Watch Me Play T. L. Taylor, 2018-10-16 A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch which reaches more than one hundred million viewers a month In these new platforms for interactive entertainment big esports events featuring digital game competitors live stream globally and audiences can interact with broadcasters and each other through chat in real time What are the ramifications of this exploding online industry Taking readers inside home studios and backstage at large esports events Watch Me Play investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences Through extensive interviews and immersion in this gaming scene T L Taylor delves into the inner workings of the live streaming platform Twitch From branding to business practices she shows the pleasures and work involved in this broadcasting activity as well as the management and governance of game live streaming and its hosting communities At a time when gaming is being reinvented through social media the potential of an ever growing audience is transforming user generated content and alternative distribution methods These changes will challenge the meaning of ownership and intellectual property and open the way to new forms of creativity The first book to explore the online phenomenon Twitch and live streaming games Watch Me Play offers a vibrant look at the melding of private play and public entertainment

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any

knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website blocking laws have emboldened copyright owners while suppressing end users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.

The Oxford Handbook of American Documentary Joshua Glick, Visiting Associate Professor of Film & Electronic Arts Joshua Glick, Patricia Aufderheide, University Professor in the School of Communication Patricia Aufderheide, 2025 Joshua Glick and Patricia Aufderheide Over the past twenty years, documentaries have taken on an increasingly central place in American public life. One measure of their importance is their commercial value. Major media companies have moved aggressively to monetize documentary, exploiting the form's relatively low budgets compared to fiction.

Pivoting and Producing for Online TV Alexa Scarlata, 2025-05-02 The introduction and diffusion of international subscription video on demand (SVOD) services in the 2010s represented the most significant disruption of established national broadcast and pay TV ecologies in their long history. Using an in-depth Australian case study, this book narrates this profound period of proliferation. It also considers how incumbent commercial networks, pay TV providers, and public service broadcasters developed into online TV providers, albeit in assorted ways. In so doing, it conceives of the early impact of online TV in 2015–2020 more broadly and acknowledges the role of both new and old TV players. The industry-wide shift towards online TV over this period also impacted existing television drama production cultures. SVOD services provided a fruitful avenue for the distribution of existing archives and slowly began to support the production of new Australian content with an increasingly global focus. However, the formal arrival of online TV certainly did not usher in the boom in original local television drama many anticipated.

Pivoting and Producing for Online TV: Australia's Transition advances the macro analysis of television production strategies. This book will be useful to students and researchers interested in media, film, and cultural studies.
