## Administration and Scoring of the NEO-FFI-3

The NEO-FFI-3 is a 60-item version of the NEO-PI-3 that provides a brief, comprehensive measure of the five domains of personality. It consists of five 12-item scales that measure each domain. Information on specific facets within each domain is not provided, and the shortened scales are somewhat less reliable and valid than the full NEO-PI-3 domain scales. Separate versions are available for Form S and Form R and for adults and adolescents.

### Administration

The NEO-FFI-3 may be administered individually or in groups. The testing environment should be comfortable and free of distractions and provide adequate lighting. A pencil and a flat surface, such as a desk or clipboard on which the respondent can write, are also needed for administration. If the respondent uses eyeglasses, the examiner should be sure that they are being used during testing. The examiner should engage the respondent in the task of completing the test to reduce the possibility of response sets or random responding to the items.

#### Directions

Provide each respondent with a NEO-FFI-3 Item Booklet and a pencil. Tell the respondent to read the instructions for completing the NEO-FFI-3, which are on the first page. After the instructions have been read and the respondent understands the nature of the task, tell him or her to turn to the second page of the Item Booklet and to provide the identifying information requested at the top of that page. If an identification number is to be used, provide the respondent with the number so he or she can enter it, or fill it in yourself.

If Form R is being used, the respondent should provide the name (or initials) of the person being rated. *It is the examiner's responsibility to ensure that the person being rated can be correctly identified by name, initials, ID number, and/or the name of the rater.* The examiner is also responsible for ensuring that all identifying information is properly marked on the Item Booklet. Note that responses to the NEO-FFI-3 are made across the rows of the response grid.

*There is no time limit for the NEO-FFI-3.* Most respondents require 5 to 10 minutes to complete the measure, but older respondents and those with limited reading skills may take longer. The NEO-PI-3 alternative administration procedures previously described may also be used with the NEO-FFI-3.

### Scoring

#### Missing Responses

Once the measure has been completed, examine the response area of the Item Booklet to be sure that a response has been given for each item. If unanswered items are found, the respondent should be asked to complete them. If a respondent is unsure of the meaning of an item or is unsure of how to respond, he or she may be told to use the *neutral* response option. It is also appropriate to explain the meaning of words the respondent does not understand (see chapter 3 of this Professional Manual for more information).

If the respondent did not provide a response to every item and the respondent is no longer available to the examiner, the examiner must determine whether the data may be validly scored and interpreted. If 10 or more items have been left blank, the test is considered invalid and should not be formally scored. If nine or fewer items have been left blank, the blank items should be scored as if the *neutral* response option was selected. Any domain for which there are more than four missing responses should be interpreted with caution.

#### Validity Checks

At the bottom of the third page of the NEO-FFI-3 Item Booklets, three yes-or-no items ask the respondent if he or she has (a) responded to all of the statements, (b) entered responses across the rows, and (c) responded accurately and honestly. In most cases, if the respondent indicated that responses were not entered in the correct boxes or were not answered honestly and accurately, the test should not be scored.

*Measuring Human Capabilities* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Measuring Human Capabilities: Performance Potential of Individuals and Collectives, 2015-04-10 Every year the U S Army must select from an applicant pool in the hundreds of thousands to meet annual enlistment targets currently numbering in the tens of thousands of new soldiers A critical component of the selection process for enlisted service members is the formal assessments administered to applicants to determine their performance potential Attrition for the U S military is hugely expensive Every recruit that does not make it through basic training or beyond a first enlistment costs hundreds of thousands of dollars Academic and other professional settings suffer similar losses when the wrong individuals are accepted into the wrong schools and programs or jobs and companies Picking the right people from the start is becoming increasingly important in today s economy and in response to the growing numbers of applicants Beyond cognitive tests of ability what other attributes should selectors be considering to know whether an individual has the talent and the capability to perform as well as the mental and psychological drive to succeed *Measuring Human Capabilities* An Agenda for Basic Research on the Assessment of Individual and Group Performance Potential for Military Accession examines promising emerging theoretical technological and statistical advances that could provide scientifically valid new approaches and measurement capabilities to assess human capability This report considers the basic research necessary to maximize the efficiency accuracy and effective use of human

capability measures in the military's selection and initial occupational assignment process. The research recommendations of *Measuring Human Capabilities* will identify ways to supplement the Army's enlisted soldier accession system with additional predictors of individual and collective performance. Although the primary audience for this report is the U.S. military, this book will be of interest to researchers of psychometrics, personnel selection and testing, team dynamics, cognitive ability and measurement methods and technologies. Professionals interested in the foundational science behind academic testing, job selection and human resources management will also find this report of interest.

**Handbook of Psychology, History of Psychology** Irving B. Weiner, Donald K. Freedheim, 2003-01-16. Includes established theories and cutting edge developments. Presents the work of an international group of experts. Presents the nature, origin, implications, and future course of major unresolved issues in the area.

*Psychometrics* R. Michael Furr, Verne R. Bacharach, 2008. Focusing on the conceptual understanding of psychometric issues such as validity and reliability, this textbook introduces psychometric principles at a level that goes into more detail than introductory undergraduate texts yet also more intuitive than more technical publications intended for postgraduate level. By emphasizing conceptual development and practical significance over mathematical proofs, this book assists students in appreciating how measurement problems can be addressed and why it is important to address them.

**Diversity-Sensitive Personality Assessment** Steven Smith, Radhika Krishnamurthy, 2018-05-03. Diversity Sensitive Personality Assessment is a comprehensive guide for clinicians to consider how various aspects of client diversity (ethnicity, gender, sexual orientation, age, nationality, religion, regionalism, socioeconomic status, and disability status) can impact assessment results, interpretation, and feedback. Chapters co-written by leading experts in the fields of diversity and personality assessment examine the influence of clinician, client, interpersonal, and professional factors within the assessment context. This richly informed and clinically useful volume encourages clinicians to delve into the complex ways in which individuals' personal characteristics, backgrounds, and viewpoints intersect. This book fills an important gap in the personality assessment literature and is an essential resource for clinicians looking to move beyond surface-level understandings of diversity in assessment.

**Clinical Neuropsychology** Mark E. Maruish, James A. Moses, 2013-05-13. With the emergence of clinical neuropsychology as one of the fastest growing specialties in psychology comes the need for current and future practitioners to stay abreast of the most recent research. A number of professional journals more than adequately meet this need. But there is also a need to stay up to date on the current thinking about important problems. Drawing upon the expertise of leaders in the field, the editors' intent in this book was to provide the practitioner with a source for discussions of topics that are vital to their ongoing development as clinical neuropsychologists but that generally are not addressed in the literature to any great degree.

Clinical Neuropsychology Mark Edward Maruish, James A. Moses, 1997. First Published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.
