DiMaggio, 2017-02-21 Tracking the effects of media content on the public is a difficult endeavor and media effects vary on a subject to subject basis To address this challenge *The Politics of Persuasion* employs a multifaceted mixed method approach to studying mass media and public attitudes Anthony R DiMaggio analyzes more than a dozen case studies covering US domestic economic policy and examines a wide range of theories of how bias operates in mass media with regard to coverage of these issues While some research claims that journalists are overly negative and biased against government officials some reveals that journalists favor citizens groups Still other studies contend there is a liberal bias in the media a progovernment bias or a bias in favor of advertisers and business interests Through his analysis DiMaggio is the first to systematically examine all of these competing interpretations He concludes that reporters tailor stories to corporate and government interests but argues that the ability to manufacture consent from the public in favor of these elite views is far from guaranteed According to DiMaggio citizens often make use of their own personal experiences and prior attitudes to challenge official narratives Kiplinger's Personal Finance , 2006-02 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics
