Essentials of Nursing Practice Catherine Delves-Yates, 2018-06-30 Introduces all the core topics and essential information that nursing students in all specialisms will need to master during the first years of a nursing degree

Essentials of Geriatric Neuroanesthesia Hemanshu Prabhakar, Charu Mahajan, Indu Kapoor, 2019-06-13 The book covers topics ranging from basic sciences developmental changes in neuroanatomy and neurophysiology and effects of neuropharmacology to special situations such as brain death ethical issues and palliative care It discusses various neurological surgical problems and their challenges along

with common problems such as Alzheimer's and Parkinson's disease. A section on Pain covers all possible modalities for relieving pain in this patient population followed by the important issue of palliative care. The book addresses the issue of cognition decline common in this group. The fact that basic sciences are included along with clinical sciences makes it a unique read for the audience. [Teamwork in Neurology](#) Ruth Nieuwenhuis, 2013-12-14 *Manual of Dietetic Practice* Briony Thomas, Jacki Bishop, 2013-04-05. The standard work for all those involved in the field of clinical nutrition and dietetics. The *Manual of Dietetic Practice* has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary patient-centred evidence-based practice and has been expanded to include dedicated chapters covering adult nutrition, freelance dietetics, complementary and alternative therapies. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, this truly is the essential guide to the principles of dietetics across its whole range. [A Guide to the Extrapyramidal Side-Effects of Antipsychotic Drugs](#) D. G. Cunningham Owens, 2014-04-10. It is often implied that antipsychotic-induced extrapyramidal side effects are irrelevant to modern psychiatric therapeutics, rendered historic by newer, better treatments. This myth arises from limited awareness of the depth and breadth of neurological disruption antipsychotics can mediate. This volume discusses the extensive clinical boundaries of acute dystonias, drug-induced parkinsonism, akathisia, and tardive dyskinesia, providing demographic and epidemiological context while illustrating how prescribing choices impact powerfully on their development. This new edition has been thoroughly updated and rewritten to include recent data, expanded references, and a new chapter on the concept of atypical antipsychotics. Written in a light, engaging style, liberally illustrated with clinical examples, it also invites readers to consider ongoing controversies, subjective drug effects, the relationship between akathisia and restless legs, the status of the concept of atypicality, and so on. Informative reading for trainees as well as established practitioners in the fields of psychiatry, neurology, primary care, and geriatrics. [Practical Guide for Biomedical Signals Analysis Using Machine Learning Techniques](#) Abdulhamit Subasi, 2019-03-16. *Practical Guide for Biomedical Signals Analysis Using Machine Learning Techniques*. A MATLAB-Based Approach presents how machine learning and biomedical signal processing methods can be used in biomedical signal analysis. Different machine learning applications in biomedical signal analysis, including those for electrocardiogram, electroencephalogram, and electromyogram, are described in a practical and comprehensive way, helping readers with limited knowledge. Sections cover biomedical signals and machine learning techniques; biomedical signals such as electroencephalogram (EEG), electromyogram (EMG), and electrocardiogram (ECG); different signal processing techniques; signal denoising; feature extraction; and dimension reduction techniques such as PCA, ICA, KPCA, MSPCA, entropy measures, and other statistical measures, and more. This book is a valuable source for bioinformaticians, medical doctors, and other members of the biomedical field who need a cogent resource on the most recent and promising machine learning techniques.

for biomedical signals analysis Provides comprehensive knowledge in the application of machine learning tools in biomedical signal analysis for medical diagnostics brain computer interface and man machine interaction Explains how to apply machine learning techniques to EEG ECG and EMG signals Gives basic knowledge on predictive modeling in biomedical time series and advanced knowledge in machine learning for biomedical time series **End of Life Care in Neurological Disease**

David Oliver,2012-11-27 As end of life care is extended to more and more people it is increasingly important that people with progressive neurological disease are recognised as having particular issues as their disease progresses This group of people with advancing motor neurone disease multiple sclerosis Parkinson s disease multiple systems atrophy progressive supranuclear palsy Huntington s disease and other progressive neurological disease face increasing problems with physical symptoms and psychosocial and spiritual issues for both themselves and their families and carers This book encourages health and social care professionals to become closely involved in the care of these people and their families so that advance care plans can be started and quality of life maintained This book addresses the principles and practice of developing end of life care strategies for neurological disease written with a clinical multidisciplinary focus and illustrated with detailed case studies *Palliative Care Nursing: Principles and Evidence for Practice* Catherine Walshe,Nancy Preston,Bridget

Johnston,2018-05-18 What can nurses do to support those receiving palliative care How do you ensure clear communication and maintain patients and families preferences Palliative Care Nursing is essential reading for nursing students professional nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life This third edition of the acclaimed textbook has been extensively revised and examines important research studies key debates around care and strategies to advance palliative care nursing In four sections the book covers key elements of nursing practice towards the end of life Defining the palliative care patient Providing palliative nursing care Caring around the time of death Challenging issues in palliative care nursing Leading authors address contemporary issues and explore how to provide high quality person centred palliative care encouraging application to practice through exercises and case studies Chapters completely reworked or new for this edition include those on communication living with uncertainty bereavement care the costs of caring nurses decision making and capacity and palliative care worldwide The clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre registration level postgraduate level or as part of CPD study With a foreword by last edition editor Professor Sheila Payne Lancaster University UK I welcome this third edition of Palliative Care Nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice As the largest workforce in palliative care and given the changing face of clinical practice for nurses including increased educational opportunity and expanding roles and responsibilities this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline

The learning exercises in particular offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care. It will be an excellent resource for nursing both in the UK and Ireland and to the wider international audience having drawn on the breadth of global nursing expertise to bring this book together. Philip Larkin, Professor of Clinical Nursing Palliative Care, University College Dublin and Our Lady's Hospice and Care Services, Dublin, Ireland, President, European Association for Palliative Care. This is a book of substance that captures the current status of palliative nursing, including the values and research evidence that underpin it. The changing nature of palliative nursing as an evidence-based specialism is balanced with practical skills and insights from experts and also considers the needs of those working with or concerned about the dying person's well-being. It covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis. I hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing. Professor Daniel Kelly, Fellow of the Royal College of Nursing and Royal College of Nursing Chair of Nursing Research, Cardiff University, UK.
