World University Rankings: Statistical Issues And Possible Remedies Kay Cheng Soh, 2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum to process the indicator data Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy **The Global Academic**

found virtually everywhere The Idea of the University Debaditya Bhattacharya,2018-09-03 What is this idea of the university Why does it need to be defended Does the work of defense preclude the task of rearranging the idea itself Drawing on these essential questions this volume traces the historical transformations of the university in medieval Europe and explores current debates on its existence and sustenance in a neoliberal India It challenges the liberal humanist ideal of academic exchange to inquire into long befuddled debates on the true nature of the modern university Along with its companion *The University Unthought Notes for a Future* this brave new intervention makes a compelling foray into the political future s of the university It will be of interest to academics educators and students of the social sciences and humanities especially education It will also be of use to policy makers and education analysts and central to the concerns of any citizen *Continuing the Revolution* John Bryan Starr,2015-03-08 The author investigates the internal logic and evolution of Mao s theory in terms of various themes Beginning with a consideration of conflict which in Mao s view is a given and permanent component of society Professor Starr then takes up the individual concepts of knowledge and action authority class and class conflict organization participation and representation political education political history and political development Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Advanced Topics in Global Information Management, Volume 5** Hunter, M. Gordon,Tan, Felix B.,2006-04-30 Advanced Topics in Global Information Management is a series of books that examine global information management GIM and its research and implications GIM research continues to progress with some scholars pushing the boundaries of thinking and others challenging the status quo Advanced Topics in Global Information Management Volume 5 is a part of this series Advanced Topics in Global Information Management Volume 5 discusses how many businesses exist in a global environment Whether they are large or small companies they may have suppliers or customers that reside in different geographical locations The ability to function in this global environment has been facilitated by the use of information technology Through research projects this book addresses the ability of both large and small business and government from the national level to local level to function in altered environments by using information technology In all of these situations both businesses and governments must be able to function and respond to various stakeholders by adopting the appropriate and necessary cultural perspective **The Chinese Idea of a University** Rui Yang,2022-09-02 In *The Chinese Idea of a University Phoenix Reborn* Rui Yang conceptualizes the cultural foundations of modern university development in Chinese societies Instead of focusing on the uniqueness of the societies this book aims to prove that one educational purpose could be fulfilled via many paths and that

most of the characteristics the university could be found in other institutions of higher learning Citing the practices of four selected Chinese societies Yang opposes the existence of an impassable chasm between Chinese and Western ideas of a university and argues that it is possible to combine Chinese and Western ideas of a university Also this book is one of the first in English to theorize the Chinese idea of a university It links the historical events to the present in a context of an enormous impact of Western academic models and institutions from the beginning of modern universities in Chinese societies to the contemporary period The scholarship is of high quality based on a thorough critical reading of relevant literature in both English and Chinese as well as detailed empirical research carried out on the campuses of eight leading universities in the four Chinese societies under consideration Ruth Hayhoe professor University of Toronto Yang Rui has produced an academic masterwork China has arrived as a global power and the East Asian university has achieved or largely achieved the long project of catch up to the West The future begins now and question of the Chinese idea of a university should trigger much discussion Professor Yang favors the development of hybrid East West higher education in the Chinese civilizational zone noting that to an extent existing universities have taken this path already He develops these challenging issues with a depth of scholarship far exceeding the current journal papers in the topic area and a style of exposition that reads really well A book of lasting importance Highly recommended Simon Marginson professor University of Oxford joint editor in chief Higher Education
