

Financial Aid Package COMPARISON WORKSHEET

The amount of financial aid you receive will depend on the price of the school and the amount that you and your family are expected to contribute. The difference between the **total price of attendance** and your **expected family contribution** is your **financial need**. To meet this need, the financial aid administrator puts together a package from various sources—beginning with federal, state or institutional grants and scholarships and then with work study and loans. The total amount of aid will depend on the availability of funds as well as state and school policies.

Instructions

To determine the price of attendance, talk with admissions and financial aid administrators at the schools that interest you.

To determine your family's expected contribution, use our online **Financial Aid Estimator** (www.getreadyforcollege.org). While not a substitute for the Free Application for Federal Student Aid (FAFSA), the Estimator will give you a general idea about how much aid you may receive. The FAFSA still must be completed to apply for aid.

Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 1978 [Money, Work, and Crime](#) Peter H. Rossi, Richard A. Berk, Kenneth J. Lenihan, 2013-09-03 Money Work and Crime Experimental Evidence presents the complete details of the Department of Labor s 3 4 million Transitional Aid Research Project TARP a large scale field experiment which attempted to reduce recidivism on the part of ex felons Beginning in January 1976 some prisoners released from state institutions in Texas and Georgia were offered financial aid for periods of up to six months post release Payments were made in the form of Unemployment Insurance benefits The ex prisoners who were eligible for payments were compared with control groups released at the same time from the same institutions The control groups were not eligible for benefits The assumption that modest levels of financial help would ease the transition from prison life to civilian life was partially supported Ex prisoners who received financial aid under TARP had lower rearrest rates than their counterparts who did not receive benefits and worked comparable periods of time Those receiving financial aid were also able to obtain better paying jobs than the controls However ex prisoners receiving benefits took longer to find jobs than those who did not receive benefits The TARP experiment makes a strong contribution both to an important policy area the reduction of crime through reducing recidivism and to the further development of the field and experiment as a policy research instrument **Notes**
