lecturer Robert Siegel brings the digital innovation conversation back down to earth. He shows that while important, digital is only part of the answer and it's never the only answer. The vast majority of successful leaders from both incumbents and disruptors focus as much on things like logistics, manufacturing, and distribution as they do on digital innovation. In fact, many established companies are successfully countering young upstarts in other creative ways, and many new organizations are learning from their older brethren. Siegel shows how to create lasting profits and growth in the smartest way possible by creating a solid partnership between digital innovation and traditional business operations. In other words, by marrying brains and brawn. He lays out the core competencies that today's industry leaders have mastered and explains how Charles Schwab uses cutting-edge analytics to better serve millions of investors without violating its original code of values. Align Technology transformed orthodontia by developing creative new business models along with new products. Kaiser Permanente taps into the power of empathy to improve patient satisfaction while controlling costs. Instacart balances ownership and partnerships to balance the needs of four key constituencies. Target, Best Buy, and Home Depot found different ways to blend the best aspects of physical retail with innovative e-commerce. Desktop Metal is innovating high-volume yet affordable production methods that can revolutionize manufacturing. Filled with original research and case studies of Daimler, 23andMe, Instacart, AB InBev, Google, and many other companies, *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides practical, proven insights and advice for bridging the gulf between digital vs. physical, disruptor vs. incumbent, startup world vs. Fortune 500, and tech culture vs. industrial culture. *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides everything you need to set your company apart from your competitors in real and measurable ways and take the lead in your industry for years to come. [Nothing But Net: 10 Timeless Stock-Picking Lessons from One of Wall Street's Top Tech Analysts](#) Mark Mahaney, 2021-11-09. Find the winners, avoid the losers, and build a solid Tech portfolio for the long run with proven methods from legendary analyst Mark Mahaney. The Tech industry is the stock market's hottest, most profitable sector, but it can be a roller coaster ride. Companies with great ideas can end up going nowhere, and some that dominate today will be sold at fire-sale prices in five years. Sure, things can become sore things very rapidly. *Nothing But Net* provides the knowledge and insights you need to understand what's really hot, to know what's not, and to outperform other investors consistently and decisively. Famous for his smart, savvy, and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long-term Tech stock investor, explaining everything he's learned during almost 25 years of analyzing internet stocks, including why revenue growth and customer metrics, not earnings, are what matter most to Tech investors. How to invest, not trade, in the great growth opportunities that lie ahead. How to determine when high valuations are a warning sign and when they signal an opportunity. I've watched the rise of some of the leading companies of today: Facebook, Amazon, Netflix, Google, and the fall of some of the leading companies of yesterday: Yahoo, eBay, and AOL. Mahaney writes, "Figuring out which companies really are

going to be dominant franchises is an extremely hard thing to do But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation Nothing But Net provides powerful advice for the next two decades lessons you can start applying today and use for years to come *The Parliamentary*
