McDonald, 2007-12-21 Personal and reflective essays that describe how particular works whether papers books or demos from classics to forgotten gems have influenced each writer s approach to HCI Over almost three decades the field of human computer interaction HCI has produced a rich and varied literature Although the focus of attention today is naturally on new work older contributions that played a role in shaping the trajectory and character of the field have much to tell us The contributors to HCI Remixed were asked to reflect on a single work at least ten years old that influenced their approach to HCI The result is this collection of fifty one short engaging and idiosyncratic essays reflections on a range of works in a variety of forms that chart the emergence of a new field An article a demo a book any of these can solve a problem demonstrate the usefulness of a new method or prompt a shift in perspective HCI Remixed offers us glimpses of how this comes about The contributors consider such HCI classics as Sutherland s Sketchpad Englebart s demo of NLS and Fitts on Fitts Law and such forgotten gems as Pulfer s NRC Music Machine and Galloway and Rabinowitz s Hole in Space Others reflect on works somewhere in between classic and forgotten Kidd s The Marks Are on the Knowledge Worker King Beach s Becoming a Bartender and others Some contributors turn to works in neighboring disciplines Henry Dreyfuss s book on industrial design for example and some range farther afield to Lovelock s Gaia hypothesis and Jane Jacobs s The Death and

Life of Great American Cities Taken together the essays offer an accessible lively and engaging introduction to HCI research that reflects the diversity of the field s beginnings *The Virtual Community, revised edition* Howard Rheingold, 2000-10-23 Howard Rheingold tours the virtual community of online networking Howard Rheingold has been called the First Citizen of the Internet In this book he tours the virtual community of online networking He describes a community that is as real and as much a mixed bag as any physical community one where people talk argue seek information organize politically fall in love and dupe others At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses he acknowledges a darker side to people s behavior in cyberspace Indeed contends Rheingold people relate to each other online much the same as they do in physical communities Originally published in 1993 The Virtual Community is more timely than ever This edition contains a new chapter in which the author revisits his ideas about online social communication now that so much more of the world s population is wired It also contains an extended bibliography

Computergestützte Tele- und Teamarbeit , 2013-04-17 VII Geleitwort In den letzten Jahren haben sich zwei Entwicklungstrends der Informationsverarbeitung verstärkt die zu größeren Umwälzungen in der Arbeitsorganisation führen können als sie einst die Einführung des Telefons gebracht hat Zum einen wird die Kommunikationsinfrastruktur sowohl in den Unternehmen als auch im regionalen nationalen und internationalen Bereich massiv ausgebaut und in der Leistungsfähigkeit verbessert Man denke hier zum Beispiel an die enormen staatlichen und privatwirtschaftlichen Bestrebungen zum Aufbau von Datenautobahnen Zum anderen werden immer weitgreifende Standards für den inneren und zwischenbetrieblichen Datenaustausch verabredet und darauf aufbauend leistungsfähige Software für die weltweite Informationsbeschaffung die elektronische Kommunikation die interpersonelle Kooperation und die Koordination von Arbeitsprozessen entwickelt Setzt man diese Möglichkeiten konsequent für eine effektive Arbeitsteilung zwischen Unternehmen ein so kommt man zu virtuellen Organisationen die nicht mehr standort sondern prozessbezogen agieren Betrachtet man Personen die eine Aufgabe arbeitsteilig oder gemeinsam im Team angehen so gelangt man zu fortgeschrittenen Formen der computergestützten Tele und Teamarbeit Diese generellen Entwicklungen betreffen aber nicht nur ökonomische Systeme Vielmehr werden alle gesellschaftlichen Bereiche berührt darunter auch die Bildung und die Wissenschaft Eine zentrale Aufgabe unserer Zeit ist es die aus dem technologischen Fortschritt resultierenden Veränderungen ungeahnten Ausmaßes aktiv mitzugestalten und einer breiten Bevölkerungsschicht zugänglich zu machen *Networked Learning* Christopher Jones, 2015-05-18 This book posits the idea that networked learning is the one new paradigm in learning theory that has resulted from the introduction of digital and networked technologies It sets out in a single volume a critical review of the main ideas and then articulates the case for adopting a networked learning perspective in a variety of educational settings This book fills a gap in the literature on networked learning Although there are several edited volumes in the field there is no other monograph that makes the academic case and provides the academic context for networked learning This volume accomplishes three main goals First it assists

researchers and practitioners in acquainting themselves with the field Second it provides resources for reference and guidance to those not well acquainted with the field Finally and most powerfully it also allows for the consolidation of a field that is truly multidisciplinary in a way that maintains coherence and consistency *Handbook of New Media* Leah A Lievrouw, Sonia Livingstone, 2006-01-17 Thoroughly revised and updated this Student Edition of the successful Handbook of New Media has been abridged to showcase the best of the hardback edition This Handbook sets out boundaries of new media research and scholarship and provides a definitive statement of the current state of the art of the field Covering major problem areas of research the Handbook of New Media includes an introductory essay by the editors and a concluding essay by Ron Rice Each chapter written by an internationally renowned scholar provides a review of the most significant social research findings and insights *Mediapolis* Sam Inkinen, 1999 No detailed description available for Mediapolis

