AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope *AI Aesthetics* *AI Generated Images between Artistics and Aisthetics* will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Emerging Trends, Global Perspectives, and Systemic Transformation in AI Wang, Viktor, 2025-08-06 As AI continues to evolve emerging trends are reshaping industries societies and educational systems From intelligent tutoring systems and data driven policy AI influence is both expansive and profound Viewing these developments through a global lens reveals diverse approaches to AI adoption shaped by cultural economic and political contexts At the same time the integration of AI calls for systemic transformation challenging institutions to rethink structures governance and ethical frameworks Understanding these intersecting dynamics is key to navigating the future of AI in a way that is inclusive responsible and sustainable *Emerging Trends Global*

Perspectives and Systemic Transformation in AI examines how emerging trends in AI are reshaping education systems around the world. It offers global perspectives on the transformative potential of AI to enhance learning equity and institutional change. Covering topics such as 3D design, formative assessment and vocational education, this book is an excellent resource for educators, researchers, administrators, policy makers, instructional designers, academicians and more. **c't Working with AI** c't-Redaktion, 2024-01-24. The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training and at work help to exploit opportunities and minimise risks. **Design Studies and Intelligence Engineering** Valentina Emilia

Balas, Qun Wu, 2024-02-15. The discipline of design studies applies various technologies from basic theory to application systems, while intelligence engineering encompasses computer-aided industrial design, human factor design and greenhouse design and plays a major part within design science. Intelligence engineering technologies also include topics from theory and application such as computational technologies, sensing technologies and video detection. This book presents the proceedings of DSIE2023, the 2023 International Symposium on Design Studies and Intelligence Engineering, held on 28-29 October 2023 in Hangzhou, China. The conference provides a platform for professionals and researchers from industry and academia to present and discuss recent advances in the fields of design studies and intelligence engineering. It also fosters cooperation among the organizations and researchers involved in these overlapping fields and invites internationally renowned professors to further explore these topics in some depth, providing the opportunity for them to discuss the technical presentations with conference participants. In all, 275 submissions were received for the conference, 105 of which were accepted after thorough review by 3 or 4 referees for presentation at the conference and inclusion here. Providing a valuable overview of the latest developments, the book will be of interest to all those working in the fields of design studies and intelligence engineering.

AI-generated Content Feng Zhao, Duoqian Miao, 2023-11-01. This book constitutes the revised selected papers of the First International Conference AIGC 2023, held in Shanghai, China, during August 25-26, 2023. The 30 full papers included in this volume were carefully reviewed and selected from 62 submissions. The volume focuses on the remarkable strides that have been made in the realm of artificial intelligence and its transformative impact on content creation. As delving into the content of the proceedings, the readers will encounter cutting-edge research findings, innovative applications and thought-provoking insights that underscore the transformative potential of AI-generated content. **AI in Social Studies**

Cultural Robotics: Social Robots and Their Emergent Cultural Ecologies Belinda J. Dunstan, Jeffrey T. K. V. Koh, Deborah Turnbull Tillman, Scott Andrew Brown, 2023-05-11 This edited collection approaches the field of social robotics from the perspective of a cultural ecology fostering a deeper examination of the reach of robotic technology into the lived experience of diverse human populations as well as the impact of human cultures on the development and design of these social agents To address the broad topic of Cultural Robotics the book is sectioned into three focus areas Human Futures Assistive Technologies and Creative Platforms and their Communities The Human Futures section includes chapters on the histories and future of social robot morphology design sensory and sonic interaction with robots technology ethics material explorations of embodiment and robotic performed sentience The Assistive

Technologies section presents chapters from community led teams and researchers working to adopt a strengths based approach to designing assistive technologies for those with disability or neurodivergence. Importantly this section contains work written by authors belonging to those communities. Creative Platforms and their Communities looks to the creative cross disciplinary researchers adopting robotics within their art practices those contributing creatively to more traditional robotics research and the testing of robotics in non traditional platforms such as museum and gallery spaces. Cultural Robotics Social Robots and their Emergent Cultural Ecologies makes a case for the development of social robotics to be increasingly informed by community led transdisciplinary research to be decentralised and democratised shaped by teams with a diversity of backgrounds informed by both experts and non experts and tested in both traditional and non traditional platforms. In this way the field of cultural robotics as an ecological approach to encompassing the widest possible spectrum of human experience in the development of social robotics can be advanced.

Future-Ready Teaching With AI Aaron Blackwelder, Jason Cowley, 2024-12-18 Prepare your students for a future where AI literacy is crucial. Artificial intelligence AI is here and seems on the brink of transforming education. As teachers we know that AI will not diminish the need for students to learn essential skills. It will however change how we teach and will require us to develop new skill sets for instruction and assessment. Teachers have a new opportunity to embrace future ready instruction that prepares students to engage in a world that expects them to be AI literate. In Future Ready Teaching With AI Unlocking Student Potential in the Age of Artificial Intelligence authors Aaron Blackwelder and Jason Cowley explore the integration of AI in the classroom and its potential to revolutionize teaching. Much more than simply a book about using AI tools this rich resource aims to help teachers raise rigor increase engagement and promote more meaningful learning opportunities in their classrooms as they embrace the future of teaching and learning. Offering evergreen principles and strategies to help educators navigate the age of AI this book encourages critical thinking about the ethical use of AI to foster conversations with students. Highlights various practical tools that can help teachers meet diverse student learning needs as well as create AI proof assignments. Includes chapter vignettes sample AI prompts activities reflective questions and links to online resources to support teachers work in the classroom. Examines how to leverage AI to streamline rudimentary tasks such as lesson planning assessment and differentiation allowing teachers to focus on building relationships providing feedback and personalizing learning for their students. Written by two secondary teachers this book is an essential resource for K 12 teachers and administrators looking to move beyond the basics of using AI. By equipping educators to become leaders in this transformation Future Ready Teaching With AI demonstrates how to harness the power of AI to help every student thrive.
