Physical Management for Neurological Conditions E-Book Sheila Lennon, Gita Ramdharry, Geert Verheyden, 2023-10-04 Physical Management for Neurological Conditions comprehensively covers the essentials of neurorehabilitation starting with thirteen guiding principles and a new chapter on clinical reasoning and assessment It discusses the physical management of common neurological conditions such as stroke traumatic brain injury spinal cord injury multiple sclerosis and Parkinson's followed by less common conditions such as inherited neurological conditions motor neuron disease polyneuropathies and muscle disorders Produced by a team of international editors and experts this fifth edition is the most up to date evidence based textbook available for undergraduate students and qualified health professionals alike focusing on selecting appropriate

evidence based tools rather than subscribing to any specific treatment approaches It is a core physiotherapy textbook designed to provide students with everything they need to pass the neurological component of their degree Fully updated to provide comprehensive information on optimal physical management within movement limitations suitable for any health care context or environment Using international case studies to apply theory to clinical practice Easy to navigate and understand for students new graduates and therapists returning to practice or changing scope of practice New content on assessment clinical reasoning technology based rehabilitation and complex case management including disorders of consciousness and adults with cerebral palsy Full update of the evidence base within each chapter including reference to the increased use of remote delivery of services and challenges accelerated by the Covid 19 pandemic New international authors

Neuroethical Policy Design Dana Lee Baker,Raquel Lisette Baker,2022-03-01 This volume focuses on the emergent field of neuroethics comparing and contrasting how two democracies Canada and the United States have begun adapting public policy design to better fit human minds The book focuses on issues relevant to all members of the general population and discusses a series of policy issues arranged roughly in the order in which they become relevant in a typical person s lifetime After the introductory chapter each chapter considers an area of public policy particularly relevant to a different stage of life from early childhood education policy to policies for higher education and the workplace to end of life decisions in living wills and advance directives The author puts forth that making the shift towards more neurologically appropriate policy will likely be a gradual process hampered primarily by two issues The first is the inability of neuroscientists to come to agreement on increasingly sophisticated research findings The second issue points out that bringing policy and neurology into a more synchronous relationship requires a commitment to prolonged effort involves the largely unrecognized reality of entrenched neurological interests The first chapter introduces the concept of disconnect between policy design with traditional understandings of the brain and goes on to highlight developments in the science of human neurology in recent years To help contextualize the book examples of neurological misperceptions are explored in this introductory chapter Chapters Two through Eleven each explores a specific type of policy incorporating understandings of the human brain which modern neuroscience suggests are debatable

Educational Innovation in Economics and Business Administration: Wim H. Gijssels,Dirk T. Tempelaar,Piet K. Keizer,Jos M. Blommaert,Eugene M. Bernard,Hans Kasper,2013-03-09 During the last few years economics and business education have emerged as one of the largest fields of study in higher education At the same time the pressing concern for improving the quality of higher education has led to a definite need for more knowledge about effective instruction and innovation in economics and business education The book brings together many examples of reform in economics and business education Special attention is paid to the problem based learning approach which over the past ten years has developed as a very important innovation in higher education The book contains contributions from a variety of institutions on the necessity of curriculum reform the choice of instructional methods assessment and testing and management of change It is of interest for teachers in higher education educational psychologists and any person interested in educational innovation in economics and business administration Landmark Papers in Neurology Martin R. Turner,Matthew C. Kiernan,2015-08-20 Current understanding of neurological disease has been evolving over the past 150 years With the increasing and earlier sub specialization of neurology trainees and their variable exposure to higher academic study there is

little opportunity to put this development into a historical context as a whole Understanding the evidence base or appreciating the lack of it in some cases is an important part of training but this is rarely presented in a palatable entertaining form Part of the Landmark Papers in series this book brings together the ten most important papers for each sub speciality within neurology covering the full range of major neurological conditions Papers have been selected by leading international experts who not only summarize what each paper showed but place them into a wider context that makes a coherent story of how their sub speciality has developed
