Wild Life Irus Braverman,2015-04-22 Wild Life documents a nuanced understanding of the wild versus captive divide in species conservation It also documents the emerging understanding that all forms of wild nature both in situ on site and ex situ in captivity may need to be managed in perpetuity Providing a unique window into the high stakes world of nature conservation Irus Braverman describes the heroic efforts by conservationists to save wild life Yet in the shadows of such dedication and persistence in saving the life of species Wild Life also finds sacrifice and death Such life and death stories outline the modern struggle to define what conservation should look like at a time when the long established definitions of nature have collapsed Wild Life begins with the plight of a tiny endangered snail and ends with the rehabilitation of an entire island Interwoven between its pages are stories about golden lion tamarins in Brazil black footed ferrets in the American Plains Sumatran rhinos in Indonesia Tasmanian devils in Australia and many more creatures both human and nonhuman Braverman draws on interviews with more than one hundred and twenty conservation biologists zoologists zoo professionals government officials and wildlife managers to explore the various perspectives on in situ and ex situ conservation and the blurring of the lines between them

survived in the wild if it was not for the White Lion Foundation who rescued him offering him a sanctuary and lifetime care in South Africa His story as the most special rhino in the world will appeal to children with its humorous tone as well as promoting the charity's ethos of integrity and kindness Munu's story raises the profile of the charity's ambitious vision for the future of global wildlife conservation at the centre of which are children today the conservationists of the future All proceeds from the sale of this book will go to the White Lion Foundation's Munu Rhino Appeal to establish a Rhino Rehabilitation Centre and Nursery for young orphaned calves

Transport Thane Maynard,1993 Describes the status of the Sumatran rhinoceros as one of the most endangered animals in the world and relates the story of Bagus a specimen who was captured in the wild and sent to the Cincinnati Zoo as part of a new breeding program to save the species from extinction

Emi and the Rhino Scientist Mary Kay Carson,2010-10-25 Terri Roth trudges through the thick dark Sumatran jungle She's looking for a rhinoceros that's been seen in the area It's a rare Sumatran rhino the world's smallest rhino and one of the most endangered mammals on the planet Suddenly she spots a young female rhino through the tangle of ferns and trees The stocky animal is covered in reddish hair and her snout sports two stubby horns The rhino walks right up to Terri The scientist slowly reaches out her hand and touches the rhino's big nose The wild rhino's curiosity and friendliness remind Terri of Emi the female Sumatran rhino that lives at the Cincinnati Zoo where Terri works Terri is working with Emi to help save Sumatran rhinos from extinction one calf at a time

Douwlinea Grace Borgeson,2012 There are two kinds of stories in the world those that have sad endings and those that have happy endings Douwlinea's story began with great sadness when she lost her mother to poachers but it has a happy ending From the time Douwlinea was rescued loving people and even animals have stepped forward to care for her In Africa where Douwlinea lives there were once over 100 000 of these smart magnificent animals Now there are less than 20 000 on the entire continent and one is poached every day in the Kruger Park alone Rhino are killed illegally for their horn because people believe it has power in traditional medicine and rituals The cost for an ounce of horn can be as high as five times the price of gold Until people everywhere understand the plight of the rhino each rhino is in danger Douwlinea's journey to safety takes her to the Hoedspruit Endangered Species Centre in South Africa where in addition to the dedicated staff a lamb cares for her When she is old enough to live on her own in the wild she moves to the farm of Annales and Johan But Douwlinea has spent so much time with loving humans that she acts more like an enormous house pet than a wild animal This tender story shows how each animal and human who has been part of her life has helped her first to survive then to thrive and at last to live among her own kind as she was born to do It highlights the bonds between people and animals and reminds us of the importance of being good stewards of the animals who share the planet with us

Account Of The Great Indian One Horned Rhinoceros Its Past History And Present Status Generic Characteristics
Temperament Behaviour And Habits As Well As Its Position In The Scheme Of Nature *The Crash of Rhinos* Ray
Dearlove, 2020-12-10 What will future generations think of us when they look back and rhinos are only in a picture book Dr
Jane Goodall DBE The Crash of Rhinos is a play on words A crash is the collective noun for rhinos but it also describes the
carnage wrought by poachers in Africa who have slaughtered more than 10 000 rhinos three a day in the past decade to feed
the seemingly insatiable demand for rhino horn in some Asian countries The author spent his first forty years in South Africa
and during this time developed a love of wildlife After emigrating to Australia Ray retained strong ties with African wildlife
and conservation In 2014 a friend suggested that he investigate the feasibility of bringing rhinos to Australia to act as an
insurance policy in the event of the possibility of the extinction of rhino species in the wild The Australian Rhino Project was
born The Crash of Rhinos traces the origin of the Project to the present with the team still working to relocate rhinos to
Australia It is an insightful frustrating humorous and humbling story that will make you laugh cry and tear your hair out in
exasperation In Ray's own words There was extreme joy and there was acute heartache This fascinating story demonstrates
what can be achieved by one person with the passion resilience and dogged persistence to meet challenges obstacles and the
glacial pace of governments even in the face of a crisis The proceeds of this book will be directed to the South African all
female anti poaching group The Black Mambas
