The Biggest Bluff Maria Konnikova, 2020-06-23 A New York Times bestseller A New York Times Notable Book The tale of how Konnikova followed a story about poker players and wound up becoming a story herself will have you riveted first as you learn about her big winnings and then as she conveys the lessons she learned both about human nature and herself The Washington Post It's true that Maria Konnikova had never actually played poker before and didn't even know the rules when she approached Erik Seidel Poker Hall of Fame inductee and winner of tens of millions of dollars in earnings and convinced him to be her mentor But she knew her man a famously thoughtful and broad minded player he was intrigued by her pitch that she wasn't interested in making money so much as learning about life She had faced a stretch of personal bad luck and her reflections on the role of chance had led her to a giant of game theory who pointed her to poker as the ultimate master class in learning to distinguish between what can be controlled and what can't And she certainly brought something to the table including a Ph.D. in psychology and an acclaimed and growing body of work on human behavior and how to hack it So Seidel was in and soon she was down the rabbit hole with him into the wild fiercely competitive overwhelmingly masculine world of high stakes Texas Hold'em their initial end point the following year's World Series of Poker But then something extraordinary happened Under Seidel's guidance Konnikova did have many epiphanies about life that derived from her new pursuit including how to better read not just her opponents but far more importantly herself how to identify what tilted her into an emotional state that got in the way of good decisions and how to get to a place where she could accept luck for what it was and what it wasn't But she also began to win And win In a little over a year she began making earnest money from tournaments ultimately totaling hundreds of thousands of dollars She won a major title got a sponsor and got used to being on television and to headlines like How one writer's book deal turned her into a professional poker player She even learned to like Las Vegas But in the end Maria Konnikova is a writer and student of human behavior and ultimately the point was to render her incredible journey into a container for its invaluable lessons The biggest bluff of all she learned is that skill is enough Bad cards will come our way but keeping our focus on how we play them and not on the outcome will keep us moving through many a dark patch until the luck once again breaks our way

James Leighton, 2013-11-07 Daniel Tzvetkoff was just another Brisbane teenager working for peanuts at Pizza Hut and spending much of his spare time glued to his computer. When he worked out a new method of payment processing the online poker companies came running to him for help so they could grow their businesses. Soon he was living the American dream raking in 3 million a week and revelling in a jet set lifestyle of fast cars, luxury yachts and VIP nightclubs. His epic rollercoaster ride mirrored the extraordinary world of online poker where hot shot college students won millions from the confines of their dorms and fortunes were won and lost. However Tzvetkoff's move to the bright lights of Las Vegas would soon see him facing the abyss. Owing millions to the poker companies and with the FBI hot on his trail, the boy wonder needed to pull an ace from his sleeve to keep from busting out. And when he did it resulted in a day that sent shockwaves through the world of online poker and saw him take the blame. [The Literary World](#), 1893. [On This Day in California History](#). The International Bestseller by The Galileo of number crunchers. Independent. Every time we choose a route to work, decide whether to go on a second date or set aside money for a rainy day, we are making a prediction about the future. Yet from the financial crisis to ecological disasters, we routinely fail to foresee hugely significant events, often at great cost to society. The rise of big data has the potential to help us predict the future, yet much of it is misleading, useless or distracting. In *The Signal and the Noise*, the New York Times political forecaster Nate Silver, who accurately predicted the results of every state in the 2012 US election, reveals how we can all develop better foresight in an uncertain world. From the stock market to the poker table, from earthquakes to the economy, he takes us on an enthralling insider's tour of the high stakes world of forecasting, showing how we can all learn to detect the true signals amid a noise of data. Introduced shortly after the United States declared its independence, poker's growth and development has paralleled that of America itself. As a gambling game with mass appeal, poker has been played by presidents and peasants at kitchen tables and formal tables for matchsticks and millions. First came the hands, then came the stories, some true, some pure bluffs, and many in between. In *Poker Pop Culture: Telling the Story of America's Favorite Card Game*, Martin Harris shares these stories while chronicling poker's progress from 19th century steamboats and saloons to 21st century virtual tables online, including Poker on the Mississippi, Poker in the Movies, Poker in the Old West, Poker on the Newsstand, Poker in the Civil War, Poker in Literature, Poker on the Bookshelf, and Poker in Music.
