departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet Engines of Anxiety shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways *Westminster and Foreign Quarterly Review* ,1866

Pharmaceutical Record and Weekly Market Review P. W. Bedford,1890 **Higher Education, Policy, and the Global Competition Phenomenon** V. Rust,L. Portnoi,S. Bagley,2010-03-29 This book inquires about the processes through which different higher education systems have determined national higher education policies related to competitiveness as well as the strategies they have adopted to enhance their global competitiveness
