

The book cover features a stylized illustration. On the left, a large, dark tree with a thick trunk and a wide, flat canopy stands on a brown, rocky outcrop. A small figure in a blue robe is seated on the edge of this outcrop, looking out over a vast, hazy landscape. The background is a light blue-grey gradient, suggesting a distant horizon or a body of water. The title 'OUR ONLY WORLD' is printed in large, black, serif capital letters across the upper right portion of the cover.

Schnelles Lesen, langsames Lesen Maryanne Wolf, 2019-04-22 Was wir verlieren wenn wir keine gedruckten Bücher mehr lesen Bücherlesen ist kein exzentrisches Hobby Smartphones E Reader Tablets sind aus unserem Leben nicht mehr wegzudenken und es hat keinen Sinn sich die Zeit ohne digitale Medien zurckzuwenden Maryanne Wolf macht jedoch deutlich dass wir zwar nicht der völligen digitalen Demenz anheimfallen wenn wir vor allem über digitale Kanäle Informationen und Unterhaltung konsumieren dass wir aber enorm viel verlieren wenn wir daneben nicht von klein auf lernen gedruckte Bücher zu lesen Unser Gehirn reagiert anders verarbeitet anders und bildet andere Strukturen aus als beim digitalen Lesen Für unsere offene demokratische Gesellschaft so wichtige menschliche Fähigkeiten wie das Erfassen Analysieren Durchdenken komplexer Zusammenhänge sowie Empathie drohen zu verkümmern Kurz gesagt Erst das Lesen gedruckter Bücher macht uns zu ganzen Menschen

Our Future in Nature: Edmund Barrow, 2019-05-21 Who has not felt a sense of awe silence stillness and presence in an ancient woodland or forest or in front of a sacred tree Humankind has held trees and woodlands in awe and reverence since the dawn of time We depend on nature for the air we breathe the water we drink and the services nature provides This book is about the importance of sacred trees and groves in our stress filled and increasingly urban world Note that over 50 percent of the world is urban Sacred trees and sacred groves transcend race color and creed They are found all over our fragile planet Where there is a tree there is a sacred tree This book will appeal to religious and spiritual traditions as well as to conservation and environmental movements It will offer its reader means to take better care of our only home planet Earth Often undervalued unrecognized or disrespected sacred trees and groves are conserved against mind boggling pressures For example there is a sacred fig tree between two shops in one of the main streets in Hanoi Vietnam There is also a one hectare sacred grove in the center of Kumasi a city of 2.5 million people in Ghana the over 150 000 sacred groves in India and the sacred hill forests of every village in Yunnan South China Sacred trees and groves often conserve unique biodiversity which can help create or recreate connectivity in the landscape As such sacred trees and groves may be relic survivors of bygone ages and are an important resource for restoring degraded natural landscapes This book offers ways for those involved with religion and spirituality and for those working with conservation and land use to jointly engage in repairing the damage we have done to Earth

The Twenty-first Century African American Novel and the Critique of Whiteness in Everyday Life E. Lâle Demirtürk, 2016-05-25 This book examines the post 9/11 African American novels developing a new critical discourse on everyday discursive practices of whiteness The critique of everyday life in the racial context of post 9/11 American society is important in considering diverse forms of the lived experiences and subjectivities of black people in the novels They help us see that African American representations of the city have political significance in that the neo urban novel explores the possibility of a black dialogic communication to build a transformative social change Since the real power of Whiteness lies in its discursive power the book reveals the urgency to understand not only how

whiteness works in everyday life in American society But it also explores how to cultivate new possibilities of configuring and performing Blackness differently as a response to the post 9 11 configurations of the culture of fear to produce new ways of interactional social relations that can eventually open up the space of critical awareness for white people to work against rather than reinforce discursive practices of White supremacy in everyday life This book explores how the multiple subjectivities and transformative acts of blackness can offer ways of subverting the discursive power of the white embodied practices What defines post 9 11 America as a nation that is consumed by the fear of racialized terrorists is its roots in the fear of uncontrollable Blackness as excess and ominous threat in the domestic terrain through which the ideology of White supremacy has constructed for governing through Whiteness African American urban novels published in the twenty first century respond to the discursive power of normative Whiteness that regulates black bodies selves and lives This book demonstrates how black people contest white dominant social spaces as sites of black criminality and exclusion in an attempt to re signify them as the sites of black transformative change through personal and grassroots activism through their performativity of Blackness as an agential identity formation in their interpersonal urban social encounters with white people Hence the vulnerable spaces of Whiteness in interracial urban encounters as it pervasively addresses those moments of transformative change enacted by Black characters in the face of the discursive practices of whiteness in the everyday life These novels celebrate multifarious representations of black individuals who are capable of using their agency to subvert White discursive power in finding ways in their personal and grassroots activism to transform the culture of fear that locates Blackness as such in an attempt to make a difference in the American society at large

Ethics and Economic Theory Khalid Mir, 2018-10-09 This book takes a multi disciplinary critique of economics first principles the fundamental and inter related structuring assumptions that underlie the neo classical paradigm These assumptions that economic agents are rational self interested individuals continue to influence the teaching of economics research agendas and policy analyses The book argues that both the theoretical understanding of the economy and the actual working of real world market economies diminish the scope for thinking about the relation between ethics economics and the economy It highlights how market economies may crowd out ethical behavior and our evaluation of them elides ethical reflection The book calls for a more pluralistic and richer approach to economic theory one that allows ample room for ethical considerations It provides insight into understanding human motivations and human flourishing and how a good economy requires reflection on the ethical relations between the self world and time

Ecotheology and Nonhuman Ethics in Society Melissa Brotton, 2016-11-30 This book promotes Christian ecology and animal ethics from the perspectives of the Bible science and the Judeo Christian tradition In an age of climate change how do we protect species and individual animals Does it matter how we treat bugs How does understanding the Trinity and Christ s self emptying nature help us to be more responsible earth caretakers What do Christian ethics have to do with hunting How do the Foxfire books of Southern Appalachia help us to love a place Does ecology need a place at the

pulpit and in hymns How do Catholic approaches past and present help us appreciate and respond to the created world Finally how does Jesus respond to humans nonhumans and environmental concerns in the Gospel of Mark Education Marcelo Suárez-Orozco, Carola Suárez-Orozco, 2022-07-05 In an age of catastrophes unchecked climate change extreme poverty forced migrations war and terror all compounded by the COVID 19 pandemic how can schooling be reengineered and education reimaged This book calls for a new global approach to education that responds to these overlapping crises in order to enrich and enhance the lives of children everywhere Marcelo Su rez Orozco and Carola Su rez Orozco convene scholars and practitioners from a range of disciplines including anthropology neuroscience demography psychology child development sociology and economics who offer incisive essays on the global state of education Contributors consider how educational policy and practice can foster social inclusion and improve outcomes for all children They emphasize the centrality of education to social and environmental justice as well as the philosophical foundations of education and its centrality to human flourishing personal dignity and sustainable development Chapters examine topics such as the neuroscience of education the uses of technology to engage children who are not reached by traditional schooling education for climate change the education of immigrants refugees and the forcibly displaced and how to address and mitigate the effects of inequality and xenophobia in the classroom Global and interdisciplinary Education speaks directly to urgent contemporary challenges Contributors include Stefania Giannini the director of education for UNESCO development economist Jeffrey Sachs cognitive psychologist Howard Gardner Carla Rinaldi president of the Reggio Children Foundation and academics from leading global universities The book features a foreword by Pope Francis **The Meaning of Trump** Brian Francis Culkin, 2018-06-29 The election of Donald Trump was a shattering moment to the political sensibilities of America immediately sending the country into a frenzy of commentary critique and a never ending media coverage that has bordered on the absurd But the question still remains what does it all mean The Meaning of Trump is an ideological critique that sees the election of Donald Trump as a completely natural progression to the general trajectory of digitized technologies neoliberalism and a new breed of financialized capitalism destructive global forces that know no party affiliation or national boundary Although Donald Trump is undoubtedly the symptom that has exploded to the surface after nearly four decades of failed policies and broken promises by both Republicans and Democrats alike his election can also be seen as an existential fork in the road for both the United States and even humanity itself What path is taken still remains to be seen Pedagogy of Vulnerability Edward J. Brantmeier, Maria K. McKenna, 2020-03-01 The purpose of this text is to elicit discussion reflection and action specific to pedagogy within education especially higher education and circles of experiential learning community organizing conflict resolution and youth empowerment work Vulnerability itself is not a new term within education however the pedagogical imperatives of vulnerability are both undertheorized in educational discourse and underexplored in practice This work builds on that of Edward Brantmeier in Re Envisioning Higher Education Embodied Pathways to Wisdom and

