undertaken about the American learned men and women with Czechoslovak roots The aim of this work is to correct this glaring deficiency with the focus on men and women in medicine applied sciences and engineering It covers immigration from the period of mass migration and beyond irrespective whether they were born in their European ancestral homes or whether they have descended from them This compendium clearly demonstrates the Czech and Slovak immigrants including Bohemian Jews have brought to the New World in these areas their talents their ingenuity the technical skills their scientific knowhow as well as their humanistic and spiritual upbringing reflecting upon the richness of their culture and traditions developed throughout centuries in their ancestral home This accounts for their remarkable success and achievements of these settlers in the New World transcending through their descendants as this publication demonstrates The monograph has been organized into sections by subject areas i.e. Medicine Allied Health Sciences and Social Services Agricultural and Food Science Earth and Environmental Sciences and Engineering Each individual entry is usually accompanied with literature and additional biographical sources for readers who wish to pursue a deeper study The selection of individuals has been strictly based on geographical vantage without regards to their native language or ethnical background Some of the entries may surprise you because their Czech or Slovak ancestry has not been generally known What is conspicuous is a large percentage of listed individuals being Jewish which is a reflection of high level of education and intellect of Bohemian Jews A prodigious number of accomplished women in this study is also astounding considering that in the 19th century they rarely had careers and most professions refused entry to them

Mindful Crafts as Therapy Cynthia Evetts, Suzanne Peloquin, 2017-04-28 Arts and crafts were one of the very first therapies employed by occupational therapists Today crafts are still employed as effective interventions for clients with mental health disorders physical dysfunctions cognitive issues and sensory concerns in hospitals outpatient clinics veterans centers schools skilled nursing facilities or community settings Step by step the authors show you how to use a wide range of novel and highly engaging

crafts They explain how to connect the key tasks associated with an activity to functional outcomes and how to modify them to meet the specific needs of individual patients They also address the issues of documentation and reimbursement

Communicating Pain Stephanie de Montalk, 2018-10-26 Combining critical research with memoir essay poetry and creative biography this insightful volume sensitively explores the lived experience of chronic pain Confronting the language of pain and the paradox of writing about personal pain *Communicating Pain* is a personal response to the avoidance dismissal and isolation experienced by the author after developing intractable pelvic pain in 2003 The volume focuses on pain s infamous resistance to verbal expression the sense of exile experienced by sufferers and the under recognised distinction between acute and chronic pain In doing so it creates a platform upon which scholarly imaginative and emotional quotients round out pain as the sum of physical actualities mental challenges and psychosocial interactions Additionally this work creates a dialogue between medicine and literature Considering the works of writers such as Harriet Martineau Alphonse Daudet and Aleksander Wat it enables a multi genre narrative heightened by poetry fictional storytelling and life writing Coupled with academic rigour this insightful monograph constitutes a persuasive and unique exploration of pain and the communication of suffering It will appeal to students and researchers interested in fields such as Medical Humanities

Autobiography Studies and Sociology of Health and Illness *Eros and Illness* David B. Morris, 2017-02-27 When we or our loved ones fall ill our world is thrown into disarray our routines are interrupted our beliefs shaken David Morris offers an unconventional deeply human exploration of what it means to live with and live through disease He shows how desire emotions dreams stories romance even eroticism plays a crucial part in illness

Dimensions of Pain Lisa Folkmarson Käll, 2012-11-27 Pain research is still dominated by biomedical perspectives and the need to articulate pain in ways other than those offered by evidence based medical models is pressing Examining closely subjective experiences of pain this book explores the way in which pain is situated communicated and formed in a larger cultural and social context *Dimensions of Pain* explores the lived experience of pain and questions of identity and pain from a range of different disciplinary perspectives within the humanities and social sciences Discussing the acuity and temporality of pain its isolating impact the embodied expression of pain pain and sexuality gender and ethnicity it also includes a cluster of three chapters discusses the phenomenon and experience of labour pains This volume revitalizes the study of pain offering productive ways of carefully thinking through its different aspects and exploring the positive and enriching side of world forming pain as well as its limiting aspects It will be of interest to academics and students interested in pain from a range of backgrounds including philosophy sociology nursing midwifery medicine and gender studies

Pain and Emotion in Modern History Robert Gregory Boddice, 2014-07-01 Drawing on the expertise of historical literary and philosophical scholarship practicing physicians and the medical humanities this is a true interdisciplinary collaboration styled as a history It explores pain at the intersection of the living suffering body and the discursive cultural webs that entangle it in its specific moment A

