

Figure 1. A graph of the function $g(x) = 3x^2 - 2x^3$.

Finally, D_3 is constructed by filtering from D those instances on which h_1 and h_2 agree. That is, a third oracle EX_3 simulates the choice of an instance according to D_3 by requesting instances from EX until one is found for which $h_1(x) \neq h_2(x)$. (Again, we will later show how to limit the time spent waiting in this loop for a desired instance.) For a third time, algorithm A is simulated with examples drawn this time by EX_3 , producing hypothesis h_3 .

At last, A' outputs its hypothesis h : given an instance x , if $h_1(x) = h_2(x)$ then h predicts the agreed upon value; otherwise, h predicts $h_3(x)$. (In other words, h takes the "majority vote" of h_1 , h_2 and h_3 .) Later, we show that h 's error is bounded by $g(\epsilon) = 3\epsilon^2 - 2\epsilon^3$. This quantity is significantly smaller than the original error ϵ , as can be seen from its graph depicted in Figure 1. (The solid curve is the function g , and, for comparison, the dotted line shows a graph of the identity function.)

3.2. A strong learning algorithm

An idea that follows naturally is to treat the previously described procedure as a subroutine for recursively boosting the accuracy of weaker hypotheses. The procedure is given a desired error bound ϵ and a confidence parameter δ , and constructs an ϵ -close hypothesis from weak, recursively computed hypotheses. If $\epsilon \geq 1/2 - 1/p(n, \delta)$ then an assumed weak learning algorithm can be used to find the desired hypothesis; otherwise, an ϵ -close hypothesis is computed recursively by calling the subroutine with ϵ set to $g^{-1}(\epsilon)$.

Unfortunately, this scheme by itself does not quite work due to a technical difficulty: because of the way EX_1 and EX_2 are constructed, examples may be required from a very small portion of the original distribution. If this happens, the time spent waiting for an example to be chosen from this region may be great. Nevertheless, we will see that this

Online Book Boosting Applications Extensions Yoav Freund

L Reisser

Online Book Boosting Applications Extensions Yoav Freund:

Boosting Robert E. Schapire, Yoav Freund, 2014-01-10 An accessible introduction and essential reference for an approach to machine learning that creates highly accurate prediction rules by combining many weak and inaccurate ones Boosting is an approach to machine learning based on the idea of creating a highly accurate predictor by combining many weak and inaccurate rules of thumb A remarkably rich theory has evolved around boosting with connections to a range of topics including statistics game theory convex optimization and information geometry Boosting algorithms have also enjoyed practical success in such fields as biology vision and speech processing At various times in its history boosting has been perceived as mysterious controversial even paradoxical This book written by the inventors of the method brings together organizes simplifies and substantially extends two decades of research on boosting presenting both theory and applications in a way that is accessible to readers from diverse backgrounds while also providing an authoritative reference for advanced researchers With its introductory treatment of all material and its inclusion of exercises in every chapter the book is appropriate for course use as well The book begins with a general introduction to machine learning algorithms and their analysis then explores the core theory of boosting especially its ability to generalize examines some of the myriad other theoretical viewpoints that help to explain and understand boosting provides practical extensions of boosting for more complex learning problems and finally presents a number of advanced theoretical topics Numerous applications and practical illustrations are offered throughout

Boosting Yoav Freund, Robert Schapire, 2011-02-26 Written by the developers of the first practical boosting algorithm AdaBoost this reference covers the background theory and advances in the formula The first part of the book provides a general background of the subject It is followed by an outline of the theory of boosting and the extensions to the AdaBoost algorithm that have been made since its inception Chapters cover the mathematical study of machine learning analysis of AdaBoost's training error the generalization error and game theory The authors also discuss specific applications such as bioinformatics and computer vision and provide examples to explain topics and ensure understanding

Enjoying the Melody of Phrase: An Mental Symphony within **Online Book Boosting Applications Extensions Yoav Freund**

In a world taken by displays and the ceaseless chatter of instant transmission, the melodic splendor and emotional symphony developed by the published term often fade in to the background, eclipsed by the persistent noise and interruptions that permeate our lives. But, nestled within the pages of **Online Book Boosting Applications Extensions Yoav Freund** a marvelous literary value overflowing with natural emotions, lies an immersive symphony waiting to be embraced. Constructed by an outstanding composer of language, this charming masterpiece conducts readers on a mental trip, well unraveling the hidden tunes and profound influence resonating within each cautiously constructed phrase. Within the depths with this emotional examination, we can discover the book is central harmonies, analyze their enthralling publishing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
