Being Born Alison Stone, 2019-09-26 All human beings are born and all human beings die In these two ways we are finite our lives begin and our lives come to an end Historically philosophers have concentrated attention on our mortality and comparatively little has been said about being born and how it shapes our existence Alison Stone sets out to overcome this oversight by providing a systematic philosophical account of how being born shapes our condition as human beings Drawing on both feminist philosophy and existentialist concerns about the structure of meaningful human existence Stone offers an original perspective on human existence She explores how human existence is shaped by the way that we are born Taking natality into account transforms our view of human existence and illuminates how many of its aspects are connected with our birth These aspects include dependency the relationality of the self vulnerability reception and inheritance of culture and history embeddedness in social power situatedness and radical contingency Considering natality also sheds new light on anxiety mortality and the temporality of human life This book therefore bears on death and the meaning of life as well as many debates in feminist and continental philosophy

The ^ARisk of a Lifetime Rivka Weinberg, 2015-10-15 This original comprehensive theory of procreative ethics explains what kind of act procreation is and when we may permissibly engage in it In order to ascertain when the procreative risk is

permissible to impose Weinberg proposes contractualist principles to fairly attend to the interests prospective parents have in procreating and the interests future people have in a life of human flourishing The book presents a solution to the non identity problem as well as dilemmas regarding our liberal principles of autonomy consent and equality which may seem to be in tension with our procreative practices Distributed Network Systems Weijia Jia,Wanlei Zhou,2004-12-15 Both authors have taught the course of Distributed Systems for many years in the respective schools During the teaching we feel strongly that Distributed systems have evolved from traditional LAN based distributed systems towards Internet based systems Although there exist many excellent textbooks on this topic because of the fast development of distributed systems and network programming protocols we have difficulty in finding an appropriate textbook for the course of distributed systems with orientation to the requirement of the undergraduate level study for today s distributed technology Specifically from to date concepts algorithms and models to implementations for both distributed system designs and application programming Thus the philosophy behind this book is to integrate the concepts algorithm designs and implementations of distributed systems based on network programming After using several materials of other textbooks and research books we found that many texts treat the distributed systems with separation of concepts algorithm design and network programming and it is very difficult for students to map the concepts of distributed systems to the algorithm design prototyping and implementations This book intends to enable readers especially postgraduates and senior undergraduate level to study up to date concepts algorithms and network programming skills for building modern distributed systems It enables students not only to master the concepts of distributed network system but also to readily use the material introduced into implementation practices *The Risk of a Lifetime* Rivka Weinberg,2015 This original comprehensive theory of procreative ethics explains what kind of act procreation is and when we may permissibly engage in it *Backpacker* ,2007-09 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured **Los Angeles Magazine** ,2003-11 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian Popular Mechanics ,2000-01 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital
