College Rankings Latest Returns:

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

The Return of Inequality Mike Savage, 2021-05-18 Sociologist Mike Savage shows how economic inequality aggravates cultural social and political conflicts challenging the framework of liberal democracy By fracturing social bonds inequality turns back the clock reviving conditions we have struggled for centuries to escape including empire dynastic elitism and explosive ethnic division

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

in London (and other great towns). Registrar-general,1882 *Global Rankings and the Geopolitics of Higher Education* Ellen Hazelkorn,2016-11-18 Global rankings and the Geopolitics of Higher Education is an examination of the impact and influence that university rankings have had on higher education policy and public opinion in recent years Bringing together some of the most informed authorities on this very complex issue this edited collection of specially commissioned chapters examines the changes affecting higher education and the implications for society and the economy Split into four interrelated sections this book covers The development of rankings in higher education how they have impacted upon both the production of knowledge and its geography and their influence in shaping policymaking Overviews of the significance of rankings for higher education systems in Europe Asia Africa Russia South America India and North America An analysis of rankings in relation to key concerns that pervade contemporary higher education Examination of the role rankings are likely to play in the future directions for higher education This is a significant scholarly work that analyses in depth an important development in higher education systems and which is likely to have an important influence upon how we understand the higher education policy making process past present and future It provides new analysis and conceptual understanding for researchers and firm evidence for policy makers to use when addressing the value of rankings in measuring the quality of their institutions Besides bringing together a powerful cast of academics this book incorporates contributions from heads of important international higher education organisations from both those involved in making and also in administering key decisions This timely reflective and accessible book forms crucial reading for those studying the subject of rankings as well as the broader implications and unintended consequences of rankings on national higher education policies Extending beyond academic researchers and students this book will also be of significant interest to policymakers higher education leaders and key stakeholders **Kiplinger's Personal Finance** ,2007-08 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics Academic Capitalism Richard Münch,2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of

resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution Higher Education Accountability Robert Kelchen,2018-02-27 Beginning with the earliest efforts to regulate schools the author reveals the rationale behind accountability and outlines the historical development of how US federal and state policies accreditation practices private sector interests and internal requirements have become so important to institutional success and survival **University Rankings, Diversity, and the New Landscape of Higher Education** ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector

Malaysia's Leap Into the Future Rajah Rasiah,Kamal Salih,Cheong Kee Cheok,2022-03-21 This book presents the future development of Malaysia It puts together building blocks to achieve a better future These blocks are poverty and income inequality population demography and urbanization growth and technological progress education human capital and skills finance labor the environment and health care It examines the reasons for the decline in the agricultural sector with an emphasis on food security It discusses Malaysia s economic growth and structural change compared to some of the Northeast East Asian and Southeast Asian countries It explains the projections of population and demographic change and its bearing on government policies It evaluates the country s education sector and discusses the strategies to improve its role in the country further It argues for replacing ethnic based approaches with a needs based system for the future direction to build a plural Malaysia This insightful book is of interest across several fields including demography economic development and urbanization **A Return to Normalcy?** Larry J. Sabato,Kyle Kondik,J. Miles Coleman,2021-03-17 Up close Inauguration Day 2021 looked like any other the chief justice of the US Supreme Court administering the oath of office to the new president on the steps of the U S Capitol But pull the lens back and this was anything but a typical election and transition of

power In A Return to Normalcy Larry Sabato Kyle Kondik and J Miles Coleman bring together respected journalists analysts and scholars to examine every facet of the stunning 2020 election and its aftermath and how these events will impact American politics moving forward In frank accessible prose each author offers insight that goes beyond the headlines and dives into the underlying forces and shifts that drove the election from its earliest developments to its chaotic conclusion A Return to Normalcy is an indispensable read for political junkies and all students of American politics
