Media Materialities Iain A. Taylor, Dr. Oliver Carter, 2023-11-28 Provides new perspectives on the increasingly complex relationships between media forms and formats, materiality and meaning. Drawing on a range of qualitative methodologies, our consideration of the materiality of media is structured around three overarching concepts: form, the physical qualities of objects and the meanings which extend from them; format, objects considered in relation to the protocols which govern their use and the meanings and practices which stem from them; and ephemeral meaning, the ways in which media artefacts are captured, transformed and redefined through changing social, cultural and technological values. Each section includes empirical chapters which provide expansive discussions of perspectives on media and materiality. It considers a range of media artefacts such as 8mm film, board games, maps, videogames, cassette tapes, transistor radios and Twitter, amongst others. These are punctuated with a number of short, less formal, often personal, takes exploring the meanings of media in context. We seek to consider the materialities which emerge across the broad and variegated range of the term's use and to create spaces for conversation and debate about the implications that this plurality of material meanings might have for the study of media culture and society.

Displacing the Anxieties of Our World Ildikó Limpár, 2017-01-06 Monster studies, dystopian literature and film studies have become central to research on the now proliferating works that give voice to culture-specific anxieties. This new development in scholarship reinforces the notion that the genres of fantasy and science fiction call for interpretations that see their spaces of imagination as reflections of reality, not as spaces invented merely to escape the real world. In this vein, *Displacing the Anxieties of Our World* discusses fictive spaces of literature, film and video gaming. The eleven essays that follow the Introduction are grouped into four parts: I Imagined Journeys through History, Gaming and Travel; II Political Anxieties and Fear of Dominance; III The Space of Fantastic Science and Scholarship; and IV Spaces Natural and Spaces Artificial. The studies produce a dialogue among disciplinary fields that bridges the imagined space between sixteenth-century utopia and twenty-first-century dystopia, with analyses penetrating fictitious spaces beyond utopian and dystopian spheres. This volume argues consequently that the space of imagination that conjures up versions of the world's frustrations also offers a virtual battleground and the possibility of triumph coming from a valuable gain of cognizance once we perceive the correspondence between spaces of the fantastic and those of the mundane.
