The Materiality of Narrative Dynamics Stefan Iversen,Evan Van Tassell,2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled

Hierfür steht eine Vielzahl an Plattformen wie Facebook, Twitter, YouTube, Pinterest oder LinkedIn zur Verfügung. Ein Dienst, der sich in den letzten Jahren großer Beliebtheit erfreut, hat ist die Foto-Plattform Instagram. Viele Unternehmen folgen bereits dem Hype um Instagram und sind hier vertreten. Allein im Jahr 2017 wurden innerhalb von nur sechs Monaten 17 Millionen Instagram-Businessprofile neu angelegt. Damit verzeichnet Instagram 25 Millionen Unternehmensprofile weltweit. Auch auf der Nutzerseite ist ein Anstieg zu verzeichnen. Laut Statistiken folgen circa 80 Prozent der Nutzer einem Unternehmen auf Instagram. Doch wieso ist dies so?

Language Varieties on Social Media. Different Word-Formation Processes and Their Definitions Farisa Chamajewa, 2021-09-21 Seminar paper from the year 2021 in the subject English Language and Literature Studies Linguistics grade 0 Klagenfurt University language English abstract The following paper aims to analyze the language that is used on social media. With word formation processes as an umbrella term, the linguistic features which are part of digital communication will be listed. The first chapter will introduce the term social media and English as the lingua franca of digital communication. The next chapters will discuss the focus of the paper, namely different word formation processes and their definitions. With the help of secondary sources, each chapter will provide examples of daily written English on social networks. The paper concludes with a final summary and thoughts on the subject. This research paper discusses the different language varieties of social media with a deeper focus on word formation processes. Living in the digital era, the way people communicate has changed during the last decades. Traditional communicating patterns developed in a way that allows people to stay in their homes and make use of their technical devices to connect with others. Writing letters and going out to meet partners is outdated nowadays. As English is the lingua franca of the Internet in general, it is also used in social media by most of the users. Long distance relationships with one partner being an English speaking country and the other one in a non-anglophone country also add to the fact that they communicate in English. The main question is how social media has changed the way people communicate in anglophone countries. It is very important to observe this topic because English is known as a language that changes constantly. Especially in social media, there are varieties of English that are used to communicate in the chat room or the comment section.
