The Ethics of National Security

Intelligence Institutions Adam Henschke,Seumas Miller,Andrew Alexandra,Patrick F. Walsh,Roger Bradbury,2024-03-19

This book explores the ethics of national security intelligence institutions operating in contemporary liberal democracies. Intelligence collection by agencies such as the CIA, MI6, and Mossad involves practices that are apparently inconsistent with the principles of ordinary morality, practices such as lying, spying, manipulation, and covert action. However, in the defence of national security, such practices may not only be morally permissible but may also under some circumstances be morally obligatory. One approach to the ethics of national security intelligence activity has been to draw from the just war tradition, so-called just intelligence theory. This book identifies significant limitations of this approach and offers a new institutionally based teleological normative framework. In doing so, it revises some familiar principles designed for application to kinetic wars, such as necessity and proportionality, and invokes some additional ones, such as reciprocity and trust. It goes on to explore the applications of this framework and a revised set of principles for national security intelligence institutions and practices in contemporary and emerging political and technological settings. This book will be of much interest to students of intelligence studies, ethics, security studies, and International Relations.

Disconnected Carrie James, 2016-09-02. How young people think about the moral and ethical dilemmas they encounter when they share and use online content and participate in online communities. Fresh from a party, a teen posts a photo on Facebook of a friend drinking a beer. A college student repurposes an article from Wikipedia for

a paper A group of players in a multiplayer online game routinely cheat new players by selling them worthless virtual accessories for high prices In *Disconnected* Carrie James examines how young people and the adults in their lives think about these sorts of online dilemmas describing ethical blind spots and disconnects Drawing on extensive interviews with young people between the ages of 10 and 25 James describes the nature of their thinking about privacy property and participation online She identifies three ways that young people approach online activities A teen might practice self focused thinking concerned mostly about consequences for herself moral thinking concerned about the consequences for people he knows or ethical thinking concerned about unknown individuals and larger communities James finds among other things that youth are often blind to moral or ethical concerns about privacy that attitudes toward property range from what s theirs is theirs to free for all that hostile speech can be met with a belief that online content is just a joke and that adults who are consulted about such dilemmas often emphasize personal safety issues over online ethics and citizenship Considering ways to address the digital ethics gap James offers a vision of conscientious connectivity which involves ethical thinking skills but perhaps more important is marked by sensitivity to the dilemmas posed by online life a motivation to wrestle with them and a sense of moral agency that supports socially positive online actions