Coordination Theory and Collaboration Technology Gary M. Olson, Thomas W. Malone, John B. Smith, 2013-05-13 The National Science Foundation funded the first Coordination Theory and Collaboration Technology initiative to look at systems that support collaborations in business and elsewhere This book explores the global revolution in human interconnectedness It will discuss the various collaborative workgroups and their use in technology The initiative focuses on processes of coordination and cooperation among autonomous units in human systems in computer and communication systems and in hybrid organizations of both systems This initiative is motivated by three scientific issues which have been the focus of separate research efforts but which may benefit from collaborative research The first is the effort to discover the principles underlying how people collaborate and coordinate work efficiently and productively in environments characterized by a high degree of decentralized computation and decision making The second is to gain a better fundamental understanding of the structure and outputs of organizations industries and markets which incorporate sophisticated decentralized information and communications technology as an important component of their operations The third is to understand problems of coordination in decentralized or open computer systems *Der Aufstieg der Netzwerkgesellschaft* Manuel Castells, 2017-01-16 Manuel Castells entwirft in seinem Werk eine Soziologie des Informationszeitalters Auf der Grundlage reichhaltigen empirischen Materials analysiert und interpretiert er die Entwicklung von der Industriegesellschaft zur Informationsgesellschaft Seit seinem ersten Erscheinen 1996 in den USA hat das Werk einen beispiellosen Siegeszug durch die wissenschaftlich interessierte Leserschaft genommen **Die neue Bildungskrise** HAEFNER, 2013-12-14 Die rasante Entwicklung der Informationstechnik mit ihren vielfältigen Auswirkungen auf Wirtschaft und Gesellschaft wird von vielen mit Unbehagen betrachtet Dies ist verständlich da die Informationstechnik neue Dimensionen für das menschliche Denken und Handeln mit sich bringt die traditionelle Denkkategorien und Normen die sich über Jahrhunderte hinweg bewährt haben in Frage stellen Niemand vermag mit Gewissheit zu sagen was uns die Informationstechnik am Ende bescheren wird die von Orwell in 1984 geschilderte Schreckensvision einer von der Informationstechnik beherrschten Menschheit oder

eine informierte Gesellschaft die die Informationstechnik beherrscht und nutzt um ihr Dasein so angenehm wie möglich zu gestalten Positiv wird man die Entwicklung nur dann beeinflussen können wenn sich die Verantwortlichen rechtzeitig um geeignete Lösungsstrategien zur Bewältigung des durch die Informationstechnik entstehenden Strukturwandels bemühen Eine zunehmende Technikfeindlichkeit in weiten Schichten der Bevölkerung wäre deshalb besonders besorgniserregend weil sie die Gefahr eines Informationszeitalters heraufbeschwören könnte in dem die große Masse der laquo Nichtwissenden raquo von einer kleinen technischen Elite beherrscht würde Vorrangige Aufgabe der nächsten Jahre wird es sein konstruktive Konzepte zu entwickeln die der Technikfeindlichkeit und der Absage an den Fortschritt als philosophische Idee der industriellen Welt entgegenwirken

Collaborative Dialogue Technologies in Distance Learning M.Felisa Verdejo,Stefano A. Cerri,2012-12-06 In April 1993 an interdisciplinary NATO Advanced Research Workshop on Collaborative dialogue technologies in distance learning was held in Segovia Spain The workshop brought together researchers in fields related to distance learning using computer mediated communication The statement of justification of the NATO ARW follows hereafter

Justification of the NATO Advanced Research Workshop on Collaborative Dialogue Technologies in Distance Learning

Computer Mediated Communication CMC systems have features that reduce some temporal physical and social constraints on communication Theories of communication have shifted from viewing communication as a linear transmission of messages by a sender to a receiver to viewing it as a social paradigm where individuals are actors in a network of interdependent relationships embedded in organizational and social structures Recent research focuses on models of information sharing to support not only the activities of individuals but also the problem solving activities of groups such as decision making planning or co writing This area of research is called Computer Supported Cooperative Work CSCW The Artificial Intelligence AI approach uses knowledge based systems to enhance and facilitate all these processes including the possibility of using natural language The traditional model of distance education places a strong emphasis on independent study supported by well developed learning materials This model can be characterized as one way media However the potential of CMC to provide better guidance to the student in Higher Distance Education has been quickly recognized for at least two kind of activities information sharing and interaction

The Internet and Social Change Carla G. Surratt, 2017-07-06 Starting with only four hosts in 1969 the Internet consisted of more than 56 million hosts by the end of 1999 In 1993 the World Wide Web was only 130 sites strong six years later it boasted more than seven million sites Despite this explosive growth of the Internet and computer technology little is known about the social implications of computer mediated communications In this work the author uses social science theory to evaluate the social transformations taking place today She asks whether human beings use the Internet to change basic social institutions and if so whether these changes are a matter of degree only or represent an overthrow of previous modes of organizing The work examines the rise of the Internet as the logical extension of the Industrial Revolution and urbanization consistent with the basic tenets of modernity and offers a new conceptual framework through which to understand the Internet