Caregiver's Story Ann Brandt, 2007-12 One caregiver's chronicles of the journey she took with her husband as they battled his brain tumor Beautifully written Naomi Berkowitz Executive Director American Brain Tumor Association Just one year after battling a little known illness called Guillain Barre Ann Brandt faced another challenge when her husband was diagnosed with a rare debilitating and aggressive form of brain cancer Lacking in resources or formal instruction Brandt relied heavily on her faith and memories of how her husband cared for her during her illness to navigate them both through the difficult times ahead In *A Caregiver's Story* Brandt approaches the complexities of caregiving in a personal and empowering way that offers sound spiritual as well as practical advice to make caregiving more manageable She includes invaluable up to date information about Working with doctors and getting a second opinion Choosing a treatment plan Maintaining your life and sanity while offering good care Finding support groups and conferences Dealing with emotional and financial issues Making a connection between prayer and healing Brandt offers a loving encouraging environment to help steer you through difficult times and delivers much needed support and comfort For caregivers family members and friends alike *A Caregiver's Story* provides the support you deserve

Hospital Land USA Wendy Simonds, 2016-11-03 In *Hospital Land USA* Wendy Simonds analyzes the wide reaching powers of medicalization the dynamic processes by which medical authorities institutions and ideologies impact our everyday experiences culture and social life Simonds documents her own *Hospital Land* adventures and draws on a wide range of U S cultural representations from memoirs to medical mail from hospital signs to disaster movies in order to urge critical thinking about conventional notions of care health embodiment identity suffering and mortality This book is intended for general readers medical practitioners undergraduate and graduate students in courses on medical sociology medicine medical ethics nursing public health carework visual culture cultural studies and gerontology

Everyday Rituals Pearl Katz, 2024-08-06 When we are in painfully difficult or confusing life situations especially amidst ever uncertain times our minds grapple for structure a funeral ceremony definitively lays the dead to rest the exaggerated choreography of a surgical room confirms its sterility and a daily schedule gives prisoners a sense of normalcy These practices these rituals give us peace Though it might seem contradictory ordered rituals actually bring us freedom creativity and mental well being Rituals aren't a thing of history or belonging to elaborate ceremonies and they aren't even confined to the most painful or confusing of times Rituals can be at a family dinner table or in a morning bathroom routine In *Everyday Rituals* Pearl Katz shows us just how transformative rituals are no matter what kind Unlike other titles on the subject in the self help genre or in anthropological reportage Katz applies her years of fieldwork and psychiatric study to tangible everyday American life She writes a thoroughly persuasive argument using poignant case studies to truly inspire readers Specific hormones flow and brain paths open when artists follow their creative regimen and mental health increases in patients under hospital directive in contrast young people suffer stress in unbounded undergraduate hookup culture And after the coronavirus ripped many rituals from American life the ill effects of a life

without routine burn bright It is in the ordinary that Katz discovers unlimited potential mundane routine actually sparks incredible imagination With scientific evidence case studies personal narrative and guiding wisdom Katz enlightens us as to how and why we can feel true freedom

Illness as Narrative Ann Jurečič, 2012-03-12 For most of literary history personal confessions about illness were considered too intimate to share publicly By the mid twentieth century however a series of events set the stage for the emergence of the illness narrative The increase of chronic disease the transformation of medicine into big business the women's health movement the AIDS HIV pandemic the advent of inexpensive paperbacks and the rise of self publishing all contributed to the proliferation of narratives about encounters with medicine and mortality While the illness narrative is now a staple of the publishing industry the genre itself has posed a problem for literary studies What is the role of criticism in relation to personal accounts of suffering Can these narratives be judged on aesthetic grounds Are they a collective expression of the lost intimacy of the patient doctor relationship Is their function thus instrumental to elicit the reader's empathy To answer these questions Ann Jurecic turns to major works on pain and suffering by Susan Sontag Elaine Scarry and Eve Sedgwick and reads these alongside illness narratives by Jean Dominique Bauby Reynolds Price and Anne Fadiman among others In the process she defines the subgenres of risk and pain narratives and explores a range of critical responses guided alternately by narrative empathy the hermeneutics of suspicion and the practice of reparative reading Illness as Narrative seeks to draw wider attention to this form of life writing and to argue for new approaches to both literary criticism and teaching narrative Jurecic calls for a practice that is both compassionate and critical She asks that we consider why writers compose stories of illness how readers receive them and how both use these narratives to make meaning of human fragility and mortality
