Dillon,2019-08-08 This book takes readers on a tour of a day in the life of a public elementary school in an effort to give parents and other stakeholders a sense of the realities of the classroom The tour reveals ten

worrisome things about today's schools and considers what to do about them Dillon emphasizes the need for future schools to be places filled with adventure and high purpose with classrooms small enough to waste only a minimum of time They should be free from stifling levels of bureaucracy supervised by rotating teacher administrators rather than career managers The book asserts that schools should be staffed by scholarly and engaged teaching professionals dedicated to helping students live a healthy adult life in a democracy rather than imposing a one size fits all furiously assessed college prep curriculum on everyone In all Dillon argues schools should be places with classrooms of narrow ability ranges dedicated to teaching a coherent curriculum all in a context of full buy in and support from students families Let's go inside today's elementary schools

Now It's Inescapable Bill McCausland, 2018-03-12 He became self-deceptive and then had a realization Dr Glen Coyle used to be an artist at what he does In his office is a hand sculpture given by a patient whose hand he reattached These days though Glen is doing his best to keep his hands from shaking He's on the run constantly from pharmaceuticals he's supposed to be prescribing for his patients His wife is about to leave him The DEA comes to pay him a visit But when he's called before the hospital board he knows his days of running wild have careened out of control Now It's Inescapable is a timely recovery story about a man in desperate search of love and oblivion in equal measure Glen will do anything to avoid facing himself and the title of the novel becomes a repeating mantra each time he gets cornered with himself and then ducks away Glen is very good at wiggling out Even after he's ordered to rehab he takes off on a disastrous bolt to Baja California that takes him to the brink of self-destruction He has hit the proverbial bottom Gradually Glen faces the unresolved issues of his past his neglectful and distant mother his abusive military father his war experiences in Iraq as a trauma surgeon and the biggest gorilla in his living room his addiction Once Glen fully commits to this fateful step the world around him slowly reshapes to his new perspective the plastic surgery has its positive uses he feels more empathic with his patients he has embarked on a promising new relationship that he must take slowly In the closing scenes Glen and his sponsor do a medical mission to Guatemala and his tormented past is transformed into his best asset

Vaage, 2021-08-05 This book examines intelligence analysis in the digital age and demonstrates how intelligence has entered a new era While intelligence is an ancient activity the digital age is a relatively new phenomenon This volume uses the concept of the digital age to highlight the increased change complexity and pace of information that is now circulated as new technology has reduced the time it takes to spread news to almost nothing These factors mean that decision makers face an increasingly challenging threat environment which in turn increases the demand for timely relevant and reliable intelligence to support policymaking In this context the book demonstrates that intelligence places greater demands on analysis work as the traditional intelligence cycle is no longer adequate as a process description In the digital age it is not enough to accumulate as much information as possible to gain a better understanding of the world To meet customers needs the intelligence process must be centred around the analysis work which in turn has increased the demand for analysts Assessments not least predictions are now just as important as revealing someone else s secrets This volume will be of much interest to students of intelligence studies security studies and international relations
