Abstract: Language and its importance: Language is an intangible concept. It is composed of various dialects. Due to the large number of dialects within a single language, standard form is hardly ever used by speakers. For instance, despite Hindi being our mother tongue, we hardly use it. Every time, converse in various tongues. For some students, learning English as a foreign language (EFL) can be quite difficult. Understanding the language they learn can sometimes be difficult for them because of their mother tongue. More or less intrusion from their mother tongue influences the language learning of EFL learners. The objectives of this study are to determine

a) The different level of MTI (mother tongue influence) and its varied impact on speaking (English).

b) The impact of the learner's mother tongue on their ability to learn English; and b) the english learners has difficulties learning English as a foreign language.

Tariq Rahman has very beautifully supported this view in the following lines: According to modern linguistic view, the standard variety of a language is also a dialect. As you will observe, dialects are real in the sense that people actually speak them. The language is an abstraction because nobody speaks it. Everybody speaks a dialect. If someone speaks what we call the 'standard language', even that is a dialect of the abstract entity called the 'language'. (Rahman, 2010:144)

Key Words: Dialects, Language, Mother tongue.

INTRODUCTION:

What is Mother Tongue Influence?

Our mother tongue is the tongue we spoke growing up. Literally, it refers to the language our mother taught us, the one we have used since we were young. According to a proverb, language shifts every ten miles in India. As a result, it is challenging for us to speak with a standard accent because we all speak English differently. Some examples are: 'iskool', 'istudent', 'plezar', 'requesht' and other such words. In fact, I got the idea to write on this topic only after a student told us that he wanted to speak "bhery phluent Englis".

How does it develop?

This issue is brought on by the large number of vernacular-medium schools in India. As a result, the majority of Indians have MTI. Another factor might be the later introduction of English to young children. According to studies, kids who start learning a second language while they're young progress more quickly. When a child learns something later in life, it becomes more challenging because by that time, the child has already internalised the sounds of his or her native tongue and applies those sounds to English. This is where the difficulty begins. Finally, a lack of exposure to English may also be the cause.

Mother Tongue Influence's Effects:

People enjoy making fun of folks who have a loud MTI while they speak. People who speak English with MTI are aware that they speak incorrectly, hence doing so is wrong. They avoid speaking any English since they are aware that it will make people laugh at them.

and papers seeking to re-examine and reposition childhood. At the same time, an equally significant area has developed within literacy studies reflecting a growing interest in the nature of literacy as a socially situated phenomenon. There is increased interest in literacy as a multimodal concept in which symbolic meaning is a central concept rather than more conventional and narrower notions of literacy. The *Handbook of Early Childhood Literacy* is central in providing access to all these different perspectives. The Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up-to-date reviews of research and thinking in early childhood literacy. The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy. Major sections include the global world of early childhood literacy, childhood literacy and family, community and culture, the development of literacy in early childhood, pedagogy and early childhood literacy, and researching early childhood literacy. Contributions by leading authorities focus on literacy as a socially situated and global experience, one that is evolving in relation to changes in contemporary culture and technological innovation.

The Handbook is essential for Undergraduate students, Masters students, PhD students, CPD students, researchers and literacy centre personnel. The second edition of this internationally respected and widely used text encompasses a myriad of new issues and insights both through new contributions and thoughtfully revised chapters which raise fresh questions and challenges for research and practice. In pushing the boundaries still further, the handbook retains its rightful place at the forefront of research into early childhood literacy practice in the 21st century. Professor Teresa Cremin, Open University, UK. This handbook provides in-depth knowledge of insights and theories about the dynamic process of how children come to know literacy as thinking humans in social and cultural spaces. There is a rich array of research perspectives of children's meaning-making through family and digital literacies, play and literacy, and in school and out of school literacy experiences.
