

3.2.3 Important general information.

If the motor is used outside the environmental limits given in this instruction the motor can not be expected to perform a safe stop when there is a demand on the STO-safety function.

3.2.4 Using electromagnetic brake.

The MIS motors can be supplied with an optional integrated brake or alternatively an external brake can be connected to one of the 8 user outputs (IO1 - IO8). Please notice that the brake feature is not covered by the general TÜV safety approval since it is under software control. Do therefore not use the motor with a brake in applications where the safety and injury of persons is depending of the function of the brake.