Transformation Lin Oxford advocating and envisioning a more holistic healthy forward thinking model of teaching and learning How do we create cultures of engaged inquiry framed in vulnerability where educators and students are compelled to ask questions just beyond their grasp How can we all be better equipped to ask and answer big beautiful bold even uncomfortable questions that fuel the heart of inquiry and perhaps just maybe lead to a more peaceful and just world A collection of reflections case studies and research focused on the pedagogy of vulnerability is a starting point for this work The book itself is meant to be an example of pedagogical vulnerability wherein the authors work to explicate the most intimate and delicate aspects of the varied pedagogical journeys understandings rooted in vulnerability and those of their students colleagues clients even adversaries It is a work that holds space *The School Garden Curriculum* Kaci Rae Christopher, 2019-04-23 Sow the seeds of science and wonder and inspire the next generation of Earth stewards The School Garden Curriculum offers a unique and comprehensive framework enabling students to grow their knowledge throughout the school year and build on it from kindergarten to eighth grade From seasonal garden activities to inquiry projects and science skill building children will develop organic gardening solutions a positive land ethic systems thinking and instincts for ecological stewardship The world needs young people to grow into strong scientifically literate environmental stewards Learning gardens are great places to build this knowledge yet until now there has been a lack of a multi grade curriculum for school wide teaching aimed at fostering a connection with the Earth The book offers A complete K 8 school wide framework Over 200 engaging weekly lesson plans ready to share Place based activities immersive learning and hands on activities Integration of science critical thinking permaculture and life skills Links to Next Generation Science Standards Further resources and information sources A model and guide for all educators The School Garden Curriculum is the complete package for any school wishing to use ecosystem perspectives science and permaculture to connect children to positive land ethics personal responsibility and wonder while building vital lifelong skills AWARDS FINALIST 2019 Foreword INDIES Education *Sense of Place, Identity and the Revisioning of Curriculum* Terry Locke, 2023-08-12 This book explores intersections between sense of place the formation of identity indigeneity and colonisation literature and literary study the arts and a revisioned school curriculum for the Anthropocene Underpinning the book is a conviction that sense of place is central to the fostering of the change of heart required to secure the survival of human life on earth It offers a coherent overview of seemingly disparate realities on a geographically and historically sprawling canvas The book is a work of literary non fiction drawing on a range of sources literary works and criticism theoretical research empirical studies and artworks Of its very nature the book enacts an extensive cultural critique After establishing a cross disciplinary foundation for sense of place the book describes its relationship to identity with reference to such terms as attachment dispossession reclamation and representation It shows how a hopeful narrative for planet stewardship can be developed by the uptake of indigenous and traditional discourses of place It concludes with the envisioning of a place conscious curriculum and ways in which an

