Services and Workforce Development Centers for Libraries Raymond Pun,Arpine Eloyan,Michael R. Oppenheim,2024-11-18 With the rise of unemployment increased career growth opportunities and changing workforce demographics libraries can support job seekers in several ways Career Services and Workforce Development Center for Libraries A Guide serves as a resource for libraries interested in creating supporting or enhancing their career services economic and workforce development programs for their communities Going beyond collection development and hosting job fair activities the book covers teaching resources and interviews from library leaders supporting workforce development initiatives or collaborationsideas on how libraries can be embedded in the workforce development community by providing a series of job readiness activities programs and serviceshow academic and public librarians can support their users exploring career opportunities and developmentexamines employment trends and resources such as generative artificial intelligence to dive into these issues so libraries can stay active in identifying new skill development and technologies to support their communitiesHow can one start a career services or job center program in their libraries What are specialized career services

in libraries being offered How can libraries advocate for funding for workforce development Divided into five chapters each chapter addresses these questions and provides a series of examples ideas and resources for readers to consider replicating in their own libraries If you are looking for ideas for your libraries to support a community of job seekers this is the book for you

The Fourth Industrial Revolution and the Labour Market Jon-Arild Johannessen, 2023-09-15 The innovation economy is the driver for the development of the Fourth Industrial Revolution and consequently there is a growing focus on innovation in general and technological innovation in particular In this context there is much to suggest that it is the triple impact of artificial intelligence big data and 5G and 6G networks that will go beyond the limits of existing competence This book is about the new competence that is emerging in the wake of artificial intelligence and intelligent robots It explains how these two technologies are completely fundamental to what is known as the Fourth Industrial Revolution The author argues that artificial intelligence will promote automation which will reduce wages rather than increase unemployment statistics The book posits that when the utility value of technology and the rate of dissemination of technology is high people who have the necessary competence will both future proof their jobs in the labour market and also be among the highest paid workers in the new economy that is emerging from the innovation economy Further by making education more compatible with new technology will enable graduates to access more secure and better paid jobs and all behavioural fields related to new technology will flourish because they can be used in many contexts to steer people's behaviour in certain directions through the integration of big data and artificial intelligence The book employs the following scholarly methods conceptual generalization scenario based thinking and historical economic methodology thus it will be of particular benefit to academic scholars researchers and graduate students who are concerned with the impact of the fourth industrial revolution on the labour market
