Making Mental Health Elizabeth Roberts-Pedersen, 2024-08-07 *Making Mental Health* historicises mental health by examining the concept from the madness of the late nineteenth century to the changing ideas about its contemporary concerns and status. It argues that a critical approach to the history of psychiatry and mental health shows them to constitute a dual clinical political project that gathered pace over the course of the twentieth century and continues to resonate in the present. Drawing on scholarship across several areas of historical inquiry as well as historical and contemporary clinical literature, the book uses a thematic approach to highlight decisive moments that demonstrate the stakes of this engagement in Anglo American contexts. By tracing the unfinished history of institutions, the search for cures for psychiatric distress, the growing interest of the nation state in mental health, the history of attempts to globalise psychiatry, the controversies over the politics of diagnostic categories that erupted in the 1960s and 1970s, and the history of theorising about the relationship between the psyche and the market, the book offers a comprehensive account of the evolution of mental health into a commonplace concern. Addressing key questions in the fields of history, medical humanities, and the social sciences, as well as in the psychiatry disciplines themselves, the book is an essential contribution to an ongoing conversation about mental distress and its meanings. Mental Health Ethics Phil Barker, 2010-11-09 *Mental Health Ethics* provides an overview of traditional and contemporary ethical perspectives and critically examines a range of ethical and moral challenges present in contemporary psychiatric mental health services.

Rethinking Psychological Anthropology Philip K. Bock, Stephen C. Leavitt, 2018-11-02 After over three decades of continual publication in multiple editions, the Third Edition of *Rethinking Psychological Anthropology* now with coauthor Stephen Leavitt describes the latest interests, concepts, and approaches in the field, with the inclusion of four new chapters and updates to earlier topics. The premise of the previous editions remains that all anthropology is psychological and that the interplay between anthropological methods and the psychological theories existing in different times is dialectical. Psychological anthropologists have grappled with changing trends in both disciplines, including psychoanalytic, holistic, cognitive, interpretive, and developmental approaches. It is important to appreciate these currents of thought to understand the state of the field today. This text is thus a guide to that history along with a critique that may lead to a new synthesis. It is an ideal choice for courses in psychological anthropology, cross-cultural psychology, and the history of anthropology.

Decolonizing Global Mental Health China Mills, 2014-04-11 *Decolonizing Global Mental Health* is a book that maps a strange irony. The World Health Organization (WHO) and the Movement for Global Mental Health are calling to scale up access to psychological and psychiatric treatments globally, particularly within the global South. Simultaneously, in the global North, psychiatry and its often chemical treatments are coming under increased criticism from

both those who take the medication and those in the position to prescribe it The book argues that it is imperative to explore what counts as evidence within Global Mental Health and seeks to de familiarize current Western conceptions of psychology and psychiatry using postcolonial theory It leads us to wonder whether we should call for equality in global access to psychiatry whether everyone should have the right to a psychotropic citizenship and whether mental health can or should be global As such it is ideal reading for undergraduate and postgraduate students as well as researchers in the fields of critical psychology and psychiatry social and health psychology cultural studies public health and social work *The Palgrave Handbook of Child Mental Health* Jessica Nina Lester,Michelle O'Reilly,2015-12-17 A landmark publication in the field this state of the art reference work includes contributions from leading thinkers across a range of disciplines on topics including ADHD autism depression eating disorders and trauma It is an essential resource for all those involved or interested in child mental health Critical Learning in Digital Networks Petar Jandrić,Damir Boras,2015-02-21 This ambitious multidisciplinary volume assembles diverse critical theory approaches to the current and future states of networked learning Expert contributors expand upon the existing literature by analyzing the ethical aspects of networked learning and the ongoing need for more open inclusive and socially engaged educational practice Chapters explore in depth evolving concepts of real and virtual the processes of learning in against and beyond the internet and the role of critical pedagogy in improving social conditions In all coverage is both realistic and positive about the potential of digital technologies in higher education as well as social and academic challenges on the horizon Included among the topics Counting on use of technology to enhance learning Decentralized networked learning through online pre publication The reality of the online teacher Moving from urban to virtual spaces and back The project of a virtual emancipatory pedagogy Using information technologies in the service of humanity It is no longer a question of Can technology enhance learning it s a given that it does Critical Learning in Digital Networks offers education researchers teacher educators instructional technologists and instructional designers tools and methods for strengthening this increasingly vital interconnection *The Future of Psychological Therapy* John Lees,2016-01-29 The psychotherapy and counselling profession has recently experienced far reaching changes because of the development of evidence based medicine and managed care systems The Future of Psychological Therapy brings together leading counsellors psychotherapists psychological therapists and managers to address how these changes are beginning to affect all aspects of the psychotherapy and counselling profession It evaluates the impact of these developments shows how they affect practitioner s capacity to care anticipates future developments and offers a coherent and viable approach to research and practice The book draws on psychotherapeutic theory to develop insight into managed care and engages in qualitative microphenonena research into the complexities of clinical practice drawing on cutting edge developments It aims to establish a balanced counselling and psychotherapy profession by opening up a debate about these far reaching developments which threaten the profession challenging the rhetoric of accountability audit transparency and measurement
