International Migrants in Johannesburg's Informal Economy Peberdy, Sally, 2016-10-17 This report provides a rich view of the activities of migrant entrepreneurs in the informal economy of Johannesburg. It is hoped that the information will facilitate understanding of the informal sector and its potential, and not just in the context of migrant entrepreneurs. The informal economy plays a significant role in the entrepreneurial landscape of the City of Johannesburg and is patronized by most of the city's residents. The research presented here challenges commonly held opinions about migrant entrepreneurs in the City of Johannesburg and shows that they do not dominate the

informal economy which remains largely in the hands of South Africans In late 2013 the City through Operation Clean Sweep removed up to 8 000 traders from the city s streets As this and recent xenophobic attacks demonstrate Johannesburg can be a hostile place in which to operate a business as an informal economy migrant entrepreneur Instead of trying to sweep the streets clean of these small businesses government at national provincial and city levels should develop policies to grow the SMME economy develop township economies and manage the informal economy and street trading They need to incorporate the businesses owned by migrant entrepreneurs rather than exclude and demonize them These businesses make an invaluable contribution to Johannesburg s economy despite operating in a non enabling political and policy environment

Collaboration in Business, Technology, Information, and Innovation (SCBTII 2024) Suhal Kusairi, Forget Mingiri Kapingura, Putri Fariska Sugestie, Nizam Ahmat, 2024-11-16 This is an open access book Global growth has lost momentum On average GDP growth has declined from more than 2% in advanced economies and nearly 6% in emerging and developing economies in the early 2000s to less than 1.5% and less than 2% post COVID period A succession of crises has compounded this sustained slowdown in growth It has been more than a decade since the beginning of the global financial crisis yet it continues to cast a shadow not least in the policy choices of many advanced economies The COVID 19 pandemic and the shock of lockdowns left behind an aftermath of a surge in public debt levels and a reversal of global development progress Geopolitical tensions and conflicts have further reshaped an increasingly multipolar international order with far reaching implications for technology growth and development Overshadowing these developments is the growing awareness that the world's rising temperature poses grave dangers to the long term prospects for humanity with the world currently on track for

a temperature rise significantly above the targets set out in the Paris Agreement in 2015 The critical question for this pivotal moment is not whether the world still needs economic growth but how that growth is achieved and whether it is aligned with other important national and global priorities Against this backdrop universities are essential in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must play a significant role and be innovative and creative in engaging and supporting the development opportunities and consolidation of the global community To embark on this role effectively universities must always foster communication and discussion among stakeholders under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2024 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that are interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international partners for future collaboration to respond to economic business social and technological development challenges successfully and effectively for better life and well being

Women, Entrepreneurship and Development in the Middle East Beverly Dawn Metcalfe, Bettina Lynda

Bastian, Haya Al-Dajani, 2021-12-20 The Middle East was the region least impacted in the 2008 crisis has investment systems markedly different to the West is largely governed by Islamic Shari'a and has varying forms of governance and institutional organization which are not understood by many nor how these systems shape entrepreneurial and industrial development While the Middle East as a region has seen a small growth in entrepreneurship for women and business scholarship on the Middle East has grown there is no text in English that has brought critical insights from the Middle East together in a single volume In examining women's entrepreneurship in the Middle East this book aims to challenge Global North assumptions about the disempowering impacts of Islamic Shari'a and governance Referring to the constraints of Islam on women's subjectivity and agency greatly misunderstands religious identity of both men and women and the way in which public administration and private sector institutions are organized in very different ways to Western regions This timely text expands and adds new insights to the theorizations of women's entrepreneurship in the Middle East through unravelling spatialized themes and incorporates contemporary themes including an Islamic science reading of women work and venturing changing families and entrepreneurship development women managing social crises Islamization governance and women Islamic feminist activisms and entrepreneurship representations of women's entrepreneurship on social media and women's collectives leading entrepreneurship via Facebook entrepreneurship It will be of interest to researchers academics and students in the fields of entrepreneurship gender work and organizations Educating Entrepreneurial Citizens Joan

DeJaeghere, 2017-05-18 *Educating Entrepreneurial Citizens* examines the multiple and contradictory purposes and effects of entrepreneurship education aimed at addressing youth unemployment and alleviating poverty in Tanzania. Governments in sub-Saharan Africa face increasing pressure to educate young people through secondary school, supposedly equipping them with knowledge and skills for employment and their future. At the same time, many youths do not complete their education, and there are insufficient jobs to employ graduates. The development community sees entrepreneurship education as one viable solution to the double-edged problem of inadequate education and few jobs. But while entrepreneurship education is aligned with a governing rationality of neoliberalism that requires individuals to create their own livelihoods without government support, the two NGO programs discussed in this book draw on a rights-based discourse that seeks to educate those not served by government schools, providing them with educational and social supports to be included in society. The chapters explore the tensions that occur when international organizations and NGOs draw on both neoliberal and liberal human rights discourses to address the problems of poverty, unemployment, and poor quality education. Furthermore, when these neo-liberal perspectives meet local ideas of reciprocity and solidarity, they create friction and alter the programs and effects they have on youth. The book introduces the concept of entrepreneurial citizens: those who utilize their innovative skills and behaviors to claim both economic and social rights from which they had been previously excluded. The programs taught youth how to develop their own enterprises to earn profits and to save for their own futures, but youth used their education skills and labor to provide for basic needs, to be included in society, and to support their and their families' well-being. By showing the contradictory effects of entrepreneurship education programs, the book asks international agencies and governments to consider how they can go beyond technical approaches of creating enterprises and increasing income and head toward approaches that consider the kinds of labor that young people and communities value for their well-being. This book will be of interest to scholars and practitioners of education and international development, youth studies, African Studies, and entrepreneurship social entrepreneurship education.
