Humanities provides an introduction to mathematics and programming that is specifically designed for use by those engaged
in the humanities Linking mathematical concepts and computational skills the chapters in this book explore humanistic
questions from diverse fields such as art history and literature The book helps to advance computational and digital literacy
by showing that each mathematical concept has a history and each technique has a meaning Rather than viewing
mathematics and computer programming as purely instrumental they are integrated into the process of achieving greater
understanding of humanistic phenomena Algorithms data statistics and networks are taught critically within the book whilst
the authors also make a concerted effort to expose the internal biases of these tools They also demonstrate the applicability
of quantification and computation for the promotion of diversification and inclusivity within the humanities All exercises are
designed as an opportunity to gain hands on mathematical and computational experience whilst critically exploring and
interpreting humanistic phenomena Computational Literacy for the Humanities shows readers how to engage with data in a
way that is challenging yet meaningful and empowering It will be of interest to scholars and students working across the
humanities and should be of particular interest to those working in digital humanities
