Geophysical Applications of Artificial Neural Networks and Fuzzy Logic W.

Sandham, M. Leggett, 2013-06-29 The past fifteen years has witnessed an explosive growth in the fundamental research and applications of artificial neural networks ANNs and fuzzy logic FL The main impetus behind this growth has been the ability of such methods to offer solutions not amenable to conventional techniques particularly in application domains involving pattern recognition prediction and control Although the origins of ANNs and FL may be traced back to the 1940s and 1960s respectively the most rapid progress has only been achieved in the last fifteen years This has been due to significant theoretical advances in our understanding of ANNs and FL complemented by major technological developments in high speed computing In geophysics ANNs and FL have enjoyed significant success and are now employed routinely in the following areas amongst others 1 Exploration Seismology a Seismic data processing trace editing first break picking deconvolution and multiple suppression wavelet estimation velocity analysis noise identification reduction statics analysis dataset matching prediction attenuation b AVO analysis c Chimneys d Compression I dimensionality reduction e Shear wave analysis f Interpretation event tracking lithology prediction and well log analysis prospect appraisal hydrocarbon prediction inversion reservoir characterisation quality assessment tomography 2 Earthquake Seismology and Subterranean Nuclear Explosions 3 Mineral Exploration 4 Electromagnetic I Potential Field Exploration a Electromagnetic methods b Potential field methods c Ground penetrating radar d Remote sensing e inversion

Music, Passion, and Cognitive Function Leonid Perlovsky, 2017-02-25 Music Passion and Cognitive Function examines contemporary cognitive theories of music why they cannot explain music's power over us and the origin and evolution of music The book presents experimental confirmations of the theory in psychological and neuroimaging research discussing the parallel evolution of consciousness musical styles and cultures since Homer and King David In addition it explains that in much wisdom is much grief due to cognitive dissonances created by language that splits the inner world Music enables us to survive in this sea of grief overcomes discomforts and stresses of acquiring new knowledge and unifies the soul hence the power of music Provides a foundation of music theory Demonstrates how emotions motivate interaction between cognition and language Covers differentiation and synthesis in consciousness Compares the parallel evolution of music and cultures Examines the idea of music overcoming cognitive