activist agenda might be pursued in the Anthropocene **Beauty in Leadership and Coaching** Peter Hawkins,2024-12-03 Written by best selling author and global thought leader Peter Hawkins Beauty in Leadership and Coaching explores how leaders and coaches can contribute to the urgent task to transform human consciousness to address the great interconnected challenges of our times Building on a growing interest in ecologically conscious leadership and coaching as well as the role that poetry story and beauty can play to transform our work this book creates a space for both inspiration and reflection moving beyond seeing the climate crisis and the other major global challenges as a problem to be solved towards an attitude of learning and partnering with the human and the more than human world Globally and transculturally inclusive this book will appeal to leaders coaches organizational development consultants and managers throughout the world who aspire to grow and develop in their practice and make a greater contribution to the challenges we now face Integrative Psychotherapy in Theory and Practice Peter Hawkins,Judy Ryde,2019-12-19 Bringing together relational systemic and ecological approaches this textbook for psychotherapy and counselling practitioners and trainees provides a comprehensive overview to integrative theory and practice Illuminating case studies offer a clear view of what it means to work relationally and translate the approach into everyday contexts Virtues of Renewal Jeffrey Bilbro,2018-12-14 For over fifty years Wendell Berry has argued that our most pressing ecological and cultural need is a renewed formal intelligence a mode of thinking and acting that fosters the health of the earth and its beings Yet the present industrial economy prioritizes a technical self centered way of relating to the world that often demands and rewards busyness over thoughtful observation independence over relationships and replacing over repairing Such a system is both unsustainable and results in destructive far reaching consequences for our society and land In Virtues of Renewal Wendell Berry s Sustainable Forms Jeffrey Bilbro combines textual analysis and cultural criticism to explain how Berry s literary forms encourage readers to practice virtues of renewal While the written word alone cannot enact change Bilbro asserts that Berry s poetry essays and fiction can inspire people to as Berry writes practice resurrection Bilbro examines the distinct yet symbiotic features of these three genres demonstrating the importance of the humanities in supporting tenable economies He uses Berry s pieces to suggest the need for more robust language for discussing conservation ecology and the natural and regenerative process of death Bilbro additionally translates Berry s literature to a wider audience putting him in conversation with philosophers and theologians such as Ivan Illich Willie Jennings Charles Taylor and Augustine The lessons that Berry and his work have to offer are not only for those interested in cultivating the land but also for those who cultivate their communities and live mindfully In short these lessons are pertinent to all who are willing to make an effort to live the examined life Such formative work is not dramatic or quick but it can foster the deep and lasting transformation necessary to develop a more sustainable culture and economy **Green Economy Reader** Stanislav Shmelev,2016-09-22 State of the art in sustainability thinking inspired by interdisciplinary ideas of ecological economics This book is focusing on sustainability pathways new economic theory

democracy and institutions multidimensional assessment of sustainability macroeconomic modelling and policies climate change and renewable energy resource flows and circular economy regenerative cities environmental conflicts and values It will be helpful for MSc and PhD students in Economics Management Environmental Change Ecological Economics Development Economics Sustainability and practitioners in business international and nongovernmental organizations Rich diverse and thought provoking collection of top level contributions it will help to facilitate the transition towards sustainability and educational reform A fabulous composition of papers by the authors who really count Ernst von Weizsäcker The Club of Rome The authors present a refreshing perspective on the possibilities of human progress in harmony with nature without the need for economic growth to secure long term human welfare and wise use of nature's services Extremely relevant Peter May Past President International Society for Ecological Economics and Professor UFRJ Rio de Janeiro Brazil The book goes well beyond the Green Economy offering arguments and blueprints for a complete makeover of the current economic system With multi and interdisciplinary contributions ranging from moderately to fundamentally critical of current economics it raises fundamental questions of value and power draws on a wide range of theories opens the eyes for the historical processes that brought about the current crises and demonstrates the value of ecological but also classical economic thinking to their solution If better politics require better theories this is a must read for academics and decision makers in the time of climate crisis Joachim Spangenberg Sustainable Europe Research Institute SERI Germany e V
