Texas vs. California Kenneth P. Miller, 2020-07-14 Texas and California have become leaders of Red and Blue America The book explores why these two powerful states have joined the rival camps It then describes how they have used competing red and blue policy models to create sharply contrasting policies across a broad range of issue areas Texas and California have also mobilized coalitions of red and blue states to influence federal policy The book concludes by assessing the two models strengths vulnerabilities and future prospects The rivalry between these states and their allies will likely continue for the foreseeable future the challenge for the nation is turn the competition to productive ends

Aviation Cost Allocation Study ,1972 *Optimal Redistributive Taxation* Matti Tuomala, 2016-01-21 Tax systems raise large amounts of revenue for funding public sector s activities and tax transfer policy together with public provision of education health care and social services play a crucial role in treating the symptoms and the causes of poverty The normative analysis is crucial for tax transfer design because it makes it possible to

assess separately how changes in the redistributive criterion of the government and changes in the size of the behavioural responses to taxes and transfers affect the optimal tax transfer system Optimal tax theory provides a way of thinking rigorously about these trade offs Written primarily for graduate students and researchers this volume is intended as a textbook and research monograph connecting optimal tax theory to tax policy It comments on some policy recommendations of the Mirrlees Review and builds on the authors work on public economics optimal tax theory behavioural public economics and income inequality The book explains in depth the Mirrlees model and presents various extensions of it The first set of extensions considers changing the preferences for consumption and work behavioural economic modifications such as positional externalities prospect theory paternalism myopic behaviour and habit formation but also heterogeneous work preferences besides differences in earnings ability The second set of modifications concerns the objective of the government The book explains the differences in optimal redistributive tax systems when governments instead of maximising social welfare minimise poverty or maximise social welfare based on rank order or charitable conservatism social welfare functions The third set of extensions considers extending the Mirrlees income tax framework to allow for differential commodity taxes capital income taxation public goods provision public provision of private goods and taxation commodities that generate externalities The fourth set of extensions considers incorporating a number of important real word extensions such as tagging of tax schedules to certain groups of tax payers In all extensions the book illustrates the main mechanisms using advanced numerical simulations

Highway Revenue Act of 1956 United States. Congress. House. Committee on Ways and Means,1956 How Does Taxation Affect Hours Worked in EU New Member States? Agustin Velasquez, Svetlana Vtyurina,2019-06-17 Hours worked vary widely across countries and over time In this paper we investigate the role played by taxation in explaining these differences for EU New Member States By extending a standard growth model with novel data on consumption and labor taxes we assess the evolution of trends in hours worked over the 1995-2017 period We find that the inclusion of tax rates in the model significantly improves the tracking of hours We also estimate the elasticity of hours and its different margins to quantify the deadweight loss introduced by consumption and labor taxes We find that these taxes explain a large share of labor supply differences across EU New Member States and that the potential gains from policy actions are noteworthy
