web sep 28 2022 i write down balanced molecular equations for the chemical changes ii write down the number of moles below the formula of each of the reactants and products iii write down the relative masses of the reactants and products with the help of formula below the respective formula these shall be the theoretical amounts of reactants and mole mass and mass mass calculations introductory - May 18 2022

web recall that the molar mass can be determined from a chemical formula and used as a conversion factor we can add that conversion factor as another step in a calculation to make a mole mass calculation where we start with a given number of moles of a substance and calculate the mass of another substance involved in the chemical equation or vice
