End-to-end Integration with IBM Sterling B2B Integration and Managed File Transfer solutions
James Ballentine, Claudemir Braghirolli, Vasfi Gucer, Rahul Gupta, James B. Herry, Richard Kinard, Gianluca Meloni, Bala Sivasubramanian, Eduardo Ribeiro de Souza, Frank Strecker, Gang Yin, IBM Redbooks, 2012-07-21. Across numerous vertical industries, enterprises are challenged to improve processing efficiency as transactions flow from their business communities to their internal systems, and vice versa. Simplify management and expansion of the external communities; accommodate customer and supplier preferences; govern the flow of information; enforce policy and standards; and protect sensitive information. Throughout this process, external partners must be on-boarded, and off-boarded information must flow across multiple communications infrastructures, and data must be mapped and transformed for consumption across multiple applications. Some transactions require synchronous or real-time processing, while others are of a more periodic nature. For some classes of customer or supplier, the enterprise might prefer a locally managed on-premise solution. For some types of communities, often small businesses, an as-a-Service solution might be the best option. Many large enterprises combine the on-premise and as-a-Service approach to serve different categories of business partners, customers, or suppliers. This IBM
