Matuszek,2025-10-31 Das Thema Fakes vs Realit t ist ein komplexes und vielschichtiges Thema das sowohl aus historischer als auch aus politologischer Sicht

betrachtet wird Es geht um die Wechselwirkung zwischen Wahrheitsanspruch und Fälschung sowie um die gesellschaftliche und politische Funktion von Fake News Propaganda und Desinformation Historisch und politologisch betrachtet ist das Zusammenspiel zwischen Fälschung und Realität ein fortwährendes Phänomen das tief in den Machtstrukturen von Gesellschaften verankert ist In der Vergangenheit wie auch heute sind es vor allem die Akteure an den Schnittstellen von Macht Medien und Technologie die die Wahrnehmung der Realität bestimmen Der Einfluss von Fake News und Desinformation in der digitalen Ära zeigt wie wichtig es ist kritisch zu bleiben und Medienkompetenz zu fördern um in einer Welt voller alternativer Fakten und manipulierter Wahrheiten navigieren zu können

Doing Digital Methods Richard Rogers, 2024-01-05 Cutting edge guide to applying the latest advancements in digital methods to social research Living with Algorithms Ignacio Siles, 2023-04-25 A nuanced account from a user perspective of what it's like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In *Living with Algorithms* Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us *Living with Algorithms* clarifies the debate over the future of datafication and whether we have a say in its development Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies

FAKES vs REALITY J.G. Matuszek, 2025-10-31 Why Fakes Are More Than Just False News Fakes are no longer just crude falsehoods circulating in the digital space They have evolved into complex tools of manipulation subtle emotionally charged and ideologically loaded Their forms are diverse fake news deepfakes manipulated studies fake profiles political propaganda distorted statistics or artificially generated opinions by bots Despite their differences they all share a common goal to sow confusion undermine trust and influence power structures In a world where information circulates globally the distinction between knowledge and understanding has become a matter of survival Knowledge alone is not enough it must be contextualized reflected upon and questioned Understanding means recognizing connections uncovering motives and interpreting narratives Anyone who reduces fakes to simple factual errors underestimates their true impact They do not merely operate at the level of information but infiltrate deep into emotional and societal frameworks
