the emergence of the practice of gamification with the intention of mobilizing play's motivational power for capitalist production. This book outlines both the essentials and also critically explores their links to diverse strands of organization theory such as institutionalism, business ethics, critical theory, and organizational behavior. Gamification research has been mostly conducted within disciplines such as information studies, game studies, and information systems science. This is a paradoxical state of affairs whilst gamification aims at being a transformative intervention in work processes and practices and is being deployed as such by practitioners. This book will be of value to researchers, academics, and students interested in management and organization studies.
